Announced Care Inspection Report 11 August 2016

Beechview Dental Practice

Type of Service: Independent Hospital (IH) - Dental Treatment

Address: 451 Falls Road, Belfast, BT12 6DD

Tel No: 028 9024 3107

Inspector: Emily Campbell

www.rqia.org.uk

Assurance, Challenge and Improvement in Health and Social Care

1.0 Summary

An announced inspection of Beechview Dental Practice took place on 11 August 2016 from 9:50 to 15:00. This practice was bought over by Portman Healthcare Limited and was registered under this entity with the Regulation and Quality Improvement Authority (RQIA) on 19 October 2015. At this time, the registration of Mr Mark Hamburger as the registered person was approved. Mr Pearse Stinson remained as the registered manager.

The inspection sought to assess progress with any issues raised during and since the pre-registration care inspection and to determine if the dental practice was delivering safe, effective and compassionate care and if the service was well led.

Is care safe?

Observations made, review of documentation and discussion with Mr Pearse Stinson, registered manager, Ms Orla Fisher, practice manager Grosvenor Road Dental Practice and Portman Healthcare representative, Ms Ali Rae, Portman Healthcare compliance manager, and staff demonstrated that further development is needed to ensure that care provided to patients is safe and avoids and prevents harm. Areas reviewed included staffing, recruitment and selection, safeguarding, management of medical emergencies, infection prevention control and decontamination, radiology and the general environment. Two requirements were made in relation to obtaining enhanced AccessNI checks prior to staff commencing work in the practice and reviewing the ventilation in the decontamination room. Five recommendations were made in relation to recruitment and selection checks, further development of the induction programme, the condition of a steriliser, washer disinfectant periodic tests and further development of the decontamination policy.

Is care effective?

Observations made, review of documentation and discussion with Mr Stinson, Ms Fisher and staff demonstrated that systems and processes were in place to ensure that care provided in the establishment was effective. Areas reviewed included clinical records, health promotion, audits and communication. There is a strong focus placed on auditing within the corporate audit programme and each practice is required to complete audits on specific topics every other month. No requirements or recommendations have been made.

Is care compassionate?

Observations made, review of documentation and discussion with Mr Stinson, Ms Fisher and staff demonstrated that arrangements are in place to promote patients' dignity, respect and involvement in decision making. No requirements or recommendations have been made.

Is the service well led?

Information gathered during the inspection evidenced that in general there was effective leadership and governance arrangements in place which creates a culture focused on the needs of patients in order to deliver safe, effective and compassionate care. Areas reviewed included organisational and staff working arrangements, the arrangements for policy and risk assessment reviews, the arrangements for dealing with complaints, incidents and alerts, insurance arrangements and the registered provider's understanding of their role and responsibility in accordance with legislation.

A recommendation was made that formal arrangements should be implemented regarding the registered person review of the quality of services.

This inspection was underpinned by The Independent Health Care Regulations (Northern Ireland) 2005, The Regulation and Improvement Authority (Independent Health Care) (Fees and Frequency of Inspections) (Amendment) Regulations (Northern Ireland) 2011 and the Department of Health, Social Services and Public Safety (DHSSPS) Minimum Standards for Dental Care and Treatment (2011).

While we assess the quality of services provided against regulations and associated DHSSPS care standards, we do not assess the quality of dentistry provided by individual dentists.

1.1 Inspection outcome

	Requirements	Recommendations
Total number of requirements and recommendations made at this inspection	2	6

Details of the Quality Improvement Plan (QIP) within this report were discussed with Mr Pearse Stinson, registered manager, Ms Orla Fisher, practice manager Grosvenor Road Dental Practice and Portman Healthcare representative, and Ms Ali Rae, Portman Healthcare compliance manager, as part of the inspection process. The timescales for completion commence from the date of inspection.

Enforcement action did not result from the findings of this inspection.

1.2 Actions/enforcement taken following the most recent care inspection

Other than those actions detailed in the previous QIP there were no further actions required to be taken following the last inspection.

