

Announced Care Inspection Report 23 January 2018

Coalisland Dental

Type of Service: Independent Hospital (IH) – Dental Treatment

Address: 24 Barrack Street, Coalisland BT71 4LS

Tel No: 028 8774 0995

Inspector: Norma Munn

www.rqia.org.uk

Assurance, Challenge and Improvement in Health and Social Care

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

1.0 What we look for

2.0 Profile of service

This is a registered dental practice with two registered places.

3.0 Service details

Registered Provider: Mr James Kelly	Registered Manager: Mr James Kelly
Person in charge at the time of inspection: Mr James Kelly	Date manager registered: 12 January 2012
Categories of care: Independent Hospital (IH) – Dental Treatment	Number of registered places: 2

4.0 Inspection summary

An announced inspection took place on 23 January 2018 from 11.00 to 15.00.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Independent Health Care Regulations (Northern Ireland) 2005, The Regulation and Improvement Authority (Independent Health Care) (Fees and Frequency of Inspections) (Amendment) Regulations (Northern Ireland) 2011 and the Department of Health, Social Services and Public Safety (DHSSPS) Minimum Standards for Dental Care and Treatment (2011).

The inspection assessed progress with any areas for improvement identified during and since the last care inspection and to determine if the practice was delivering safe, effective and compassionate care and if the service was well led.

Examples of good practice were evidenced in all four domains. These related to patient safety in respect of recruitment and the management of medical emergencies, health promotion, engagement to enhance the patients' experience and governance arrangements.

One area requiring improvement was identified against the regulations. This related to the servicing of x-ray equipment in accordance with the manufacturer's instructions.

Five areas requiring improvement were identified against the standards. These related to safeguarding training, the further development of the safeguarding policy for children, infection prevention and control issues, the decontamination of dental handpieces in keeping with Health Technical Memorandum (HTM) 01-05 Decontamination in primary care dental practices and the provision of fire training and fire drills on an annual basis.

All of the patients who submitted questionnaire responses to RQIA indicated that they were either satisfied or very satisfied with all aspects of care in this service.

Two comments provided included the following:

- "Very satisfied with all care."
- "The patience and care taken by everyone in the practice is second to none. I myself am terrified of going to the dentist, but James has been fantastic with me, so much so, that I am

no longer afraid. I have been a patient in many practices throughout the years and this one is the best by far.”

The findings of this report will provide the practice with the necessary information to assist them to fulfil their responsibilities, enhance practice and patients’ experience.

While we assess the quality of services provided against regulations and associated DHSSPS care standards, we do not assess the quality of dentistry provided by individual dentists.

4.1 Inspection outcome

	Regulations	Standards
Total number of areas for improvement	1	5

Details of the Quality Improvement Plan (QIP) were discussed with Mr Kelly, registered person, as part of the inspection process. The timescales for completion commence from the date of inspection.

4.2 Action/enforcement taken following the most recent care inspection dated 29 April 2016

Other than those actions detailed in the QIP no further actions were required to be taken following the most recent inspection on 29 April 2016.

5.0 How we inspect

Prior to the inspection a range of information relevant to the practice was reviewed. This included the following records:

- notifiable events since the previous care inspection
- the registration status of the establishment
- written and verbal communication received since the previous care inspection
- the returned QIP from the previous care inspection
- the previous care inspection report
- submitted staffing information
- submitted complaints declaration

Questionnaires were provided to patients and staff prior to the inspection by the practice on behalf of RQIA. Returned completed patient and staff questionnaires were also analysed prior to the inspection.

A poster informing patients that an inspection was being conducted was displayed.

During the inspection the inspector met with Mr Kelly, registered person, an associate dentist, two dental nurses, a trainee dental nurse and a receptionist. A tour of the premises was also undertaken.

A sample of records was examined during the inspection in relation to the following areas:

- staffing
- recruitment and selection
- safeguarding
- management of medical emergencies
- infection prevention and control and decontamination
- radiography
- clinical record recording arrangements
- health promotion
- management and governance arrangements
- maintenance arrangements

Areas for improvement identified at the last care inspection were reviewed and assessment of compliance recorded as met, partially met, or not met.

The findings of the inspection were provided to Mr Kelly, registered person, at the conclusion of the inspection.

