

Announced Care Inspection Report 13 October 2017

Bishop Street Dentalcare

Type of Service: Independent Hospital (IH) – Dental Treatment

Address: 21 Bishop Street, Derry, BT48 6PR

Tel No: 028 7126 2402

Inspector: Mr Stephen O'Connor

www.rqia.org.uk

Assurance, Challenge and Improvement in Health and Social Care

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

1.0 What we look for

2.0 Profile of service

This is a registered dental practice with four registered places.

3.0 Service details

Organisation/Registered Person: Mr Gerard Cleary	Registered Manager: Mr Gerard Cleary
Person in charge at the time of inspection: Mr Gerard Cleary	Date manager registered: 23 February 2012
Categories of care: Independent Hospital (IH) – Dental Treatment	Number of registered places: 4

4.0 Inspection summary

An announced inspection took place on 13 October 2017 from 09:50 to 12:05.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Independent Health Care Regulations (Northern Ireland) 2005, The Regulation and Improvement Authority (Independent Health Care) (Fees and Frequency of Inspections) (Amendment) Regulations (Northern Ireland) 2011 and the Department of Health, Social Services and Public Safety (DHSSPS) Minimum Standards for Dental Care and Treatment (2011).

The inspection assessed progress with any areas for improvement identified since the last care inspection and to determine if the practice was delivering safe, effective and compassionate care and if the service was well led.

Examples of good practice were evidenced in all four domains. These related to patient safety in respect of staff training and development, recruitment, safeguarding, the management of medical emergencies, infection prevention and control, radiology and the environment. Other examples included health promotion, engagement to enhance the patients' experience and governance arrangements.

No areas of improvement were identified during the inspection.

All of the patients who submitted questionnaire responses indicated that they were very satisfied with the care and services provided.

The findings of this report will provide the practice with the necessary information to assist them to fulfil their responsibilities, enhance practice and patients experience.

While we assess the quality of services provided against regulations and associated DHSSPS care standards, we do not assess the quality of dentistry provided by individual dentists.

4.1 Inspection outcome

	Regulations	Standards
Total number of areas for improvement	0	0

This inspection resulted in no areas for improvement being identified. Findings of the inspection were discussed with Mr Gerard Cleary, registered person, as part of the inspection process and can be found in the main body of the report.

Enforcement action did not result from the findings of this inspection.

4.2 Action/enforcement taken following the most recent care inspection dated 26 January 2017

No further actions were required to be taken following the most recent inspection on 26 January 2017.

5.0 How we inspect

Prior to the inspection a range of information relevant to the practice was reviewed. This included the following records:

- notifiable events since the previous care inspection
- the registration status of the establishment
- written and verbal communication received since the previous care inspection
- the previous care inspection report
- submitted staffing information
- submitted complaints declaration

Questionnaires were provided to patients and staff prior to the inspection by the practice on behalf of RQIA. Returned completed patient and staff questionnaires were also analysed prior to the inspection.

A poster informing patients that an inspection was being conducted was displayed.

During the inspection the inspector met with Mr Gerard Cleary, registered person, the practice manager, the lead dental nurse and a dental nurse. A tour of some areas of the premises was also undertaken.

A sample of records was examined during the inspection in relation to the following areas:

- staffing
- recruitment and selection
- safeguarding
- management of medical emergencies
- infection prevention and control and decontamination
- radiography
- clinical record recording arrangements
- health promotion
- management and governance arrangements
- maintenance arrangements

The findings of the inspection were provided to the person in charge at the conclusion of the inspection.

6.0 The inspection

6.1 Review of areas for improvement from the most recent inspection dated 26 January 2017

The most recent inspection of the practice was an announced care inspection.

6.2 Review of areas for improvement from the last care inspection dated 26 January 2017

There were no areas for improvement made as a result of the last care inspection.

6.3 Inspection findings

6.4 Is care safe?

Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.

