

Unannounced Primary Inspection

Name of establishment:	Bangor – Brownlee Suite
RQIA number:	1053
Date of inspection:	24 September 2014
Inspector's name:	Linda Thompson
Inspection number:	18645

The Regulation And Quality Improvement Authority
9th Floor, Riverside Tower, 5 Lanyon Place, Belfast, BT1 3BT
Tel: 028 90 517 500 Fax: 028 890 517 501

1.0 General information

Name of establishment:	Bangor (Brownlee Suite)
Address:	27a Manor Avenue Bangor BT20 3NG
Telephone number:	028 91273342
Email address:	bangor@fshc.co.uk
Registered organisation/ Registered provider / Responsible individual	Four Seasons Health Care Mr James McCall
Registered manager:	Ms Donna Mawhinney (Acting)
Person in charge of the home at the time of inspection:	Nicola McLean team leader
Categories of care:	NH-LD , NH-LD(E)
Number of registered places:	17
Number of residents accommodated on day of inspection:	13
Scale of charges (per week):	£567.00
Date and type of previous inspection:	21 March 2014 secondary unannounced inspection
Date and time of inspection:	24 September 2014 12.30 – 16.30 hours
Name of inspector:	Linda Thompson Norma Munn

2.0 Introduction

The Regulation and Quality Improvement Authority (RQIA) is empowered under The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003 to inspect nursing homes. A minimum of two inspections per year is required.

This is a report of an unannounced primary care inspection to assess the quality of services being provided. The report details the extent to which the standards measured during inspection were met.

3.0 Purpose of the inspection

The purpose of this inspection was to consider whether the service provided to residents was in accordance with their assessed needs and preferences and was in compliance with legislative requirements, minimum standards and other good practice indicators. This was achieved through a process of analysis and evaluation of available evidence.

RQIA not only seeks to ensure that compliance with regulations and standards is met but also aims to use inspection to support providers in improving the quality of services. For this reason, inspection involves in-depth examination of an identified number of aspects of service provision.

The aims of the inspection were to examine the policies, practices and monitoring arrangements for the provision of nursing homes, and to determine the provider's compliance with the following:

- The HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003
- The Nursing Homes Regulations (Northern Ireland) 2005
- The Department of Health, Social Services and Public Safety's (DHSSPS) Nursing Homes Minimum Standards (2008).

Other published standards which guide best practice may also be referenced during the Inspection process.

4.0 Methods/process

Committed to a culture of learning, the RQIA has developed an approach which uses self-assessment, a critical tool for learning, as a method for preliminary assessment of achievement of the DHSSPS Nursing Homes Minimum Standards 2008.

The inspection process has three key parts; self-assessment (including completion of self- declaration), pre-inspection analysis and inspection visit by the inspector.

Specific methods/processes used in this inspection include the following:

- Review of any notifiable events submitted to RQIA since the previous inspection
- analysis of pre-inspection information
- discussion with the registered manager

- observation of care delivery and care practices
- discussion with staff
- examination of records
- consultation with residents individually and with others in groups
- review of the premises
- evaluation and feedback.

Any other information received by RQIA about this registered provider has also been considered by the inspector in preparing for this inspection.

5.0 Consultation process

During the course of the inspection, the inspector spoke with:

Patients	13
Staff	4
Relatives	0
Visiting Professionals	0

Questionnaires were provided, during the inspection, to residents and staff seeking their views regarding the service. No resident's representatives were available during the inspection visit. Given the health issues of the residents in Brownlee suite it was felt appropriate to limit the resident questionnaires to two residents. Other residents were interviewed and their comments recorded by the inspectors.

Matters raised from the questionnaires were addressed by the inspector either during the course of this inspection or within the following week.

Issued to	Number issued	Number returned
Patients / residents	2	2
Relatives / representatives	0	0
Staff	4	4

6.0 Inspection focus

The inspection sought to establish the level of compliance achieved regarding the selected DHSSPS Nursing Homes Minimum Standards.

Criteria from the following standards are included;

- management of nursing care – Standard 5
- management of wounds and pressure ulcers –Standard 11
- management of nutritional needs and weight Loss – Standard 8 and 12
- management of dehydration – Standard 12

An assessment on the progress of the issues raised during and since the previous inspection was also undertaken.

The inspector will also undertake an overarching view of the management of resident's human rights to ensure that residents' individual and human rights are safeguarded and actively promoted within the context of services delivered by the home.

The registered persons and the inspector have rated the home's compliance level against each criterion of the standard and also against each standard.

The table below sets out the definitions that RQIA has used to categorise the service's performance:

Guidance - Compliance statements		
Guidance - Compliance statements	Definition	Resulting Action in Inspection Report
0 - Not applicable		A reason must be clearly stated in the assessment contained within the inspection report
1 - Unlikely to become compliant		A reason must be clearly stated in the assessment contained within the inspection report
2 - Not compliant	Compliance could not be demonstrated by the date of the inspection.	In most situations this will result in a requirement or recommendation being made within the inspection report
3 - Moving towards compliance	Compliance could not be demonstrated by the date of the inspection. However, the service could demonstrate a convincing plan for full compliance by the end of the Inspection year.	In most situations this will result in a requirement or recommendation being made within the inspection report
4 - Substantially compliant	Arrangements for compliance were demonstrated during the inspection. However, appropriate systems for regular monitoring, review and revision are not yet in place.	In most situations this will result in a recommendation, or in some circumstances a requirement, being made within the inspection report
5 - Compliant	Arrangements for compliance were demonstrated during the inspection. There are appropriate systems in place for regular monitoring, review and any necessary revisions to be undertaken.	In most situations this will result in an area of good practice being identified and comment being made within the inspection report.

