

Unannounced Medicines Management Inspection Report 4 September 2017

Carryduff Nursing Home

Type of Service: Nursing Home
Address: 19 Church Road, Carryduff, BT8 8DT
Tel No: 028 9081 4862
Inspector: Catherine Glover

www.rqia.org.uk

Assurance, Challenge and Improvement in Health and Social Care

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

1.0 What we look for

2.0 Profile of service

This is a nursing home with 23 beds that provides care for patients with a range of healthcare needs as described in the table in Section 3.0.

3.0 Service details

Organisation/Registered Provider: Carryduff Nursing Home Responsible Individual(s): Mr Edwin Samuel Johnston Mr Gerald William Beattie	Registered Manager: Miss Jessica McGreevy
Person in charge at the time of inspection: Miss Jessica McGreevy	Date manager registered: 18 July 2017
Categories of care: Nursing Homes (NH) I – Old age not falling within any other category PH – Physical disability other than sensory impairment PH(E) - Physical disability other than sensory impairment – over 65 years TI – Terminally ill	Number of registered places: 23

4.0 Inspection summary

An unannounced inspection took place on 4 September 2017 from 10.30 to 13.00.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Nursing Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015.

The inspection assessed progress with any areas for improvement identified during and since the last medicines management inspection and to determine if the home was delivering safe, effective and compassionate care and if the service was well led.

Evidence of good practice was found in relation to medicines administration, records and storage.

No areas requiring improvement were identified.

One patient that we spoke to said that the staff were “second to none”.

The findings of this report will provide the home with the necessary information to assist them to fulfil their responsibilities, enhance practice and patients’ experience.

4.1 Inspection outcome

	Regulations	Standards
Total number of areas for improvement	0	0

This inspection resulted in no areas for improvement being identified. Findings of the inspection were discussed with Miss Jessica McGreevy, Registered Manager, as part of the inspection process and can be found in the main body of the report.

Enforcement action did not result from the findings of this inspection.

4.2 Action/enforcement taken following the most recent care inspection

No further actions were required to be taken following the most recent inspection on 13 January 2017. Enforcement action did not result from the findings of this inspection.

5.0 How we inspect

Prior to the inspection a range of information relevant to the service was reviewed. This included the following records:

- recent inspection reports and returned QIPs
- recent correspondence with the home
- the management of medicine related incidents reported to RQIA since the last medicines management inspection.

A poster informing visitors to the home that an inspection was being conducted was displayed.

During the inspection the inspector met with two patients, one patient's relative, one registered nurse, and the registered manager.

A total of 15 questionnaires were provided for distribution to patients, their representatives and staff for completion and return to RQIA.

A sample of the following records was examined during the inspection:

- personal medication records
- medicine administration records
- medicines disposed of or transferred
- controlled drug record book
- medicine audits
- care plans
- training records
- medicines storage temperatures

Areas for improvements identified at the last medicines management inspection were reviewed and the assessment of compliance recorded as met, partially met, or not met.

The findings of the inspection were provided to the person in charge at the conclusion of the inspection.

6.0 The inspection

6.1 Review of areas for improvement from the most recent inspection dated 13 January 2017

The most recent inspection of the home was an unannounced care inspection. There were no areas for improvement made as a result of the inspection.

6.2 Review of areas for improvement from the last medicines management inspection dated 20 October 2016

Areas for improvement from the last medicines management inspection		
Action required to ensure compliance with The Nursing Homes Regulations (Northern Ireland) 2005		Validation of compliance
Area for improvement 1 Ref: Regulation 13 (4) Stated: First time	The registered provider must ensure that the time of administration of medicines is accurately recorded.	Met
	Action taken as confirmed during the inspection: The time of administration of medicines had been accurately recorded.	
Action required to ensure compliance with the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015		Validation of compliance
Area for improvement 1 Ref: Standard 8 Stated: First time	The registered provider should ensure that the management of distressed reactions is closely monitored to ensure that the reason for and outcome of each administration are recorded on all occasions.	Met
	Action taken as confirmed during the inspection: None of the patients were prescribed medicines for distressed reactions at the time of this inspection. The registered manager provided a sample of the records that would be completed should these medicines be prescribed. She advised that all of the staff knew how to manage these medicines and complete the records. Due to this assurance this area for improvement was assessed as met.	

6.3 Inspection findings

6.4 Is care safe?

Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.

Medicines were managed by staff who have been trained and deemed competent to do so. The impact of training was monitored through team meetings, supervision and annual appraisal. Competency assessments were completed annually. Refresher training in syringe drivers was provided in the last year and medicines management training is planned for November 2017.

Systems were in place to manage the ordering of prescribed medicines to ensure adequate supplies were available and to prevent wastage. The registered manager advised of the procedures to identify and report any potential shortfalls in medicines. Satisfactory arrangements were in place for the acquisition and storage of prescriptions.

