2.0 Introduction

The Regulation and Quality Improvement Authority (RQIA) is empowered under The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003 to inspect supported living type domiciliary care agencies. A minimum of one inspection per year is required.

This is a report of a primary inspection to assess the quality of services being provided. The report details the extent to which the standards measured during the inspection were met.

3.0 Purpose of the Inspection

The purpose of this inspection was to ensure that the service is compliant with relevant regulations, minimum standards and other good practice indicators and to consider whether the service provided to service users was in accordance with their assessed needs and preferences. This was achieved through a process of analysis and evaluation of available evidence.

RQIA not only seeks to ensure that compliance with regulations and standards is met but also aims to use inspection to support providers in improving the quality of services. For this reason, inspection involves in-depth examination of an identified number of aspects of service provision.

The aims of the inspection were to examine the policies, procedures, practices and monitoring arrangements for the provision of domiciliary care, and to determine the provider's compliance with the following:

- The HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003
- The Domiciliary Care Agencies Regulations (Northern Ireland) 2007
- The Department of Health, Social Services and Public Safety's (DHSSPS) Domiciliary Care Agencies Minimum Standards (2011)

Other published standards which guide best practice may also be referenced during the inspection process.

4.0 Methods/Process

Committed to a culture of learning, RQIA has developed an approach which uses self-assessment, a critical tool for learning, as a method for preliminary assessment of achievement of the Minimum Standards.

The inspection process has three key parts; self-assessment, pre-inspection analysis and the visit undertaken by the inspector.

Specific methods/processes used in this inspection include the following:

- Analysis of pre-inspection information
- Discussion with the registered manager
- Examination of records
- Consultation with stakeholders

- File audit
- Evaluation and feedback

Any other information received by RQIA about this registered provider and its service delivery has also been considered by the inspector in preparing for this inspection.

5.0 Consultation Process

During the course of the inspection, the inspector spoke to the following:

Service Users	4
Staff	2
Relatives	2
Other Professionals	0

Questionnaires were provided, prior to the inspection, to staff to find out their views regarding the service. Matters raised from the questionnaires were addressed by the inspector in the course of this inspection.

Issued To	Number issued	Number returned
Staff	8	5

6.0 Inspection Focus

The inspection sought to assess progress with the issues raised during and since the previous inspection and to establish the level of compliance achieved with respect to the following quality themes:

The following three quality themes were assessed at this inspection:

- **Theme 1 - Service users' finances and property are appropriately managed and safeguarded**
- **Theme 2 – Responding to the needs of service users**
- **Theme 3 - Each service user has a written individual service agreement provided by the agency**

Review of Action Plans/Progress to Address Outcomes from the Previous Inspection

The inspector reviewed the Quality Improvement Plan issued following the previous inspection; six recommendations have been assessed as being fully met

The registered provider and the inspector have rated the service's compliance level against each good practice indicator and also against each quality theme.

The table below sets out the definitions that RQIA has used to categorise the service's performance:

Guidance - Compliance Statements		
Compliance Statement	Definition	Resulting Action in Inspection Report
0 - Not applicable		A reason must be clearly stated in the assessment contained within the inspection report.
1 – Unlikely to become compliant		A reason must be clearly stated in the assessment contained within the inspection report.
2 - Not compliant	Compliance could not be demonstrated by the date of the inspection.	In most situations this will result in a requirement or recommendation being made within the inspection report.
3 - Moving towards compliance	Compliance could not be demonstrated by the date of the inspection. However, the service could demonstrate a convincing plan for full compliance by the end of the Inspection year.	In most situations this will result in a requirement or recommendation being made within the inspection report.
4 - Substantially compliant	Arrangements for compliance were demonstrated during the inspection. However, appropriate systems for regular monitoring, review and revision are not yet in place.	In most situations this will result in a recommendation, or in some circumstances a requirement, being made within the inspection report.
5 - Compliant	Arrangements for compliance were demonstrated during the inspection. There are appropriate systems in place for regular monitoring, review and any necessary revisions to be undertaken.	In most situations this will result in an area of good practice being identified and comment being made within the inspection report.

7.0 Profile of Service

Parkview House is a supported living type domiciliary care agency, situated in Castlederg. The agency offers domiciliary care and housing support to service users.

The 'housing with care' tenants occupy individual flats with en suite bathroom facilities, the aim of which is to provide housing with care to older people. The flats are unfurnished as each tenant is encouraged to individualise their flat to their own taste. The scheme is located in a shared building with nursing care but the care is provided by separate staff.

The agency's aim is to provide care and support to service users; this includes helping service users with tasks of everyday living, emotional support and assistance to access community services, with the overall goal of promoting independence and maximising quality of life.

Staff are available to support tenants 24 hours per day and each service user has an identified 'key worker.'

The agency has received assessments from the HSC trust for a small number of service users. A recommendation has been made.

Records viewed had in place care and support plans detailing the care and support provided to the individual service users; service users stated that they are involved in the development of these and that their choices and views are reflected. Staff stated that they record the care and support provided to each service user on a daily basis.