2.0 Service details

Registered organisation/registered provider: Portman Healthcare Limited Mr Mark Hamburger	Registered manager: Mr Pearse Stinson
Person in charge of the service at the time of inspection: Mr Pearse Stinson	Date manager registered: 07 March 2012
Categories of care: Independent Hospital (IH) – Dental Treatment	Number of registered places: 6

3.0 Methods/processes

Questionnaires were provided to patients and staff prior to the inspection by the practice on behalf of the RQIA. Prior to inspection we analysed the following records: staffing information, complaints declaration and returned completed patient and staff questionnaires.

During the inspection the inspector met with Mr Pearse Stinson, registered manager, Ms Orla Fisher, practice manager Grosvenor Road Dental Practice and Portman Healthcare representative, Ms Ali Rae, Portman Healthcare compliance manager, Ms Siobhan McKenna, practice manager and dental nurse, an associate dentist, two dental nurses and two receptionists. Ms Marguerite Burke, who was recently appointed as the Portman Healthcare operational manager for Northern Ireland, called during the inspection to introduce herself. A tour of the premises was also undertaken. The inspection was facilitated by Ms Fisher.

Records were examined during the inspection in relation to the following areas:

- staffing
- recruitment and selection
- safeguarding
- management of medical emergencies
- infection prevention and control
- radiography
- clinical record recording arrangements
- health promotion
- management and governance arrangements
- maintenance arrangements

4.0 The inspection

4.1 Review of requirements and recommendations from the most recent inspections dated 19 October 2015

The most recent inspections of the establishment were announced pre-registration care and estates inspections which were both undertaken on 19 October 2015. The completed QIPs were returned and approved by the care and estates inspectors.

4.2 Review of requirements and recommendations from the last care inspection dated 19 October 2015

Last care inspection recommendations	Validation of compliance
<p>Recommendation 1</p> <p>Ref: Standard 8</p> <p>Stated: First time</p> <p>It is recommended that the following corporate policies are prioritised for review as discussed within the body of the report and to ensure they reflect local and Northern Ireland arrangements:</p> <ul style="list-style-type: none"> • safeguarding children and vulnerable adults; • Records management – to include details of the retention schedule; • Health and Safety; • Complaints; • Infection prevention and control and decontamination; and • Management of a medical emergency. <p>Action taken as confirmed during the inspection:</p> <p>Review of documentation confirmed that the policies indicated had been reviewed and updated. The following policies needed further development; safeguarding adults at risk of harm, patient complaints procedure, management of a medical emergency and the decontamination aspect of infection prevention and control.</p> <p>A safeguarding adults at risk of harm policy was emailed to RQIA on 17 August 2016 which reflected the new regional guidance Adult Safeguarding Prevention and Protection in Partnership (July 2015). This policy replaced the safeguarding vulnerable adults policy. Minor amendments were suggested in respect of the new policy.</p> <p>Minor amendments were also made to the management of a medical emergency policy and patient complaints procedure which were received by RQIA shortly following the inspection. These had been appropriately revised.</p> <p>The decontamination aspect of infection prevention and control and decontamination policy needs further development to specify that a washer disinfectant must be used within the decontamination process. A recommendation was made in this regard.</p> <p>Ms Rae advised that Portman Healthcare are continuing to review and update policies to reflect local and Northern Ireland arrangements.</p>	<p style="text-align: center;">Met</p>