6.0 The inspection

6.1 Review of areas for improvement from the most recent inspection dated 29 April 2016

The most recent inspection of the practice was an announced care inspection. The completed QIP was returned and approved by the care inspector.

6.2 Review of areas for improvement from the last care inspection dated 29 April 2016

Areas for improvement from the last care inspection		
Action required to ensure compliance with The Minimum Standards for Dental Care and Treatment (2011)		Validation of compliance
<p>Area for improvement 1</p> <p>Ref: Standard 11</p> <p>Stated: First time</p>	<p>The registered person should implement a system for appraising staff performance at least on an annual basis.</p> <hr/> <p>Action taken as confirmed during the inspection: Discussion with Mr Kelly and staff confirmed that a system had been implemented to appraise staff performance. A review of a sample of two appraisals evidenced that these had been completed on an annual basis.</p>	Met

Mr Kelly has given assurances that in the event of a medical emergency Buccolam will be administered as recommended by the HSCB and the BNF.</p>	Met
<p>Area for improvement 4 Ref: Standard 13.2</p> <p>Stated: First time</p>	<p>The registered person should ensure that cleaning equipment is colour coded in keeping with The National Safety Agency cleanliness guidelines.</p>	Met

	<p>Action taken as confirmed during the inspection: Discussion with staff and observation confirmed that cleaning equipment has been colour coded in keeping with The National Safety Agency cleanliness guidelines.</p>	
--	---	--

6.3 Inspection findings

6.4 Is care safe?

Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.

Staffing

Two dental surgeries are in operation in this practice. Discussion with staff and a review of completed patient and staff questionnaires demonstrated that there was sufficient numbers of staff in various roles to fulfil the needs of the practice and patients.

Induction programme templates were in place relevant to specific roles and responsibilities. A sample of three evidenced that induction programmes had been completed when new staff joined the practice.

As discussed, procedures were in place for appraising staff performance and staff confirmed that appraisals had taken place. Staff confirmed that they felt supported and involved in discussions about their personal development. A review of a sample of two evidenced that appraisals had been completed on an annual basis. There was a system in place to ensure that all staff receive appropriate training to fulfil the duties of their role. However not all staff had completed fire training and safeguarding adults training in accordance with the RQIA training guidance for Independent Hospitals providing dental treatment. This is discussed further in this report.

A review of records confirmed that a robust system was in place to review the General Dental Council (GDC) registration status and professional indemnity of all clinical staff.

Recruitment and selection

A review of the submitted staffing information and discussion with Mr Kelly confirmed that three staff had been recruited since the previous inspection. A review of the personnel files for these staff demonstrated that all the relevant information as outlined in Schedule 2 of The Independent Health Care Regulations (Northern Ireland) 2005 has been sought and retained.

There was a recruitment policy and procedure available. The policy was comprehensive and reflected best practice guidance.

Safeguarding

Staff were aware of the types and indicators of abuse and the actions to be taken in the event of a safeguarding issue being identified, including who the nominated safeguarding lead was.

Review of records demonstrated that all staff had received training in safeguarding children as outlined in the Minimum Standards for Dental Care and Treatment 2011. However Mr Kelly could not confirm that all staff had received training in safeguarding adults as outlined in the Minimum Standards for Dental Care and Treatment 2011. This was discussed and it was advised that all staff should complete training in safeguarding adults in keeping with the Northern Ireland Adult Safeguarding Partnership (NIASP) training strategy (revised 2016). An area for improvement against the standards has been made in relation to safeguarding training.

Policies and procedures were in place for the safeguarding and protection of adults and children at risk of harm. The policy for safeguarding adults included the types and indicators of abuse and distinct referral pathways in the event of a safeguarding issue arising with an adult or child. The relevant contact details for onward referral to the local Health and Social Care Trust should a safeguarding issue arise were included. However, the policy for safeguarding children was not fully reflective of the regional policies and best practice guidance. An area for improvement against the standards has been made in this regard.

It was confirmed that the Adult Safeguarding Operational Procedures was available for staff reference. Following the inspection copies of the regional policy Co-operating to Safeguard Children and Young people in Northern Ireland and the regional guidance document Adult Safeguarding Prevention and Protection in Partnership were emailed to the practice for staff reference.