7.0 Profile of service

Bangor Care Home is situated in a quiet residential area on the outskirts of Bangor. The home is easily accessed off Bangor Ring Road.

Brownlee Suite is one of four suites within Bangor Care home and is located on the upper ground floor of the building. Access is provided from the upper car park at the rear of the building.

Accommodation for residents is provided over one single floor

A relative's room is accessible on the lower ground floor if required.

Communal lounge and dining areas are provided throughout the Brownlee Suite and residents are encouraged to make use of these facilities.

The home also provides for catering and laundry services.

A number of communal sanitary facilities are available throughout the home.

The nursing home is owned and operated by Four Seasons Healthcare.

The current home manager is Mrs Donna Mawhinney and her registration with RQIA is pending. Ms Mawhinney has worked in the home for many years and recently has been employed in the position of home manager.

Brownlee Suite is registered to provide care for a maximum of 17 persons under the following categories of care:

Nursing care

LD Learning disability under 65 years

LD (E) Learning disability over 65 years

The home's RQIA 'Certificate of Registration' was appropriately displayed in the entrance hall of the Suite.

8.0 Summary of inspection

This summary provides an overview of the services examined during an unannounced primary care inspection to Brownlee Suite. The inspection was undertaken by Linda Thompson and Norma Munn on 24 September 2014 from 12.30 to 16.30 hours.

The inspection sought to establish the level of compliance achieved regarding the selected DHSSPS Nursing Homes Minimum Standards.

The inspector was welcomed into the home by Nicola McLean team leader and the registered nurse in charge of the unit. Ms Donna Mawhinney home manager was available throughout the inspection. Verbal feedback of the issues identified during the inspection was given to Ms McLean, Ms Mawhinney and Mrs Mary Moore regional manager at the conclusion of the inspection.

Prior to the inspection, the registered person completed a self-assessment using the criteria outlined in the standards inspected. This self-assessment was received by the Authority in July 2014 and the inspector considers the level of compliance assessed by the registered person to be under evaluated. The level of compliance evaluated by the inspectors is more accurately recorded as compliant with the standards inspected.

The comments provided by the registered persons in the self-assessment were not altered in any way by RQIA. See appendix one.

During the course of the inspection, the inspector met with patients (known as residents), and staff to seek their opinions of the quality of care and service delivered. No resident representatives were available during the inspection. The inspector also examined the returned questionnaires from staff, observed care practices, examined a selection of records, and carried out a general inspection of the nursing home environment as part of the inspection process.

The inspector also spent two extended periods observing staff and resident interaction.

Discussions and questionnaires are unlikely to capture the true experiences of those patients unable to verbally express their opinions. Observation therefore is a practical and proven method that can help us to build up a picture of their care experience.

These observations have been recorded using the Quality of Interaction Schedule (QUIS). This tool was designed to help evaluate the type and quality of communication which takes place in the nursing home.

As a result of the previous inspection conducted on 21 March 2014 two recommendations were issued. These were reviewed during this inspection and the inspector evidenced that both recommendations have been fully complied with. Details can be viewed in the section immediately following this summary.

Standards inspected:

Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed. (Selected criteria)

Standard 8: Nutritional needs of patients are met. (Selected criteria)

Standard 11: Prevention and treatment of pressure ulcers. (Selected criteria)

Standard 12: Patients receive a nutritious and varied diet in appropriate surroundings at times convenient to them. (Selected criteria).

8.1 Inspection findings

8.1.1 Management of nursing care – Standard 5

The inspector can confirm that at the time of the inspection there was evidence to validate that residents received safe and effective care in Brownlee Suite.

There was evidence of comprehensive and detailed assessment of resident needs from date of admission. This assessment was found to be updated on a regular basis and as required. A variety of risk assessments were also used to supplement the general assessment tool. The assessment of resident need was evidenced to inform the care planning process.

Comprehensive reviews of the assessments of need, the risk assessments and the care plans were maintained on a regular basis plus as required.

There was also evidence that the referring health and social care trust (HSCT) maintained appropriate reviews of the patient's satisfaction with the placement in the home, the quality of care delivered and the services provided.

The inspectors were impressed with the quality of resident care records maintained in Brownlee Suite. The registered nursing staff are commended for the quality of the person centred records maintained.

Compliance Level: Compliant

8.1.2 Management of wounds and pressure ulcers – Standard 11 (selected criteria)

The inspectors were informed that there were no residents with wounds currently in Brownlee Suite.

There was evidence of appropriate assessment of the risk of development of pressure ulcers which demonstrated timely referral to tissue viability specialist nurses (TVN) for guidance and referral to the HSCT regarding the supply of pressure relieving equipment if appropriate.

Care plans for the management of risks of developing pressure ulcers were maintained.

Compliance Level: Compliant

8.1.3 Management of nutritional needs and weight loss – Standard 8 and 12 (selected criteria)

The inspectors reviewed the management of nutrition and weight loss within the home.