<p>Recommendation 2</p> <p>Ref: Standard 13.2</p> <p>Stated: First time</p>	<p>It is recommended that clinical waste bins are not over-filled.</p> <hr/> <p>Action taken as confirmed during the inspection:</p> <p>Ms Fisher confirmed that staff had been advised not to overfill clinical waste bins following the previous inspection. Observations of two dental surgeries evidenced that clinical waste bins were not over-filled.</p>	<p style="text-align: center;">Met</p>
<p>Recommendation 3</p> <p>Ref: Standard 12.4</p> <p>Stated: First time</p>	<p>It is recommended that in relation to the management of a medical emergency:</p> <ul style="list-style-type: none"> • adult automated external defibrillator (AED) pads are replaced and included in the emergency equipment checking procedure; • the availability of AED pads suitable for use with children should be reviewed and arrangements included in the appropriate procedure; • as the cold chain has been broken, a revised expiry date of 18 months from the date of receipt of the Glucagon medication should be identified on the medication and the checking record. If the date of receipt of the medication cannot be determined the Glucagon should be replaced; and • if future doses of Glucagon are to be retained in the fridge, robust measures should be implemented to address fridge temperature deviations between the recommended 2 and 8 degrees centigrade. <hr/> <p>Action taken as confirmed during the inspection:</p> <p>Observations made confirmed that the adult AED pads were in date and included in the checking procedure.</p> <p>AED pads suitable for use with children have not been provided, however, staff have been advised, by the Portman Healthcare health and safety manager, that the adult pads provided can be used with children and this is also reflected in the associated written protocol.</p> <p>The Glucagon medication had a revised expiry date recorded on the medicine packaging and emergency drug checklist.</p>	<p style="text-align: center;">Met</p>

Recommendation 4 Ref: Standard 8.3 Stated: First time	It is recommended that: <ul style="list-style-type: none"> • x-ray quality audits are undertaken six monthly and • x-ray justification and clinical evaluation recording audits are undertaken annually. 	Met
	Action taken as confirmed during the inspection: Review of the radiation protection file confirmed that x-ray quality audits had been undertaken and a justification and clinical evaluation recording audit is currently being completed.	

4.3 Is care safe?

Staffing

Six dental surgeries are in operation in this practice. Discussion with staff and a review of completed patient and staff questionnaires demonstrated that there was sufficient numbers of staff in various roles to fulfil the needs of the practice and patients.

Induction programme templates were in place relevant to specific roles and responsibilities. A sample of one evidenced that induction programmes had been completed when new staff joined the practice.

Corporate procedures were in place for appraising staff performance on an annual basis with a six month review. Ms Fisher advised that dental nursing and reception staff have received appraisal and arrangements were being established for this to be undertaken in respect of the practice manager and associate dentists. Dental nurses and receptionists spoken with confirmed that appraisals had taken place and a review of a sample of four appraisal records evidenced this. Staff confirmed that they felt supported and involved in discussions about their personal development.

There was a system in place to ensure that all staff receive appropriate training to fulfil the duties of their role. A corporate training portal facilitates mandatory training. The majority of dental nursing staff have completed a recognised training course in intravenous sedation dental nursing and two dental nurses will be starting this course in September 2016.

A review of records confirmed that a robust corporate system was in place to review the General Dental Council (GDC) registration status and professional Indemnity of all clinical staff.

Recruitment and selection

A review of the submitted staffing information and discussion with Ms Fisher confirmed that one staff member has been recruited since the previous inspection. A review of the personnel file for this staff member demonstrated that not all of the relevant information as outlined in Regulation 19(2), Schedule 2 of The Independent Health Care Regulations (Northern Ireland) 2005 had been sought and retained. The following was noted:

- a criminal conviction declaration had not been completed
- only one written reference had been obtained
- details of the full employment history had not been obtained and just made reference to the most recent experience.

A recommendation was made that a criminal conviction declaration, two written references and full employment history is obtained and retained in personnel files of any staff recruited in the future. The application form did not facilitate the completion of a full employment history. A revised application form was submitted to RQIA on 15 August 2016 addressing this matter.

An enhanced AccessNI check had been undertaken in respect of the new staff member, however, this was not received until after the commencement of employment. It was stressed that enhanced AccessNI checks must be obtained prior to any new staff commencing employment and a requirement was made in this regard.

Safeguarding

Staff spoken with were aware of the types and indicators of abuse and the actions to be taken in the event of a safeguarding issue being identified, including who the nominated safeguarding lead was.

Review of records demonstrated that all staff had received refresher training in safeguarding children and adults as outlined in the Minimum Standards for Dental Care and Treatment 2011. Staff confirmed that safeguarding was included within their induction, however, this was not recorded in induction templates as a specific topic to be covered. A recommendation was made in this regard.