Management of medical emergencies

A review of medical emergency arrangements evidenced that emergency medicines were provided in keeping with the British National Formulary (BNF). Mr Kelly was advised to increase the supply of Adrenaline medication in accordance with the BNF. Following the inspection RQIA received confirmation that the supply of Adrenaline had been increased. Mr Kelly has given assurances that in the event of a medical emergency Adrenaline will be administered as recommended by the HSCB and the BNF.

As discussed in section 6.2 a discussion took place regarding the procedure for the safe administration of Buccolam and the various doses and quantities needed as recommended by the Health and Social Care Board (HSCB) and the BNF. Following the inspection RQIA received confirmation that the supply of Buccolam had been increased. Mr Kelly has given assurances that in the event of a medical emergency Buccolam will be administered as recommended by the HSCB and the BNF.

Emergency equipment as recommended by the Resuscitation Council (UK) guidelines was retained with the exception of an automated external defibrillator (AED). Staff confirmed that an AED was available in the General Practitioners (GP) surgery in close proximity to the practice and could be accessed in a timely manner. The use of this AED had been incorporated into the practice's medical emergency policy and procedure. A discussion took place with Mr Kelly in relation to accessing this AED in accordance with the Resuscitation Council (UK) guidelines.

A robust system was in place to ensure that emergency medicines and equipment do not exceed their expiry date. There was an identified individual with responsibility for checking emergency medicines and equipment.

Review of training records and discussion with staff confirmed that the management of medical emergencies is included in the induction programme and training is updated on an annual basis in keeping with best practice guidance.

Discussion with staff demonstrated that they have a good understanding of the actions to be taken in the event of a medical emergency and the location of medical emergency medicines and equipment.

The policy for the management of medical emergencies reflected best practice guidance. Protocols were available for staff reference outlining the local procedure for dealing with the various medical emergencies.

Infection prevention control and decontamination procedures

Clinical and decontamination areas were tidy and uncluttered and work surfaces were intact and easy to clean. Fixtures, fittings and equipment were free from damage, dust and visible dirt. Some issues were identified that were not in keeping with best practice in relation to infection prevention and control as follows:

- the overflows in the hand wash basins in the identified surgeries should be blanked off and the plugs should be removed
- provide pedal or sensor operated waste bins in the identified clinical areas
- remove the horizontal venetian blinds from the decontamination room
- the ripped/damaged operators chair should be repaired/re-upholstered to provide an intact surface that will facilitate effective cleaning

These issues were discussed with Mr Kelly and an area for improvement against the standards has been made to address them.

Staff were observed to be adhering to best practice in terms of the uniform and hand hygiene policies.

Discussion with staff demonstrated that they had an understanding of infection prevention and control policies and procedures and were aware of their roles and responsibilities. Staff confirmed that they have received training in infection prevention and control and decontamination in keeping with best practice.

There was a nominated lead with responsibility for infection control and decontamination.

A decontamination room separate from patient treatment areas was available. Some food items were observed to be stored in the refrigerator in the decontamination room. Mr Kelly and staff were advised to remove these. This was actioned on the day of the inspection and Mr Kelly was advised to ensure that the decontamination room is dedicated solely to the decontamination process.

Appropriate equipment, including a washer disinfectant and a steam steriliser, had been provided to meet the practice requirements. The dental nurse confirmed that reusable dental

handpieces were being manually cleaned prior to sterilisation. There was no evidence to suggest that the dental handpieces were not compatible with a washer disinfectant. Best practice outlines that all reusable compatible dental instruments should be cleaned and sterilised using an automated process. The processing of handpieces was discussed with Mr Kelly and he was advised to refer to the Professional Estates Letter (PEL) 13 (13), dated 24 March 2015 which was issued to all dental practices by the DHSSPS. An area for improvement against the standards has been made in this regard.

A review of documentation evidenced that equipment used in the decontamination process has been appropriately validated. A review of equipment logbooks evidenced that periodic tests are undertaken and recorded in keeping with HTM 01-05.

It was confirmed that the practice continues to audit compliance with HTM 01-05 using the Infection Prevention Society (IPS) audit tool. The most recent IPS audit was completed during January 2018.

A range of policies and procedures was in place in relation to decontamination and infection prevention and control.

Radiography

The practice has two surgeries, each of which has an intra-oral x-ray machine. In addition there is an orthopan tomogram machine (OPG), which is located in a separate room.

