| Brief description of the accommodation/how the service operates: This home is a registered Residential Care Home which provides care for up to 9 service users. There is a Nursing Home in the same building and the manager for this home manages both services. | |

2.0 Inspection summary

An announced inspection took place on 1 November 2022, from 1.20pm to 15.30pm. This was completed by an estates inspector.

This inspection focussed on the condition of the environment and engineering services within the unit proposed to accommodate nine RC – DE service users in association with variation application ref VA011955.

The purpose of the inspection was to determine if the home was delivering safe, effective care, and that the home was well led with respect to premises management.

The review of the environment and maintenance records found that the accommodation and services were well maintained, compliant with current good practice.

From an estates inspector's perspective the accommodation complied with the required registration standards, and the variation to registration (change of care category) can be approved.

3.0 How we inspect

RQIA's inspections form part of our ongoing assessment of the quality of services. Our reports reflect how they were performing at the time of our inspection, highlighting both good practice and any areas for improvement. It is the responsibility of the service provider to ensure compliance with legislation, standards and best practice, and to address any deficits identified during our inspections.

5.0 The inspection

5.1 What has this service done to meet any areas for improvement identified at or since last inspection?

The last inspection to Ashbrook Care Home (Residential within Nursing Home) was undertaken on 8 June 2021 by a Pharmacy Inspector (IN038946), there were no areas for improvement (AFIs) (areas for improvement) listed on the inspection report.

5.2 Inspection findings

The accommodation and building services reviewed as a result of variation application VA011955 were found to be in a satisfactory condition, compliant with current registration requirements.

Subsequently this variation to registration application, is approved from an Estate Inspector's perspective.

As there were no areas for improvement identified as a consequence of this inspection, and there are no AFIs carried forward from the previous inspection report then there is no Quality Improvement Plan required.