Policies and procedures were in place for the safeguarding and protection of adults and children. As discussed previously, a safeguarding adults at risk of harm policy was emailed to RQIA on 17 August 2016 which reflected the new regional guidance Adult Safeguarding Prevention and Protection in Partnership (July 2015). This policy replaced the safeguarding vulnerable adults policy. Minor amendments were suggested in respect of the new policy. Mr Stinson and Ms Fisher confirmed the new guidance would be shared with staff at the next staff meeting.

Safeguarding policies included the types and indicators of abuse and distinct referral pathways in the event of a safeguarding issue arising with an adult or child. The relevant contact details for onward referral to the local Health and Social Care Trust should a safeguarding issue arise were included.

Management of medical emergencies

A review of medical emergency arrangements evidenced that emergency medicines were provided in keeping with the British National Formulary (BNF), and that emergency equipment as recommended by the Resuscitation Council (UK) guidelines was retained. A robust system was in place to ensure that emergency medicines and equipment do not exceed their expiry date. There was an identified individual with responsibility for checking emergency medicines and equipment.

Review of training records and discussion with staff confirmed that the management of medical emergencies is included in the induction programme and training is updated on an annual basis in keeping with best practice guidance.

Discussion with staff demonstrated that they have a good understanding of the actions to be taken in the event of a medical emergency and the location of medical emergency medicines and equipment.

As discussed previously, minor amendments were made to the policy for the management of medical emergencies. The revised policy which was received by RQIA on 12 August 2016 reflected best practice guidance.

Infection prevention control and decontamination procedures

Clinical and decontamination areas were tidy and uncluttered and work surfaces were intact and easy to clean. Fixtures, fittings, dental chairs and equipment were free from damage, dust and visible dirt. Staff were observed to be adhering to best practice in terms of uniform and hand hygiene policies.

Discussion with staff demonstrated that they had an understanding of infection prevention and control policies and procedures and were aware of their roles and responsibilities. Staff confirmed that they have received training in infection prevention and control and decontamination in keeping with best practice. Training records were available for inspection.

There was a nominated lead who had responsibility for infection control and decontamination in the practice.

A decontamination room separate from patient treatment areas and dedicated to the decontamination process was available in keeping with Health Technical Memorandum (HTM) 01-05 Decontamination in primary care dental practices. The door of the decontamination room had been wedged open whilst the decontamination process was in progress. Staff advised that they were aware the door should be closed, however, the room was too hot for them to work in with the door closed. This matter was raised during the previous inspection with a suggestion being made that the effectiveness of the ventilation is reviewed in the interest of staff comfort as the room was hot to work in.

As no further action has been taken, a requirement was made during this inspection that the ventilation in the decontamination room is reviewed and measures implemented to provide a reasonable working room temperature, to ensure that the decontamination room door is closed when decontamination is in progress in keeping with HTM 01-05 and in the interest of staff health and safety.

Appropriate equipment, including two washer disinfectors and three steam sterilisers have been provided to meet the practice requirements. The exterior of one steriliser was observed to be rusted and the water reservoir lid had buckled. A recommendation was made that this should be made good or replaced.

A review of documentation evidenced that equipment used in the decontamination process has been appropriately validated. A review of equipment logbooks evidenced that periodic tests are undertaken and recorded in keeping with HTM 01-05, with the exception of the weekly protein residue test for the washer disinfectors, which is not consistently recorded. A recommendation was made in this regard.

The practice has recently obtained a NSK iCare Handpiece Cleaner. The inspector was informed this machine is specifically designed to clean and disinfect dental handpieces omitting the need to process them through the washer disinfectant. Following processing in the iCare handpieces will be sterilised. The inspector was advised that the machine will not be made operational until staff training has been provided in its use and a logbook established to record the periodic tests as outlined in the manufacturer's instructions.

Ms Fisher and the practice manager confirmed that the practice continues to audit compliance with HTM 01-05 using the Infection Prevention Society (IPS) audit tool. The most recent IPS audit was not dated and staff were advised that dates should be recorded on all future audits.