Staffing

Four dental surgeries are in operation in this practice. Discussion with Mr Cleary and staff and a review of completed patient and staff questionnaires demonstrated that there was sufficient numbers of staff in various roles to fulfil the needs of the practice and patients.

No new staff have been recruited since the previous care inspection, however, induction programme templates were in place relevant to specific roles within the practice.

Procedures were in place for appraising staff performance and staff confirmed that appraisals had taken place. Staff confirmed that they felt supported and involved in discussions about their personal development. There was a system in place to ensure that all staff receive appropriate training to fulfil the duties of their role.

A review of records confirmed that a robust system was in place to review the General Dental Council (GDC) registration status and professional indemnity of all clinical staff.

Recruitment and selection

A review of the submitted staffing information and discussion with Mr Cleary confirmed that no new staff have commenced work in the practice since the previous inspection. It was

confirmed that, should staff be recruited in the future robust systems and processes have been developed to ensure that all recruitment documentation as outlined in Schedule 2 of The Independent Health Care Regulations (Northern Ireland) 2005 would be sought and retained for inspection. It was confirmed that the practice has recently recruited a new receptionist/dental nurse who has yet to commence work in the practice as they are awaiting the AccessNI enhanced disclosure check to be issued and reviewed.

Mr Cleary confirmed that there was a recruitment policy and procedure available.

Safeguarding

Staff were aware of the types and indicators of abuse and the actions to be taken in the event of a safeguarding issue being identified, including who the nominated safeguarding lead was.

Review of records demonstrated that all staff had received training in safeguarding children and adults as outlined in the Minimum Standards for Dental Care and Treatment 2011. It was confirmed that the Northern Ireland Medical and Dental Training Agency (NIMDTA) have been scheduled to provide Level 2 Safeguarding Adults training in the practice on 8 December 2017.

One overarching policy was in place for the safeguarding and protection of adults and children at risk of harm. The policy included the types and indicators of abuse and distinct referral pathways in the event of a safeguarding issue arising with an adult or child. The relevant contact details for onward referral to the local Health and Social Care Trust should a safeguarding issue arise were included.

It was confirmed that copies of the regional policy entitled 'Co-operating to Safeguard Children and Young People in Northern Ireland' (March 2016) and the regional guidance document entitled 'Adult Safeguarding Prevention and Protection in Partnership' (July 2015) were both available for staff reference.

Management of medical emergencies

A review of medical emergency arrangements evidenced that emergency medicines were provided in keeping with the British National Formulary (BNF), and that emergency equipment as recommended by the Resuscitation Council (UK) guidelines was retained. A robust system was in place to ensure that emergency medicines and equipment do not exceed their expiry date. There was an identified individual with responsibility for checking emergency medicines and equipment.

Review of training records and discussion with staff confirmed that the management of medical emergencies is included in the induction programme and training is updated on an annual basis in keeping with best practice guidance. The most recent occasion staff completed medical emergency refresher training was during January 2017.

Discussion with staff demonstrated that they have a good understanding of the actions to be taken in the event of a medical emergency and the location of medical emergency medicines and equipment.

There was a policy for the management of medical emergencies and protocols outlining the local procedure for dealing with the various medical emergencies were available for staff reference.

Infection prevention control and decontamination procedures

Clinical and decontamination areas were tidy and uncluttered and work surfaces were intact and easy to clean. Fixtures, fittings, dental chairs and equipment were free from damage, dust and visible dirt. Staff were observed to be adhering to best practice in terms of the uniform and hand hygiene policies.

Discussion with staff demonstrated that they had an understanding of infection prevention and control policies and procedures and were aware of their roles and responsibilities. Staff confirmed that they have received training in infection prevention and control and decontamination in keeping with best practice.

There was a nominated lead with responsibility for infection control and decontamination.

