---

Assurance, Challenge and Improvement in Health and Social Care

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

## 1.0 What we look for

## 2.0 Profile of service

This is a residential care home with eight beds that provides care for residents living with learning disability.

### 3.0 Service details

<b>Organisation/Registered Provider:</b> Amore (Watton) Limited  <b>Responsible Individual:</b> Mrs Nicola Cooper	<b>Registered Manager:</b> Mr Mark Beattie
<b>Person in charge at the time of inspection:</b> Mr Mark Beattie	<b>Date manager registered:</b> 5 July 2017
<b>Categories of care:</b> Residential Care LD – Learning disability. LD(E) – Learning disability – over 65 years.	<b>Number of registered places:</b> 8

### 4.0 Inspection summary

An unannounced inspection took place on 5 November 2018 from 09.50 to 12.10.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Residential Care Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Residential Care Homes Minimum Standards (2011).

The inspection assessed progress with any areas for improvement identified since the last medicines management inspection and to determine if the home was delivering safe, effective and compassionate care and if the service was well led.

Evidence of good practice was found in relation to medicine governance, medicine administration, care planning and medicines storage.

No areas for improvement were identified.

The residents were observed to be relaxed and comfortable in their surroundings and in their interactions with staff.

The findings of this report will provide the home with the necessary information to assist them to fulfil their responsibilities, enhance practice and residents' experience.

#### 4.1 Inspection outcome

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

This inspection resulted in no areas for improvement being identified. Findings of the inspection were discussed with Mr Mark Anderson, Registered Manager, as part of the inspection process and can be found in the main body of the report.

Enforcement action did not result from the findings of this inspection.

#### 4.2 Action/enforcement taken following the most recent care inspection

No further actions were required to be taken following the most recent inspection on 5 July 2018.

Enforcement action did not result from the findings of this inspection.

#### 5.0 How we inspect

Prior to the inspection a range of information relevant to the home was reviewed. This included the following:

- recent inspection reports and returned QIPs
- recent correspondence with the home
- the management of medicine related incidents reported to RQIA since the last medicines management inspection.

A poster informing visitors to the home that an inspection was being conducted was displayed.

During the inspection the inspector met with the registered manager, the deputy manager and six care staff.

We provided 10 questionnaires to distribute to residents and their representatives, for completion and return to RQIA. We left 'Have we missed you' cards in the foyer of the home to inform residents and their representatives, who we did not meet with or were not present in the home, how to contact RQIA to tell us their experience of the quality of service provision. Flyers which gave information on raising a concern were also left in the home.

We asked the registered manager to display a poster which invited staff to share their views and opinions by completing an online questionnaire.

A sample of the following records was examined during the inspection:

- medicines requested and received
- personal medication records
- medicine administration records
- medicines disposed of or transferred
- controlled drug record book
- medicine audits
- care plans
- training records
- medicines storage temperatures

The findings of the inspection were provided to the person in charge at the conclusion of the inspection.

## 6.0 The inspection

### 6.1 Review of areas for improvement from the most recent inspection dated 5 July 2018

The most recent inspection of the home was an unannounced care inspection. There were no areas for improvement identified as a result of the inspection.

### 6.2 Review of areas for improvement from the last medicines management inspection dated 14 February 2017

There were no areas for improvement identified as a result of the last medicines management inspection.

## 6.3 Inspection findings

### 6.4 Is care safe?

**Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.**

Medicines were managed by staff who had been trained and deemed competent to do so. An induction process was in place for care staff who had been delegated medicine related tasks. The impact of training was monitored through team meetings, supervision and annual appraisal. Competency assessments were completed annually. Refresher training in medicines management was provided in the last year.

Systems were in place to manage the ordering of prescribed medicines to ensure adequate supplies were available and to prevent wastage. Staff advised of the procedures to identify and report any potential shortfalls in medicines.

In relation to safeguarding, staff advised that they were aware of the regional procedures and who to report any safeguarding concerns to.

There were no controlled drugs subject to record keeping requirements. However, checks were performed on other controlled drugs which is good practice.

Discontinued or expired medicines were disposed of appropriately.

Medicines were stored safely and securely and in accordance with the manufacturer’s instructions. Medicine storage areas were clean, tidy and well organised. There were systems in place to alert staff of the expiry dates of medicines with a limited shelf life, once opened. The medicine refrigerator was checked at regular intervals.