A range of policies and procedures were in place in relation to decontamination and infection prevention and control. As discussed previously, the decontamination aspect of infection prevention and control and decontamination policy needs further development to specify that a washer disinfectant must be used within the decontamination process and a recommendation was made in this regard.

Radiography

The practice has six surgeries, each of which has an intra-oral x-ray machine. In addition there is an orthopan tomogram machine (OPG) and scanner, which is located in a separate room.

A dedicated radiation protection file containing the relevant local rules, employer's procedures and other additional information was retained. A review of the file confirmed that staff have been authorised by the radiation protection supervisor (RPS) for their relevant duties and have received local training in relation to these duties. It was evidenced that all measures are taken to optimise dose exposure. This included the use of rectangular collimation, x-ray audits and digital x-ray processing.

A copy of the local rules was on display near each x-ray machine and appropriate staff had signed to confirm that they had read and understood these. Staff spoken with demonstrated sound knowledge of the local rules and associated practice.

The radiation protection advisor (RPA) completes a quality assurance check every three years. Review of the report of the most recent visit by the RPA demonstrated that the recommendations made have been addressed. The RPA quality assurance check is not due until 2017, however, a new RPA is being appointed and arrangements have been made for them to complete a quality assurance check on 15 August 2016. Mr Stinson and Ms Fisher confirmed that any recommendations made by the RPA will be actioned.

The x-ray equipment has been serviced and maintained in accordance with manufacturer's instructions.

Quality assurance systems and processes were in place to ensure that all matters relating to x-rays reflect legislative and best practice guidance.

Environment

The environment was maintained to a good standard of maintenance and décor. Cleaning schedules were in place for all areas and a colour coded cleaning system was in place.

Arrangements are in place for maintaining the environment. These included health and safety risk assessment review, relative anaesthesia gas equipment servicing, pressure vessels inspection, alarm servicing, portable appliance testing and control of substances hazardous to health (COSHH) risk assessments.

A legionella risk assessment was last undertaken in September 2015 and water temperature is monitored and recorded as recommended.

A fire risk assessment had been undertaken, which was reviewed by the estates inspector during the pre-registration inspection in October 2015.

Patient and staff views

Ten patients submitted questionnaire responses to RQIA. All indicated that they felt safe and protected from harm. Comments provided included the following:

- "I feel very safe in the care of dental staff. They explain procedures very clearly. They are approachable and accommodating. I feel confident prior to undergoing dental work."
- "First class practice. Great pastoral care."
- "The staff are very attentive and I appreciate the standard of care that I have received throughout my extensive treatments."

Seven staff submitted questionnaire responses; all indicated that they felt that patients are safe and protected from harm. Staff spoken with during the inspection concurred with this. Comments provided included the following:

- "Patients safety is our priority."
- "The practice is free from hazards and a safe environment to work in."

Areas for improvement

Enhanced AccessNI checks must be obtained prior to any new staff commencing employment.

Recruitment and selection procedures should be further developed to ensure that a criminal conviction declaration, two written references and full employment history are obtained in respect of any new staff.

Safeguarding children and adults at risk of harm should be included in induction templates as a specific topic to be covered.

The ventilation in the decontamination room should be reviewed and measures implemented to provide a reasonable working room temperature.

The identified steriliser which has a rusted exterior and buckled water reservoir lid should be made good or replaced.

The weekly protein residue test for the washer disinfectors should be consistently undertaken and recorded in the associated logbooks.

The decontamination aspect of infection prevention and control and decontamination policy should be further developed to specify that a washer disinfectant must be used within the decontamination process.

Number of requirements	2	Number of recommendations:	5
-------------------------------	----------	-----------------------------------	----------

4.4 Is care effective?

Clinical records

Staff spoken with confirmed that clinical records are updated contemporaneously during each patient's treatment session in accordance with best practice.

Routine dental examinations include a review of medical history, a check for gum disease and oral cancers and that treatment plans are developed in consultation with patients. It was confirmed that patients are informed about the cost of treatments, choices and options. Written treatment plans are provided to patients.