A decontamination room separate from patient treatment areas and dedicated to the decontamination process was available. Appropriate equipment, including a washer disinfector, a DAC Universal and two steam sterilisers have been provided to meet the practice requirements. A review of documentation evidenced that equipment used in the decontamination process has been appropriately validated. A review of equipment logbooks evidenced that periodic tests are undertaken and recorded in keeping with Health Technical Memorandum (HTM) 01-05 Decontamination in primary care dental practices.

It was confirmed that the practice continues to audit compliance with HTM 01-05 using the Infection Prevention Society (IPS) audit tool. The most recent IPS audit was completed during May 2017.

A range of policies and procedures were in place in relation to decontamination and infection prevention and control.

Radiography

The practice has four surgeries, each of which has an intra-oral x-ray machine. In addition there is an orthopan tomogram machine (OPG), which is located in a separate room. Mr Cleary confirmed that the OPG has been decommissioned.

A dedicated radiation protection file containing the relevant local rules, employer's procedures and other additional information was retained. A review of the file confirmed that staff have been authorised by the radiation protection supervisor (RPS) for their relevant duties and have received local training in relation to these duties. It was evidenced that all measures are taken to optimise dose exposure. This included the use of rectangular collimation, x-ray audits and digital x-ray processing.

A copy of the local rules was on display near each x-ray machine and appropriate staff had signed to confirm that they had read and understood these. Staff spoken with demonstrated sound knowledge of the local rules and associated practice.

The radiation protection advisor (RPA) completes a quality assurance check every three years. Review of the report of the most recent visit by the RPA dated March 2017 demonstrated that the recommendations made have been addressed.

The x-ray equipment has been serviced and maintained in accordance with manufacturer's instructions during October 2017.

Quality assurance systems and processes were in place to ensure that all matters relating to x-rays reflect legislative and best practice guidance.

Environment

The environment was maintained to a good standard of maintenance and décor. Mr Cleary confirmed that since the previous inspection new daylight LED lights have been fitted in the dental surgeries.

Detailed cleaning schedules were in place for all areas which were signed on completion. A colour coded cleaning system was in place.

Arrangements are in place for maintaining the environment to include the routine servicing and maintenance of the oil fired central heating burner, intruder alarm, fire detection system and firefighting equipment. Arrangements are also in place to ensure that fixed electrical wiring installations are inspected and portable appliance testing (PAT) is undertaken in respect of electrical equipment.

It was confirmed that the fire risk assessment was completed by an external organisation and this is reviewed in house on an annual basis. Fire drills and fire safety awareness training are undertaken annually. Routine checks are undertaken in respect of the fire detection system. Staff demonstrated that they were aware of the action to take in the event of a fire.

It was confirmed that the legionella risk assessment had been completed in house and arrangements are in place to review this on an annual basis. Water temperatures are monitored and recorded.

Review of records confirmed that the pressure vessels in the practice have been inspected in keeping with the written scheme of examination during September 2017.

Mr Cleary confirmed that the practice has appointed a Health and Safety consultant to provide advice and support in regards to all health and safety matters. The consultant visits the practice annually to complete a health and safety risk assessment. The consultant also makes contact with the practice routinely to remind them when identified equipment is due to be serviced and when risk assessments are due to be reviewed.

It was confirmed that robust arrangements are in place for the management of prescription pads/forms and that written security policies are in place to reduce the risk of prescription theft and misuse.

Patient and staff views

Seven patients submitted questionnaire responses to RQIA. All seven patients indicated that they felt safe and protected from harm and were very satisfied with this aspect of care. The following comment was included in a submitted questionnaire response:

- “Clean and safe environment with helpful staff.”

Eight staff submitted questionnaire responses. All indicated that they felt that patients are safe and protected from harm. Seven staff indicated they were very satisfied with this aspect of care and one indicated that they were satisfied. Staff spoken with during the inspection concurred with this. The following comment was included in a submitted questionnaire response:

- “One level practice, no step at front door, no steps or stairs on the premises.”