**Areas of good practice**

There were examples of good practice in relation to staff training, competency assessment, the management of controlled drugs and the storage of medicines.

**Areas for improvement**

No areas for improvement were identified during the inspection.

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

**6.5 Is care effective?**

**The right care, at the right time in the right place with the best outcome.**

The sample of medicines examined had been administered in accordance with the prescriber’s instructions.

When a resident was prescribed a medicine for administration on a “when required” basis for the management of distressed reactions, the dosage instructions were recorded on the personal medication record. Staff knew how to recognise signs, symptoms and triggers which may cause a change in a resident’s behaviour and were aware that this change may be associated with pain. The reason for and the outcome of administration were recorded. A care plan was maintained.

The sample of records examined indicated that medicines which were prescribed to manage pain had been administered as prescribed. Staff advised that a pain assessment was completed as part of the admission process and were aware that ongoing monitoring was necessary to ensure that the pain was well controlled and the resident was comfortable. A pain assessment tool was used and a care plan was maintained.

Staff confirmed that compliance with prescribed medicine regimes was monitored and any omissions or refusals likely to have an adverse effect on the resident’s health were reported to the prescriber.

Medicine records were well maintained and facilitated the audit process. Personal medication records and handwritten entries on medicine administration records were updated by two members of staff. This safe practice was acknowledged.

Following discussion with the registered manager and staff, it was evident that other healthcare professionals were contacted, when required, to meet the needs of residents. Staff advised that they had good working relationships with healthcare professionals involved in resident care.

**Areas of good practice**

There were examples of good practice in relation to the standard of record keeping, care planning and the administration of medicines.

**Areas for improvement**

No areas for improvement were identified during the inspection.

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

**6.6 Is care compassionate?**

**Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.**

The administration of medicines to residents was completed in a caring manner, residents were given time to take their medicines and medicines were administered as discreetly as possible.

Residents were observed to be relaxed and comfortable in their surroundings and in their interactions with staff. Staff were knowledgeable regarding the residents’ needs, wishes and preferences. Staff and resident interaction and communication demonstrated that residents were treated courteously, with dignity and respect. Good relationships were evident between staff and residents.

None of the questionnaires that were issued for residents or their representatives to complete were returned within the designated timeframe of two weeks.

**Areas of good practice**

Staff listened to residents and took account of their views.

**Areas for improvement**

No areas for improvement were identified during the inspection.

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

## 6.7 Is the service well led?

**Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.**

We discussed the arrangements in place in relation to the equality of opportunity for residents and the importance of staff being aware of equality legislation and recognising and responding to the diverse needs of residents. Arrangements were in place to implement the collection of equality data within River House.

Written policies and procedures for the management of medicines were in place. These were not reviewed on this occasion. Following discussion with staff, it was evident that they were knowledgeable with the policies and procedures and that any updates were highlighted to them.

The governance arrangements for medicines management were reviewed. Management advised of the audits which take place and how areas for improvement were identified and followed up. This was usually through the development of action plans and staff supervision. A sample of the audit outcomes was provided. Also, as part of the pharmacist support to the home, a quarterly audit was undertaken and a list of the findings was left in the home for management to address.

There were satisfactory arrangements in place for the management of medicine related incidents. Staff confirmed that they knew how to identify and report incidents. They provided details of the procedures in place to ensure that all staff were made aware of incidents and to prevent recurrence. These usually included reflective practice and supervision. In relation to the regional safeguarding procedures, staff confirmed that they were aware that medicine incidents may need to be reported to the safeguarding team.

Following discussion with the staff, it was evident that they were familiar with their roles and responsibilities in relation to medicines management. They confirmed that any concerns in relation to medicines management were raised with the registered manager; and any resultant action was discussed at team meetings and/or supervision. They spoke positively about their work and advised that there were good working relationships in the home with staff, management and with other healthcare professionals. They stated they felt well supported in their work.

No members of staff shared their views by completing an online questionnaire.

### **Areas of good practice**

There were examples of good practice in relation to governance arrangements, the management of medicine incidents and quality improvement. There were clearly defined roles and responsibilities for staff.

**Areas for improvement**

No areas for improvement were identified during the inspection.

	<b>Regulations</b>	<b>Standards</b>
<b>Total number of areas for improvement</b>	0	0

**7.0 Quality improvement plan**

There were no areas for improvement identified during this inspection, and a QIP is not required or included, as part of this inspection report.