Both manual and computerised records are maintained. Electronic records have different levels of access afforded to staff dependent on their role and responsibilities. Appropriate systems and processes were in place for the management of records and maintaining patient confidentiality.

The practice is registered with the Information Commissioner's Office (ICO) and a Freedom of Information Publication Scheme has been established.

Health promotion

Mr Stinson and staff confirmed that oral health is actively promoted on an individual level with patients during their consultations. Ms Rae advised that the Portman Healthcare group have plans for the future development of oral health and hygiene in the near future, which will incorporate an outreach programme.

Audits

There were arrangements in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals which included:

- x-ray quality grading
- x-ray justification and clinical evaluation recording
- IPS HTM 01-05 compliance
- clinical records
- medical histories
- periodontal monitoring
- review of complaints/accidents/incidents

There is a strong focus placed on auditing within the corporate audit programme and each practice is required to complete audits on specific topics every other month.

Communication

Mr Stinson and staff confirmed that arrangements are in place for onward referral in respect of specialist treatments.

Staff meetings are held on a monthly basis to discuss clinical and practice management issues. Review of documentation demonstrated that minutes of staff meetings are retained. Staff spoken with confirmed that meetings also facilitated informal and formal in house training sessions. A weekly newsletter is issued by the Portman Healthcare group to all staff which contains general information about what is going on in the group.

Staff confirmed that there are good working relationships and there is an open and transparent culture within the practice.

Patient and staff views

All patients who submitted questionnaire responses indicated that they get the right care, at the right time and with the best outcome for them. Comments provided included the following:

- "Care planning took place prior to dental treatment. Information and advice were given very clearly prior to treatment. My questions were answered clearly and my concerns were alleviated and assurance given."
- "Right from the text message to me of my appointment, welcoming reception and nursing staff and the high standards of dental care, the practice is perfect."
- "Care plan always discussed with Pearse Stinson beforehand and indeed that might be required over the next couple of years."
- "Mr Stinson is excellent and takes time to explain every detail and options to me."

All submitted staff questionnaire responses indicated that they felt that patients get the right care, at the right time and with the best outcome for them. Staff spoken with during the inspection concurred with this. Comments provided included the following:

- "We treat all our patients with dignity and respect at all times and we take time to listen to them and involve them in making decisions about any treatment needed."
- "Audits continually."

Areas for improvement

No areas for improvement were identified during the inspection.

Number of requirements	0	Number of recommendations:	0
-------------------------------	----------	-----------------------------------	----------

4.5 Is care compassionate?

Dignity, respect and involvement in decision making

Staff spoken with demonstrated a good understanding of the core values of privacy, dignity, respect and patient choice. Staff confirmed that if they needed to speak privately with a patient that arrangements are provided to ensure the patient's privacy is respected. Staff were observed to converse with patients and conduct telephone enquiries in a professional and confidential manner.

The importance of emotional support needed when delivering care to patients who were very nervous or fearful of dental treatment was clear. Patients with a physical disability or who require wheelchair access are accommodated in the ground floor surgery, and the toilet facility is suitable for disabled access. An interpreter service is available for patients who require this assistance. Staff advised that they endeavour to accommodate any specific individual needs a patient may have.

It was confirmed that treatment options, including the risks and benefits, were discussed with each patient. This ensured patients understood what treatment is available to them and can make an informed choice. As discussed previously, written treatment plans including estimated costs are provided to patients. Staff demonstrated how consent would be obtained.

The practice undertakes patient satisfaction surveys on a monthly basis. Review of the most recent patient satisfaction report demonstrated that the practice pro-actively seeks the views of patients about the quality of treatment and other services provided. Patient feedback whether constructive or critical, is used by the practice to improve, as appropriate.