Areas of good practice

There were examples of good practice found in relation to staff recruitment, induction, training, appraisal, safeguarding, management of medical emergencies, infection prevention control and decontamination procedures, radiology and the environment.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.5 Is care effective?

The right care, at the right time in the right place with the best outcome.

Clinical records

Staff confirmed that clinical records are updated contemporaneously during each patient’s treatment session in accordance with best practice.

Mr Cleary confirmed that routine dental examinations include a review of medical history, a check for gum disease and oral cancers and that treatment plans are developed in consultation with patients. It was confirmed that patients are informed about the cost of treatments, choices and options.

Both manual and computerised records are maintained. Electronic records have different levels of access afforded to staff dependent on their role and responsibilities. Appropriate systems and processes were in place for the management of records and maintaining patient confidentiality.

Policies were available in relation to records management, data protection and confidentiality and consent. Mr Cleary confirmed that the records management policy includes the

arrangements in regards to the creation, storage, recording, retention and disposal of records and data protection.

The practice is registered with the Information Commissioner's Office (ICO) and a Freedom of Information Publication Scheme has been established.

Health promotion

The practice has a strategy for the promotion of oral health and hygiene. It was confirmed that oral health is actively promoted on an individual level with patients during their consultations and that hygienist services are available in the practice. A range of resources to include information leaflets, models and an electronic software package are available for use during discussion with patients. One staff member in the practice is a qualified oral health educator. Mr Cleary confirmed that he has facilitated oral health awareness sessions in local community groups. A range of products are also available for purchase and samples of products are freely distributed to patients.

The practice Facebook page and website promotes oral health and hygiene through the use of educational videos. The practice also participates in national campaigns such as National Smile Month.

Audits

There were arrangements in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals which included:

- x-ray quality grading
- x-ray justification and clinical evaluation recording
- IPS HTM 01-05 compliance
- clinical waste management
- clinical records
- review of complaints/accidents/incidents
- access
- prescription security

Communication

Mr Cleary confirmed that arrangements are in place for onward referral in respect of specialist treatments. A policy and procedure and template referral letters have been established.

Staff meetings are held on a quarterly basis to discuss clinical and practice management issues. Review of documentation demonstrated that minutes of staff meetings are retained. In addition to the practice staff meetings the different disciplines of staff (dentists, nurses, and reception staff) meet quarterly. Staff spoken with confirmed that meetings also facilitated informal and formal in house training sessions.

Staff confirmed that there are good working relationships and there is an open and transparent culture within the practice.

Patient and staff views

All seven patients who submitted questionnaire responses indicated that they get the right care, at the right time and with the best outcome for them. All seven patients indicated they were very satisfied with this aspect of care. The following comment was included in a submitted questionnaire response:

- “I have been coming to this practice for over 20 years and service is always excellent.”

All eight submitted staff questionnaire responses indicated that they felt that patients get the right care, at the right time and with the best outcome for them. Seven staff indicated they were very satisfied with this aspect of care and one indicated that they were satisfied. Staff spoken with during the inspection concurred with this. The following comment was included in a submitted questionnaire response:

- “Automatic recall system and text reminders for appointments both paper and computer notes recorded.”

Areas of good practice

There were examples of good practice found in relation to the management of clinical records, the range and quality of audits, health promotion strategies and ensuring effective communication between patients and staff.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.6 Is care compassionate?

Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.

Dignity, respect and involvement in decision making

Staff demonstrated a good understanding of the core values of privacy, dignity, respect and patient choice. Staff confirmed that if they needed to speak privately with a patient that arrangements are provided to ensure the patient's privacy is respected. Staff were observed to converse with patients and conduct telephone enquiries in a professional and confidential manner.

The importance of emotional support needed when delivering care to patients who were very nervous or fearful of dental treatment was clear.

It was confirmed that treatment options, including the risks and benefits, were discussed with each patient. This ensured patients understood what treatment is available to them and can make an informed choice. Staff demonstrated how consent would be obtained.