There were satisfactory arrangements in place to manage changes to prescribed medicines. Personal medication records were updated by two registered nurses. This safe practice was acknowledged.

In relation to safeguarding, staff advised that they were aware of the regional procedures and who to report any safeguarding concerns to. Training had been completed by all staff.

There were procedures in place to ensure the safe management of medicines during a patient's admission to the home.

Records of the receipt, administration and disposal of controlled drugs subject to record keeping requirements were maintained in a controlled drug record book. Checks were performed on controlled drugs which require safe custody, at the end of each shift. Additional checks were also performed on other controlled drugs which is good practice.

Robust arrangements were observed for the management of high risk medicines e.g. warfarin and insulin. The use of separate administration charts was acknowledged.

Discontinued or expired medicines were disposed of appropriately. Discontinued controlled drugs were denatured and rendered irretrievable prior to disposal.

Medicines were stored safely and securely and in accordance with the manufacturer's instructions. Medicine storage areas were clean, tidy and well organised. There were systems in place to alert staff of the expiry dates of medicines with a limited shelf life, once opened. Medicine refrigerators and oxygen equipment were checked at regular intervals.

Areas of good practice

There were examples of good practice in relation to staff training, competency assessment, the management of medicines on admission and controlled drugs.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.5 Is care effective?

The right care, at the right time in the right place with the best outcome.

The sample of medicines examined had been administered in accordance with the prescriber's instructions. There was evidence that time critical medicines had been administered at the correct time. There were arrangements in place to alert staff of when doses of weekly, monthly or three monthly medicines were due.

The sample of records examined indicated that medicines which were prescribed to manage pain had been administered as prescribed. Staff were aware that ongoing monitoring was necessary to ensure that the pain was well controlled and the patient was comfortable. Staff advised that most of the patients could verbalise any pain, and a pain assessment tool was used as needed. A care plan was maintained.

The management of swallowing difficulty was examined. For those patients prescribed a thickening agent, this was recorded on their personal medication record and included details of the fluid consistency. Each administration was recorded and care plans and speech and language assessment reports were in place.

Staff confirmed that compliance with prescribed medicine regimes was monitored and any omissions or refusals likely to have an adverse effect on the patient's health were reported to the prescriber.

Medicine records were well maintained and facilitated the audit process. Areas of good practice were acknowledged. They included additional records for the application of transdermal patches and the administration of antibiotics.

Practices for the management of medicines were audited throughout the month by the staff and management.

Following discussion with the registered manager and staff, it was evident other healthcare professionals are contacted when required to meet the needs of patients.

Areas of good practice

There were examples of good practice in relation to the standard of record keeping, care planning and the administration of medicines.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.6 Is care compassionate?

Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.

The administration of medicines to patients was completed in a caring manner, patients were given time to take their medicines and medicines were administered as discreetly as possible.

Of the questionnaires that were issued, one was returned from patients, one from relatives and two from staff. The responses indicated that they were very satisfied/satisfied with all aspects of the care in relation to the management of medicines.

One patient commented that “everything is first class” and that the “food is too good and too much”.

We spoke to one relative during the inspection who raised some concerns in relation to care. These were shared with the registered manager and the care inspector for action as required.

Areas of good practice

Staff listened to patients and relatives and took account of their views.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.7 Is the service well led?

Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.

Written policies and procedures for the management of medicines were in place. Management advised that these were in the process of being reviewed. Following discussion with staff it was evident that they were familiar with the policies and procedures.

There were robust arrangements in place for the management of medicine related incidents. Staff confirmed that they knew how to identify and report incidents. In relation to the regional safeguarding procedures, staff confirmed that they were aware that medicine incidents may need to be reported to the safeguarding lead and safeguarding team.

A review of the audit records indicated that largely satisfactory outcomes had been achieved. Where a discrepancy had been identified, there was evidence of the action taken and learning which had resulted in a change of practice.

Following discussion with the registered manager and registered nurses, it was evident that staff were familiar with their roles and responsibilities in relation to medicines management.

Staff confirmed that any concerns in relation to medicines management were raised with management.

Areas of good practice

There were examples of good practice in relation to governance arrangements, the management of medicine incidents and quality improvement. There were clearly defined roles and responsibilities for staff.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

7.0 Quality improvement plan

There were no areas for improvement identified during this inspection, and a QIP is not required or included, as part of this inspection report.

RQIA will phase out the issue of draft reports via paperlite in the near future. Registered providers should ensure that their services are opted in for the receipt of reports via Web Portal. If you require further information, please visit www.rqia.org.uk/webportal or contact the web portal team in RQIA on 028 9051 7500.