Patient and staff views

All patients who submitted questionnaire responses indicated that they are treated with dignity and respect and are involved in decision making affecting their care. Comments provided included the following:

- “Separate room available for giving advice and information. Toilet next to room is very welcome. All staff, receptionists, dental nurses and dentist have related to me with respect and they have ensured my dignity. I have been signposted to services such as dental hygienist.”
- “As a dental phobic – Beechview has helped me greatly and been very understanding of my fears.”
- “I am asked how I feel, am involved in my treatment plan with my opinions listened to and respected.”
- “Care plan 1 to 1 basis. Dental hygienist also involved in last discussion. Nursing staff/dental assistants excellent.”
- “I have been treated very well and also with great kindness and my privacy has been totally respected.”

All submitted staff questionnaire responses indicated that they felt that patients are treated with dignity and respect and are involved in decision making affecting their care. Staff spoken with during the inspection concurred with this. Comments provided included the following:

- “Patients are our priority and we endeavour to treat patients as we would expect to be treated ourselves.”
- “Patients are treated with respect and are always fully aware of what treatment needs carried out and different options. We also get patients to fill out surveys on a day to day basis.”

Areas for improvement

No areas for improvement were identified during the inspection.

Number of requirements	0	Number of recommendations:	0
-------------------------------	----------	-----------------------------------	----------

4.6 Is the service well led?

Management and governance arrangements

There was a clear organisational structure within the practice and staff were able to describe their roles and responsibilities and were aware of who to speak to if they had a concern. Staff confirmed that there were good working relationships and that management were responsive to any suggestions or concerns raised.

There was a nominated Individual with overall responsibility for the day to day management of the practice. Mr Stinson advised that Mr Mark Hamburger, registered person, has visited the practice on a number of occasions since Portman Healthcare took over the practice. The Portman Healthcare group have been developing their support mechanisms in Northern Ireland since purchasing a number of practices. The head of integration visits the practice on a monthly basis and the recently appointed operations manager has visited on a frequent basis. Ms Rae has recently been appointed as the compliance facilitator and, as her role develops, will be undertaking two announced and two unannounced visits to the practice each year. Corporate manager meetings are held once a month.

A recommendation was made that formal arrangements are established for the registered person or his representative to monitor the quality of services and undertake an unannounced visit to the premises at least every six months in accordance with legislation. Following the unannounced visit to the practice the registered person should generate a report detailing the main findings of their quality monitoring visit, which should include the matters identified in Regulation 26 (4) of The Independent Health Care Regulations (Northern Ireland) 2005. An action plan to address any issues identified should be generated. The report should be shared with the registered manager and be available for inspection.

Policies and procedures were available for staff reference via the electronic 'Box' online system. Hard copies of policies are also available of frequently used policies. Observations made confirmed that policies and procedures were indexed and dated. Ms Rae advised that a system is in place for policies to be reviewed on an annual basis. A monthly update is issued to all staff providing information of policy development and review. Staff spoken with were aware of the policies and how to access them. Ms Rae advised that Portman Healthcare are continuing to review and update policies to reflect local and Northern Ireland arrangements.

Arrangements were in place to review risk assessments.

A copy of the complaints procedure was displayed in the practice. Staff demonstrated a good awareness of complaints management. A complaints questionnaire was forwarded by RQIA to the practice for completion. The returned questionnaire indicated that no complaints have been received for the period 1 April 2015 to 31 March 2016. Discussion with Ms Fisher and Ms Rae confirmed that a robust corporate system has been established for complaints management. Minor amendments were made to the patient complaints procedure which was received by RQIA on 15 August 2016. This had been appropriately revised.

A system was in place to ensure that notifiable events were investigated and reported to RQIA or other relevant bodies as appropriate. A system was also in place to ensure that urgent communications, safety alerts and notices are reviewed and where appropriate, made available to key staff in a timely manner.

Ms Fisher and Ms Rae confirmed that arrangements were in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals. If required an action plan is developed and embedded into practice to address any shortfalls identified during the audit process. However, issues were identified during this inspection in relation to staff recruitment and selection and infection prevention and control and decontamination, which have not been identified within the practice's own monitoring systems. Therefore more attention needs to be provided to ensure the monitoring systems are meaningful.

A whistleblowing/raising concerns policy was available. Discussion with staff confirmed that they were aware of who to contact if they had a concern.