Robust systems were evidenced with risk assessments and appropriate referrals to General Practitioners (GP's), speech and language therapists (SALT) and or dieticians being made as required.

The inspector also observed the serving of lunch and can confirm that residents were offered a choice of meal and that the meal service was well managed and supervised by appropriately experienced staff.

Residents were observed to be assisted with dignity and respect throughout the meal. Concerns were raised previously in the home regarding the use of plastic crockery for residents. Whilst the use of plastic crockery continues the home manager confirmed that she has already replaced cups and is sourcing alternatives for plates and bowls.

Compliance Level: Compliant

8.1.4 Management of dehydration – Standard 12 (selected criteria)

The inspector examined the management of dehydration during the inspection which evidenced that fluid requirements and intake details for residents were recorded and maintained for those patients assessed at risk of dehydration.

Residents were observed to be able to access fluids with ease throughout the inspection. Staff were observed offering residents additional fluids throughout the inspection. Fresh drinking water/various cordials were available to residents in lounges, dining rooms and bedrooms.

Compliance Level: Compliant

8.2 Resident and staff questionnaires

Whilst most residents were unable due to the complexity of their health to complete the questionnaires, two residents were able to complete the questionnaires with the help of the inspector.

The inspectors however were able to assess the level of satisfaction of quality of care for the remaining residents through conversation and observation.

Some comments received from residents:

'It is good here'

'I enjoy my lunch and the nurses get me anything I need'

'I always have something to do'

Some comments received from staff:

'The team in Brownlee suite work well together and there is good communication with or residents'

'I am very happy in my job'

'There is plenty of training afforded to staff to help them cope with working in a care environment'

'I feel the residents in our learning disability units are assisted to have meaningful experiences in their day to day life by staff who know them well. I feel it is to our advantage that the home manager is learning disability trained and she understands the challenges and situations we may face'

8.3 A number of additional areas were also examined.

- records required to be held in the nursing home
- Human Rights Act 1998 and European Convention on Human Rights (ECHR)
- Resident and staff quality of interactions (QUIS)
- Complaints
- Resident finance pre-inspection questionnaire
- NMC declaration
- staffing and staff comments
- comments from representatives/relatives *and visiting professionals*
- environment

Full details of the findings of inspection are contained in section 10 of the report.

The inspector can confirm that at the time of this inspection the delivery of care to patients was evidenced to be of an excellent standard. There were processes in place to ensure the effective management of the themes inspected.

The atmosphere in the home was warm and welcoming.

The home's general environment was in the main very well maintained and residents were observed to be treated with dignity and respect.

One identified bedroom was noted to have a malodour and one communal bathroom area contained two pieces of equipment which had significant surface damage. Both issues are discussed in the main body of the report. A requirement is raised to ensure

that action is taken with urgency. An urgent findings letter was left with the home manager during feedback.

Therefore, one requirement is raised as a consequence of this inspection. The requirement is detailed throughout the report and in the quality improvement plan (QIP).

The inspector would like to thank the residents, the home manager, the regional manager, registered nurses and staff for their assistance and co-operation throughout the inspection process.

The inspector would also like to thank the staff and residents who completed questionnaires.

9.0 Follow-up on the requirements and recommendations issued as a result of the previous inspection on 21 March 2014

No	Regulation Ref.	Requirements	Action taken - as confirmed during this inspection	Inspector's Validation of Compliance
1.	16 (2) (b)	It is required that clarity is sought with the identified patient's General Practitioner regarding the best interest of the patient in the event of cardiopulmonary arrest. Accurate and comprehensive records of any decision making and discussions should be kept and be available for relevant healthcare professionals.	The inspectors can confirm that the action required has been appropriately taken.	Compliant

No	Minimum Standard Ref.	Recommendations	Action Taken – as confirmed during this inspection	Inspector's Validation of Compliance
1.	20.1	Guidance documents such as Nursing Midwifery Council (NMC) guidance and the Resuscitation Guidelines 2010 from the Resuscitation Council UK should be available in the nursing home for staff reference.	The inspector can confirm that the required guidance documents are available as required.	Compliant
2.	5.3	It is recommended that each patient's activities of daily living nursing needs assessment is evidenced to have been reviewed at least annually or more frequently as patients' needs change.	The inspector can confirm that an annual review is maintained on the resident's assessment of daily living activities as required.	Compliant

9.1 Follow up on any issues/concerns raised with RQIA since the previous inspection such as complaints or safeguarding investigations.

It is not in the remit of RQIA to investigate complaints made by or on the behalf of individuals, as this is the responsibility of the providers and commissioners of care.

However, if there is considered to be a breach of regulation as stated in the Nursing Homes Regulations (Northern Ireland) 2005, RQIA has a responsibility to review the issues through inspection.

Since the previous care inspection 24 March 2014, RQIA have received nil notifications of safeguarding of vulnerable adult (SOVA) incidents in respect of Brownlee Suite.

10.0 Additional areas examined

10.1 Records required to be held in the nursing home

Prior to the inspection a check list of records required to be held in the home under Regulation 19(2) Schedule 4 of The Nursing Homes Regulations (Northern Ireland) 2005 was forwarded to the home for completion. The evidence provided in the returned questionnaire confirmed that the required records were maintained in the home and were available for inspection.