The practice undertakes patient satisfaction surveys on an annual basis. Review of the most recent patient satisfaction report demonstrated that the practice pro-actively seeks the views of patients about the quality of treatment and other services provided. Patient feedback whether constructive or critical, is used by the practice to improve, as appropriate.

Patient and staff views

All seven patients who submitted questionnaire responses indicated that they are treated with dignity and respect and are involved in decision making affecting their care. All seven patients indicated they were very satisfied with this aspect of care. Comments provided included the following:

- “All staff are very respectful and courteous.”
- “Staff are most efficient, helpful and always obliging.”

All eight submitted staff questionnaire responses indicated that they felt that patients are treated with dignity and respect and are involved in decision making affecting their care. Seven staff indicated they were very satisfied with this aspect of care and one indicated that they were satisfied. Staff spoken with during the inspection concurred with this. The following comment was included in a submitted questionnaire response:

- “Space is provided and time for patients filling out medical history. We have a patient comment box. Suggestions are discussed at meetings.”

Areas of good practice

There were examples of good practice found in relation to maintaining patient confidentiality ensuring the core values of privacy and dignity were upheld and providing the relevant information to allow patients to make informed choices.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.7 Is the service well led?

Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.

Management and governance arrangements

There was a clear organisational structure within the practice and staff were able to describe their roles and responsibilities and were aware of who to speak to if they had a concern. Staff confirmed that there were good working relationships and that management were responsive to any suggestions or concerns raised. Mr Cleary is the nominated individual with overall responsibility for the day to day management of the practice. A lead dentist and the practice manager support Mr Cleary.

Policies and procedures were available for staff reference. Observations made confirmed that policies and procedures were indexed, dated and systematically reviewed on an annual basis. Staff spoken with were aware of the policies and how to access them.

Arrangements were in place to review risk assessments.

A copy of the complaints procedure was available in the practice. Staff demonstrated a good awareness of complaints management. A complaints questionnaire was forwarded by RQIA to the practice for completion. The evidence provided in the returned questionnaire, discussion with the practice manager and review of documentation evidenced that complaints have been managed in accordance with best practice.

A system was in place to ensure that notifiable events were investigated and reported to RQIA or other relevant bodies as appropriate. A system was also in place to ensure that urgent communications, safety alerts and notices are reviewed and where appropriate, made available to key staff in a timely manner.

Mr Cleary confirmed that arrangements were in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals. If required an action plan is developed and embedded into practice to address any shortfalls identified during the audit process.

A whistleblowing/raising concerns policy was available. Discussion with staff confirmed that they were aware of who to contact if they had a concern.

Mr Cleary, registered person, demonstrated a clear understanding of his role and responsibility in accordance with legislation. It was confirmed that the statement of purpose and patient's guide are kept under review, revised and updated when necessary and available on request.

The RQIA certificate of registration was up to date and displayed appropriately.

Observation of insurance documentation confirmed that current insurance policies were in place.

Patient and staff views

All seven patients who submitted questionnaire responses indicated that they felt that the service is well led. All seven patients indicated they were very satisfied with this aspect of the service. Comments provided included the following:

- “Always remember you are only as good as your last job.”
- “Some of the staff are in the practice a long time and are very efficient. All staff are helpful.”

All eight submitted staff questionnaire responses indicated that they felt that the service is well led. Seven staff indicated they were very satisfied with this aspect of the service and one indicated that they were satisfied. Staff spoken with during the inspection concurred with this. The following comment was included in a submitted questionnaire response:

- “Management is easily approachable and listens to any issues. All practice policies and procedures are easily accessible in reception and we are encouraged to improve personal development.”

Areas of good practice

There were examples of good practice found in relation to governance arrangements, management of complaints and incidents, quality improvement and maintaining good working relationships.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

7.0 Quality improvement plan

There were no areas for improvement identified during this inspection, and a QIP is not required or included, as part of this inspection report.