The registered provider/manager demonstrated a clear understanding of their role and responsibility in accordance with legislation. Information requested by RQIA has been submitted within specified timeframes. The statement of purpose was up to date and it was confirmed that the patient guide is kept under review, revised and updated when necessary and available on request.

The RQIA certificate of registration was up to date and displayed appropriately.

Observation of insurance documentation confirmed that current insurance policies were in place.

Patient and staff views

All patients who submitted questionnaire responses indicated that they felt that the service is well managed. Comments provided included the following:

- "I feel that I have received an excellent service since I first attended in July 2015. Staff have answered my concerns and queries in a knowledgeable manner. Staff present as professional at all times. Information relating to my treatment has been passed on promptly and clearly."
- "I have been a patient of several dental practices in the past and was recommended Beechview by a friend. Their service is excellent in all areas. I rate them very highly."
- "I feel that the practice is innovative and modern in the services offered showing a modern and inclusive management."
- "Difficult to get an appointment to suit my working hours however I have always been seen in an emergency. An evening or Saturday morning surgery would improve upon a good service already provided."
- "At every stage staff are 1st class from reception staff through to dentists."
- "This is a very well run practice and the staff are all very well presented and thoughtful too."
- "I have never had any complaint or been dissatisfied in all the years I have been here."

All submitted staff questionnaire responses indicated that they felt that the service is well led. Staff spoken with during the inspection concurred with this. The following comment was provided:

- "I am fully aware of our complaints procedure. I feel I can approach my line manager with any problems that I may have."

Areas for improvement

Formal arrangements should be established for the registered person or his representative to monitor the quality of services and undertake an unannounced visit to the premises at least every six months in accordance with legislation. Following the unannounced visit to the practice a report of the findings should be generated and made available for inspection.

Number of requirements	0	Number of recommendations:	1
-------------------------------	----------	-----------------------------------	----------

5.0 Quality improvement plan

Any issues identified during this inspection are detailed in the QIP. Details of the QIP were discussed with Mr Pearse Stinson, registered manager, Ms Orla Fisher, practice manager Grosvenor Road Dental Practice and Portman Healthcare representative, and Ms Ali Rae, Portman Healthcare compliance manager, as part of the inspection process. The timescales commence from the date of inspection.

The registered provider/manager should note that failure to comply with regulations may lead to further enforcement action including possible prosecution for offences. It is the responsibility of the registered provider to ensure that all requirements and recommendations contained within the QIP are addressed within the specified timescales.

Matters to be addressed as a result of this inspection are set in the context of the current registration of the dental practice. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises the RQIA would apply standards current at the time of that application.

5.1 Statutory requirements

This section outlines the actions which must be taken so that the registered provider meets legislative requirements based on The Independent Health Care Regulations (Northern Ireland) 2005.

5.2 Recommendations

This section outlines the recommended actions based on research, recognised sources and DHSSPS Minimum Standards for Dental Care and Treatment (2011). They promote current good practice and if adopted by the registered provider may enhance service, quality and delivery.

5.3 Actions taken by the Registered Provider

The QIP should be completed and detail the actions taken to meet the legislative requirements stated. The registered provider should confirm that these actions have been completed and return completed QIP to RQIA's office for assessment by the inspector.

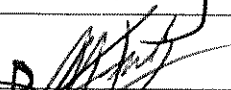

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the registered provider from their responsibility for maintaining compliance with the regulations and standards. It is expected that the requirements and recommendations outlined in this report will provide the registered provider with the necessary information to assist them to fulfil their responsibilities and enhance practice within the service.

Quality Improvement Plan

Statutory requirements	
<p>Requirement 1</p> <p>Ref: Regulation 19 (2) Schedule 2</p> <p>Stated: First time</p> <p>To be completed by: 11 August 2016</p>	<p>The registered provider must ensure that enhanced AccessNI checks are obtained prior to any new staff commencing employment.</p> <p>Response by registered provider detailing the actions taken: AS DISCUSSED DURING THE INSPECTION THIS WAS AN OVERSIGHT WHICH WILL NOT HAPPEN AGAIN.</p>