10.2 Residents under guardianship

There were no patients currently under guardianship resident at the time of inspection in the home.

10.3 Human Rights Act 1998 and European Convention on Human Rights (ECHR) DHSSPS and Deprivation of Liberty Safeguards (DOLS)

The inspector discussed the Human Rights Act and Human Rights Legislation with the home manager and one of the registered nurses. The inspector can confirm that copies of these documents were available in the home.

The home manager and registered nurse demonstrated an awareness of the details outlined in these documents.

10.4 Quality of interaction schedule (QUIS)

The inspectors undertook two periods of observation in the home which lasted for approximately 20 minutes each.

The inspectors observed the interactions between residents and staff during the serving of lunch in the dining room. The inspectors also observed care practices and staff and resident interactions throughout the inspection process.

The observation tool used to record this observation uses a simple coding system to record interactions between staff, patients and visitors to the area being observed.

Positive interactions	35
Basic care interactions	0
Neutral interactions	0
Negative interactions	0

The inspector evidenced that the quality of interactions between staff and patients/residents was positive.

A description of the coding categories of the Quality of Interaction Tool is appended to the report.

10.5 Complaints

Prior to the inspection a complaints questionnaire was forwarded by the Regulation and Quality Improvement Authority (RQIA) to the home for completion. The evidence provided in the returned questionnaire indicated that complaints were being pro-actively managed.

The inspector reviewed the complaints records. This review evidenced that complaints were investigated in a timely manner and the complainant's satisfaction with the outcome of the investigation was sought.

10.6 Patient finance questionnaire

Prior to the inspection a resident financial questionnaire was forwarded by RQIA to the home for completion. The evidence provided in the returned questionnaire indicated that residents' monies were being managed in accordance with legislation and best practice guidance.

10.7 NMC declaration

Prior to the inspection the registered manager was asked to complete a proforma to confirm that all nurses employed were registered with the Nursing and Midwifery Council of the United Kingdom (NMC).

The evidence provided in the returned proforma indicated that all nurses, including the registered manager, were appropriately registered with the NMC. This was also evidenced by the inspector on the day of inspection.

10.8 Questionnaire findings

10.8.1 Staffing/staff comments

Discussion with the team leader and a number of staff and review of a sample of staff duty rosters evidenced that the registered nursing and care staffing levels were found to be in line with the RQIA's recommended minimum staffing guidelines for the number of residents currently in the home. The care and ancillary staffing levels were found to be satisfactory.

Staff were provided with a variety of relevant training including mandatory training since the previous inspection.

During the inspection the inspector spoke to four staff. The inspector was able to speak to a number of these staff individually and in private. On the day of inspection four staff completed questionnaires.

The following are examples of staff comments during the inspection and in questionnaires;

'The team in Brownlee suite work well together and there is good communication with or residents'

'I am very happy in my job'

'There is plenty of training afforded to staff to help them cope with working in a care environment'

'I feel the residents in our learning disability units are assisted to have meaningful experiences in their day to day life by staff who know them well. I feel it is to our advantage that the home manager is learning disability trained and she understands the challenges and situations we may face'

10.8.2 Patients' comments

During the inspection the inspector spoke with 10 residents individually and with a number in groups.

The following are examples of patients' comments made to the inspectors.

'It is good here'

'I enjoy my lunch and the nurses get me anything I need'

'I always have something to do'

10.8.3 Resident representative/relatives' comments

There were no resident representatives available during the inspection visit.

10.8.4 Professionals' comments

There were no professional visits made to the home during the inspection visit.

10.9 Review of care records

The inspector examined a number of resident care records as part of the inspection process to validate the provider's self-assessment. Records were evidenced to be maintained to a commendable standard.

Records were evidenced to be person centred, detailed and comprehensive. The registered nursing staff are commended for the quality of the recording evidenced during the inspection visit.

10.10 Management of infection prevention and control

10.10.1 Malodour in one identified bedroom

The inspectors identified a malodour in one identified resident's bedroom. The matter was discussed at length with the team leader, the home manager and the regional manager. Urgent action is required to address the malodour.

The inspector discussed the need for replacement equipment and ensured that all were aware of the best practice financial guidelines issued by RQIA.

10.10.2 Equipment concerns in one identified communal bathroom

The inspector raised concern regarding equipment in an identified communal bathroom. The equipment is detailed below;

- a toilet frame was noted to have significant surface damage / corrosion and therefore is unable to be appropriately cleaned
- a shower chair was noted to have significant surface damage / corrosion and therefore is unable to be appropriately cleaned
- a net sponge was observed hanging from the shower attachment
- a line skip was noted to have dirty wheel covers

A requirement is raised.

11.0 Quality improvement plan

The details of the quality improvement plan appended to this report were discussed with Ms McLean team leader, Ms Mawhinney home manager and Ms Moore regional manager as part of the inspection process.

The timescales for completion commence from the date of inspection.

The registered provider / manager is required to record comments on the quality improvement plan.

Matters to be addressed as a result of this inspection are set in the context of the current registration of your premises. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises the RQIA would apply standards current at the time of that application.

Appendix 1

Section A	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 5.1 - At the time of each patient's admission to the home, a nurse carries out and records an initial assessment, using a validated assessment tool, and draws up an agreed plan of care to meet the patient's immediate care needs. Information received from the care management team informs this assessment. Criterion 5.2 - A comprehensive, holistic assessment of the patient's care needs using validated assessment tools is completed within 11 days of admission. Criterion 8.1 - Nutritional screening is carried out with patients on admission, using a validated tool such as the 'Malnutrition Universal Screening Tool (MUST)' or equivalent. Criterion 11.1 - A pressure ulcer risk assessment that includes nutritional, pain and continence assessments combined with clinical judgement is carried out on all patients prior to admission to the home where possible and on admission to the home.	
Nursing Home Regulations (Northern Ireland) 2005 : Regulations 12(1) and (4); 13(1); 15(1) and 19 (1) (a) schedule 3	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
Prior to admission to the home, the Home Manager or a designated representative from the home carries out a pre admission assessment. Information gleaned from the resident/representative (where possible), the care records and information from the Care Management Team informs this assessment. Risk assessments such as the Braden Tool are carried out, if possible, at this stage. Following a review of all information a decision is made in regard to the home's ability to meet the needs of the resident. If the admission is an emergency admission and a pre admission is not possible in the resident's current location then - a pre admission assessment is completed over the telephone with	Substantially compliant

written comprehensive, multidisciplinary information regarding the resident being faxed or left into the home. Only when the Manager is satisfied that the home can meet the residents needs will the admission take place.

On admission to the home an identified nurse completes initial assessments using a patient centred approach. The nurse communicates with the resident and/or representative, refers to the pre admission assessment and to information received from the care management team to assist her/him in this process.

There are two documents completed within twelve hours of admission - an Admission Assessment which includes photography consent, record of personal effects and a record of 'My Preferences' and a Needs Assessment which includes 16 areas of need - the additional comments section within each of the 16 sections includes additional necessary information that is required to formulate a person centred plan of care for the Resident.

In addition to these two documents, the nurse completes risk assessments immediately on admission. These include a skin assessment using the Braden Tool, a body map, an initial wound assessment (if required), a moving and handling assessment, a falls risk assessment, bed rail assessment, a pain assessment and nutritional assessments including the MUST tool, FSHC nutritional and oral assessment. Other risk assessments that are completed within seven days of admission are a continence assessment and a bowel assessment,

Following discussion with the resident/representative, and using the nurse's clinical judgement, a plan of care is then developed to meet the resident's needs in relation to any identified risks, wishes and expectations. This can be evidenced in the care plan and consent forms.

The Home Manager and Regional Manager will complete audits on a regular basis to quality assure this process

Section B	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 5.3 - A named nurse has responsibility for discussing, planning and agreeing nursing interventions to meet identified assessed needs with individual patients' and their representatives. The nursing care plan clearly demonstrates the promotion of maximum independence and rehabilitation and, where appropriate, takes into account advice and recommendations from relevant health professional. Criterion 11.2 - There are referral arrangements to obtain advice and support from relevant health professionals who have the required expertise in tissue viability. Criterion 11.3 - Where a patient is assessed as 'at risk' of developing pressure ulcers, a documented pressure ulcer prevention and treatment programme that meets the individual's needs and comfort is drawn up and agreed with relevant healthcare professionals. Criterion 11.8 - There are referral arrangements to relevant health professionals who have the required knowledge and expertise to diagnose, treat and care for patients who have lower limb or foot ulceration. Criterion 8.3 - There are referral arrangements for the dietician to assess individual patient's nutritional requirements and draw up a nutritional treatment plan. The nutritional treatment plan is developed taking account of recommendations from relevant health professionals, and these plans are adhered to. Nursing Home Regulations (Northern Ireland) 2005 : Regulations13 (1);14(1); 15 and 16	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
A named nurse completes a comprehensive and holistic assessment of the resident's care needs using the assessment tools as cited in section A, within 7 days of admission. The named nurse devises care plans to meet identified needs and in consultation with the resident/representative. The care plans demonstrate the promotion of	Substantially compliant

maximum independence and focuses on what the resident can do for themselves as well as what assistance is required. Any recommendations made by other members of the multidisciplinary team are included in the care plan. The care plans have goals that are realistic and achievable.

Registered nurses in the home are fully aware of the process of referral to a TVN via email. Referrals are also made via this process in relation to residents who have lower limb or foot ulceration to either the TVN or a podiatrist. If necessary, a further referral is made to a vascular surgeon by the G.P, TVN or podiatrist.

Where a resident is assessed as being 'at risk' of developing pressure ulcers, a Pressure Ulcer Management and Treatment plan is commenced. A care plan will be devised to include skin care, frequency of repositioning, mattress type. The care plan will give due consideration to advice received from other multidisciplinary members. The treatment plan is agreed with the resident/representative, Care Management and relevant members of the MDT. The Regional Manager is informed via a monthly report and during the Reg 29 visit.

The Registered Nurse makes a decision to refer a resident to a dietician based on the score of the MUST tool and their clinical judgement. Dietician referral forms are held within the home. These forms can be completed by staff in the home and faxed directly to the dietician for referral. The dietician is also available over the telephone for advice until she is able to visit the resident. All advice, treatment or recommendations are recorded on the MDT form with a subsequent care plan being compiled or current care plan being updated to reflect the advice and recommendations. The care plan is reviewed and evaluated on a monthly basis or more often if necessary. Residents, representatives, staff in the home and other members of the MDT are kept informed of any changes. The home is currently involved in a community pilot scheme with the dieticians to monitor supplements and how to improve the service. The dieticians will then hold in house training for the staff team.

Section C	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 5.4 Re-assessment is an on-going process that is carried out daily and at identified, agreed time intervals as recorded in nursing care plans. Nursing Home Regulations (Northern Ireland) 2005 : Regulations 13 (1) and 16	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
The Needs Assessment, risk assessments and care plans are reviewed and evaluated at a minimum of once a month or more often if there is a change in the resident's condition. The plan of care dictates the frequency of review and re assessment, with the agreed time interval recorded on the plan of care. The resident is assessed on an ongoing daily basis with any changes noted in the daily progress notes and care plan evaluation forms. Any changes are reported on a 24 hour shift report for the Home Manager's attention. The Manager and Regional Manager will complete audits to quality assure the above process and compile action plans if any deficit is noted.	Substantially compliant

Section D	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 5.5 - All nursing interventions, activities and procedures are supported by research evidence and guidelines as defined by professional bodies and national standard setting organisations. Criterion 11.4 - A validated pressure ulcer grading tool is used to screen patients who have skin damage and an appropriate treatment plan implemented. Criterion 8.4 - There are up to date nutritional guidelines that are in use by staff on a daily basis.	
Nursing Home Regulations (Northern Ireland) 2005 : Regulation 12 (1) and 13(1)	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
The home refers to up to date guidelines as defined by professional bodies and national standard setting organisations when planning care. Guidelines from NICE, GAIN, RCN, NIPEC, HSSPS, PHA and RQIA are available for staff to refer to. The validated pressure ulcer grading tool used by the home to screen residents who have skin damage is the EPUAP grading system. If a pressure ulcer is present on admission or a resident develops a pressure ulcer during admission then an initial wound assessment is completed with a plan of care which includes the grade of pressure ulcer, dressing regime, how to clean the wound, frequency of repositioning, mattress type and time interval for review. Thereafter, an ongoing wound assessment and care plan evaluation form is completed at each dressing change, if there is any change to the dressing regime or if the condition of the pressure ulcer changes. There are up to date Nutritional Guidelines such as 'Promoting Good Nutrition', RCN- 'Nutrition Now', 'PHA - 'Nutritional Guidelines and Menu Checklist for Residential and Care homes' and NICE guidelines - Nutrition Support in Adults, available for staff to refer to on an ongoing basis. Staff also refer to FSHC policies and procedures in	Substantially compliant

relation to nutritional care, diabetic care, care of subcutaneous fluids and care of percutaneous endoscopic gastrostomy (PEG)..

Section E	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 5.6 - Contemporaneous nursing records, in accordance with NMC guidelines, are kept of all nursing interventions, activities and procedures that are carried out in relation to each patient. These records include outcomes for patients. Criterion 12.11 - A record is kept of the meals provided in sufficient detail to enable any person inspecting it to judge whether the diet for each patient is satisfactory. Criterion 12.12 - Where a patient's care plan requires, or when a patient is unable, or chooses not to eat a meal, a record is kept of all food and drinks consumed. Where a patient is eating excessively, a similar record is kept. All such occurrences are discussed with the patient and reported to the nurse in charge. Where necessary, a referral is made to the relevant professionals and a record kept of the action taken. Nursing Home Regulations (Northern Ireland) 2005 : Regulation/s 12 (1) & (4), 19(1) (a) schedule 3 (3) (k) and 25	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
Nursing records are kept of all nursing interventions, activities and procedures that are carried out in relation to each resident. These records are contemporaneous and are in accordance with NMC guidelines. All care delivered includes an evaluation and outcome plan. Nurses have access to policies and procedures in relation to record keeping and have their own copies of the NMC guidelines - Record keeping: Guidance for nurses and midwives. Records of the meals provided for each resident at each mealtime are recorded on a daily menu choice form. The Catering Manager also keeps records of the food served and include any specialist dietary needs. Residents who are assessed as being 'at risk' of malnutrition, dehydration or eating excessively have all their food and fluids recorded in detail on a daily basis using a FSHC food record booklet or fluid record booklet. These charts are	Substantially compliant

recorded over a 24 hour period with the fluid intake totalled at the end of the 24 hour period. The nurse utilises the information contained in these charts in their daily evaluation. Any deficits are identified with appropriate action being taken and with referrals made to the relevant MDT member as necessary. Any changes to the resident's plan of care is discussed with them and/or their representative. Care records are audited on a regular basis by the Manager with an action plan compiled to address any deficits or areas for improvement - this is discussed during supervision sessions with each nurse as necessary.

Section F	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 5.7 The outcome of care delivered is monitored and recorded on a day-to-day basis and, in addition, is subject to documented review at agreed time intervals and evaluation, using benchmarks where appropriate, with the involvement of patients and their representatives. Nursing Home Regulations (Northern Ireland) 2005 : Regulation 13 (1) and 16	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
The outcome of care delivered is monitored and recorded on a daily basis on the daily progress notes with at least a minimum of one entry during the day and one entry at night. The outcome of care is reviewed as indicated on the plan of care or more frequent if there is a change in the resident's condition or if there are recommendations made by any member of the MDT. Residents and/or their representatives are involved in the evaluation process.	Substantially compliant

Section G	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 5.8 - Patients are encouraged and facilitated to participate in all aspects of reviewing outcomes of care and to attend, or contribute to, formal multidisciplinary review meetings arranged by local HSC Trusts as appropriate. Criterion 5.9 - The results of all reviews and the minutes of review meetings are recorded and, where required, changes are made to the nursing care plan with the agreement of patients and representatives. Patients, and their representatives, are kept informed of progress toward agreed goals.	
Nursing Home Regulations (Northern Ireland) 2005 : Regulation/s 13 (1) and 17 (1)	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
Care Management Reviews are generally held six-eight weeks post admission and then annually thereafter. Reviews can also be arranged in response to changing needs, expressions of dissatisfaction with care or at the request of the resident or representative. The Trust are responsible for organising these reviews and inviting the resident or their representative. A member of nursing staff attends these reviews. Copies of the minutes of the review are sent to the resident/representative with a copy held in the resident's file. Any recommendations made are actioned by the home, with care plans reviewed to reflect the changes. The resident or representative is kept informed of progress toward the agreed goals.	Substantially compliant

Section H	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 12.1 - Patients are provided with a nutritious and varied diet, which meets their individual and recorded dietary needs and preferences. Full account is taken of relevant guidance documents, or guidance provided by dieticians and other professionals and disciplines. Criterion 12.3 - The menu either offers patients a choice of meal at each mealtime or, when the menu offers only one option and the patient does not want this, an alternative meal is provided. A choice is also offered to those on therapeutic or specific diets.	
Nursing Home Regulations (Northern Ireland) 2005 : Regulation/s 12 (1) & (4), 13 (1) and 14(1)	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
The home follows FSHC policy and procedures in relation to nutrition and follows best practice guidelines as cited in section D. Registered nurses fully assess each resident's dietary needs on admission and review on an ongoing basis. The care plan reflects type of diet, any special dietary needs, personal preferences in regard to likes and dislikes, any specialised equipment required, if the resident is independent or requires some level of assistance and recommendations made by the Dietician or the Speech and Language Therapist. The plan of care is evaluated on a monthly basis or more often if necessary. The home has a 3 week menu which is reviewed on a 6 monthly basis taking into account seasonal foods. The menu is compiled following consultation with residents and their representatives - resident advocacy meetings, one to one meetings and food questionnaires. The PHA document - 'Nutritional and Menu Checklist for Residential and Nursing homes' is used to ensure that the menu is nutritious and varied. Copies of instructions and recommendations from the dietician and speech and language therapist are made available in the kitchen along with a diet notification form which informs the kitchen of each resident's specific dietary needs.	Substantially compliant

Residents are offered a choice of two meals and desserts at each meal time, if the resident does not want anything from the daily menu an alternative meal of their choice is provided. The menu offers the same choice, as far as possible to those who are on therapeutic or specific diets. Each resident is offered a choice of meal which is then recorded on the daily menu sheet. Finger foods are available for those who wish to have them. A variety of condiments, sauces and fluids are available at each meal. Daily menus are on display in each dining room.

Section I	
Standard 5: Patients receive safe, effective nursing care based on a holistic assessment of their care needs that commences prior to admission to the home and continues following admission. Nursing care is planned and agreed with the patient, is accurately recorded and outcomes of care are regularly reviewed.	
Criterion 8.6 - Nurses have up to date knowledge and skills in managing feeding techniques for patients who have swallowing difficulties, and in ensuring that instructions drawn up by the speech and language therapist are adhered to. Criterion 12.5 - Meals are provided at conventional times, hot and cold drinks and snacks are available at customary intervals and fresh drinking water is available at all times. Criterion 12.10 - Staff are aware of any matters concerning patients' eating and drinking as detailed in each individual care plan, and there are adequate numbers of staff present when meals are served to ensure: - risks when patients are eating and drinking are managed - required assistance is provided - necessary aids and equipment are available for use. Criterion 11.7 - Where a patient requires wound care, nurses have expertise and skills in wound management that includes the ability to carry out a wound assessment and apply wound care products and dressings. Nursing Home Regulations (Northern Ireland) 2005 : Regulation/s 13(1) and 20	
Provider's assessment of the nursing home's compliance level against the criteria assessed within this section	Section compliance level
Registered nurses have completed the e learning module on nutrition. Face to face training has taken place with care staff. The Speech and Language therapist and dietician also give informal advice and guidance when visiting the home. Nurses refer to up to date guidance such as NICE guidelines - 'Nutrition Support in Adults' and NPSA document - 'Dysphagia Diet Food Texture Descriptors'. All recommendations made by the speech and language	Substantially compliant

therapist are incorporated into the care plan to include type of diet, consistency of fluids, position for feeding, equipment to use and assistance required. Training is arranged in July 2014 for the cook. Meals are served at the following times:- Breakfast - 9am-10.30am Morning tea - 11am Lunch - 12.50pm Afternoon tea - 3pm Evening tea - 4.50pm Supper - 8-9pm There are variations to the above if a resident requests to have their meals outside of these times. Hot and cold drinks and a variety of snacks are available throughout the day and night and on request. There are foods available outside of these times for those resident's who require modified or fortified diets. Cold drinks including fresh water are available at all times in the lounges and bedrooms, these are replenished on a regular basis. Any matters concerning a resident's eating and drinking are detailed on each individual care plan - including for eg. likes and dislikes, type of diet, consistency of fluid, any special equipment required and if assistance is required. A diet notification form is completed for each resident with a copy given to the kitchen and one held in the care file. Meals are not served unless a staff member is present in the dining room. Residents who require supervision, full or part assistance are given individual attention and are assisted at a pace suitable to them. Each nurse has completed an education e-learning module on pressure area care. The home has a link nurse who has received enhanced training, to provide support and education to other nurses within the home on an ad hoc basis. Central training on wound care related topics are arranged for nurses requiring additional support. All nurses within the home have a competency assessment completed. Competency assessments have a quality assurance element built into the process. The home liaises directly with the Trust clinical facilitator who has held training sessions and will offer advice and training on a 1-1 basis.

PROVIDER'S OVERALL ASSESSMENT OF THE NURSING HOME'S COMPLIANCE LEVEL AGAINST STANDARD 5	COMPLIANCE LEVEL
	Substantially compliant

Appendix 2

Explanation of coding categories as referenced in the Quality of Interaction Schedule (QUIS)

Positive social (PS) – care over and beyond the basic physical care task demonstrating patient centred empathy, support, explanation, socialisation etc.	Basic care: (BC) – basic physical care e.g. bathing or use of toilet etc. with task carried out adequately but without the elements of social psychological support as above. It is the conversation necessary to get the task done.
• Staff actively engage with people e.g. what sort of night did you have, how do you feel this morning etc. (even if the person is unable to respond verbally) • Checking with people to see how they are and if they need anything • Encouragement and comfort during care tasks (moving and handling, walking, bathing etc.) that is more than necessary to carry out a task • Offering choice and actively seeking engagement and participation with patients • Explanations and offering information are ☐ tailored to the individual, the language used easy to understand, and non-verbal used where appropriate • Smiling, laughing together, personal touch and empathy • Offering more food/ asking if finished, going the extra mile • Taking an interest in the older patient as a person, rather than just another admission • Staff treat people with respect addressing older patients and visitors respectfully, providing timely assistance and giving an explanation if unable to do something right away • Staff respect older people's privacy and dignity by speaking quietly with older people about private matters and by not talking about an individual's care in front of others	Examples include: Brief verbal explanations and encouragement, but only that the necessary to carry out the task No general conversation

Neutral (N) – brief indifferent interactions not meeting the definitions of other categories.	Negative (NS) – communication which is disregarding of the residents' dignity and respect.
Examples include: • Putting plate down without verbal or non-verbal contact • Undirected greeting or comments to the room in general • Makes someone feel ill at ease and uncomfortable • Lacks caring or empathy but not necessarily overtly rude • Completion of care tasks such as checking readings, filling in charts without any verbal or non-verbal contact • Telling someone what is going to happen without offering choice or the opportunity to ask questions • Not showing interest in what the patient or visitor is saying	Examples include: • Ignoring, undermining, use of childlike language, talking over an older person during conversations • Being told to wait for attention without explanation or comfort • Told to do something without discussion, explanation or help offered • Being told can't have something without good reason/ explanation • Treating an older person in a childlike or disapproving way • Not allowing an older person to use their abilities or make choices (even if said with 'kindness') • Seeking choice but then ignoring or over ruling it • Being angry with or scolding older patients • Being rude and unfriendly • Bedside hand over not including the patient

Quality Improvement Plan

Unannounced Primary Inspection

Bangor – Brownlee Suite

24 September 2014

The areas where the service needs to improve, as identified during this inspection visit, are detailed in the inspection report and Quality Improvement Plan.

The specific actions set out in the Quality Improvement Plan were discussed with Donna Mawhinney home manager and Mary Moore regional manager either during or after the inspection visit.

Any matters that require completion within 28 days of the inspection visit have also been set out in separate correspondence to the registered persons.

Registered providers/managers should note that failure to comply with regulations may lead to further enforcement and/or prosecution action as set out in The HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003.

It is the responsibility of the registered provider/manager to ensure that all requirements and recommendations contained within the Quality Improvement Plan are addressed within the specified timescales.

Matters to be addressed as a result of this inspection are set in the context of the current registration of your premises. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises the RQIA would apply standards current at the time of that application.

Statutory Requirements

This section outlines the actions which must be taken so that the registered person/s meets legislative requirements based on the HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, and the Nursing Homes Regulations (NI) 2005

No.	Regulation Reference	Requirements	Number of Times Stated	Details Of Action Taken By Registered Person(S)	Timescale
1.	13(7)	The registered person must ensure that ; • The malodour in the identified bedroom is actioned with all due haste. A letter separate from the returned QIP should be sent to the inspector to outline how the malodour has been addressed in light of the finance discussions. • The equipment identified in the communal bathroom must be cleaned, repaired or replaced Ref section 10.10	One	The malodour was caused by a double divan mattress being in place. In agreement with the resident a profile bed and new mattress has now been put into this bedroom. The equipment identified in the bathroom is no longer necessary and has been disposed off.	Immediate from date of inspection.

Please complete the following table to demonstrate that this Quality Improvement Plan has been completed by the registered manager and approved by the responsible person / identified responsible person and return to nursing.team@rqia.org.uk