A dedicated radiation protection file containing the relevant local rules, employer's procedures and other additional information was retained. A review of the file confirmed that staff have been authorised by the radiation protection supervisor (RPS) for their relevant duties and have received local training in relation to these duties. It was evidenced that all measures are taken to optimise dose exposure. This included the use of rectangular collimation, x-ray audits and digital x-ray processing.

A copy of the local rules was on display near each x-ray machine and appropriate staff had signed to confirm that they had read and understood these. Staff spoken with demonstrated sound knowledge of the local rules and associated practice.

The radiation protection advisor (RPA) completes a quality assurance check every three years. Review of the report of the most recent visit by the RPA demonstrated that the recommendations made have been addressed.

There was no evidence that the x-ray equipment had been serviced and maintained in accordance with manufacturer's instructions. Mr Kelly has agreed to address this issue. An area for improvement against the regulations has been made in this regard.

Quality assurance systems and processes were in place to ensure that all matters relating to x-rays reflect legislative and best practice guidance.

Environment

The environment was maintained to a good standard of maintenance and décor.

Detailed cleaning schedules were in place for all areas. As discussed a colour coded cleaning system was in place.

Arrangements are in place for maintaining the environment.

A legionella risk assessment had been undertaken and water temperatures are monitored and recorded as recommended.

A fire risk assessment had been undertaken. Staff demonstrated that they were aware of the action to take in the event of a fire. However, there was no evidence that all staff had attended fire awareness training or a fire drill on an annual basis. An area for improvement against the standards has been made in this regard.

It was confirmed that robust arrangements are in place for the management of prescription pads/forms and that written security policies are in place to reduce the risk of prescription theft and misuse.

Patient and staff views

Nineteen patients submitted questionnaire responses to RQIA. All indicated that they felt safe and were very satisfied with this aspect of care.

Six staff submitted questionnaire responses. All indicated that they felt that patients are safe and were very satisfied with this aspect of care. Staff spoken with during the inspection concurred with this. One comment provided included the following:

- “Very good training, premises in excellent order.”

Areas of good practice

There were examples of good practice found in relation to staff recruitment, induction, appraisal and the management of medical emergencies.

Areas for improvement

All staff should attend training in safeguarding of adults commensurate of their role in keeping with best practice guidance and in accordance with the Minimum Standards for Dental Care and Treatment 2011.

The policy for safeguarding children should be updated in keeping with regional policies and best practice guidance.

Issues identified in relation to infection prevention and control should be addressed.

The procedure for the decontamination of dental handpieces should be reviewed to ensure that they are decontaminated in keeping with manufacturer’s instructions and Professional Estates Letter (PEL) (13) 13. Compatible handpieces should be processed in the washer disinfecter.

All x-ray equipment should be serviced and maintained in accordance with manufacturer’s instructions.

All staff should attend fire awareness training and fire drills on an annual basis.

	Regulations	Standards
Total number of areas for improvement	1	5

6.5 Is care effective?

The right care, at the right time in the right place with the best outcome.

Clinical records

Staff confirmed that clinical records are updated contemporaneously during each patient's treatment session in accordance with best practice.

Mr Kelly and staff confirmed that routine dental examinations include a review of medical history, a check for gum disease and oral cancers and that treatment plans are developed in consultation with patients. It was confirmed that patients are informed about the cost of treatments, choices and options.

Both manual and computerised records are maintained. Electronic records have different levels of access afforded to staff dependent on their role and responsibilities. Appropriate systems and processes were in place for the management of records and maintaining patient confidentiality.

Policies were available in relation to records management, data protection and confidentiality and consent.

The practice is registered with the Information Commissioner's Office (ICO) and a Freedom of Information Publication Scheme has been established.

Health promotion

The practice has a strategy for the promotion of oral health and hygiene. There is an identified oral health educator in the practice and Mr Kelly confirmed that oral health is actively promoted on an individual level with patients during their consultations. Information was available in the reception area regarding health promotion in the form of information leaflets.

Audits

There were arrangements in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals which included:

- x-ray quality grading
- x-ray justification and clinical evaluation recording
- IPS HTM 01-05 compliance
- clinical records

Communication

Mr Kelly and staff confirmed that arrangements are in place for onward referral in respect of specialist treatments.

Staff meetings are held on a regular basis to discuss clinical and practice management issues. Review of documentation demonstrated that minutes of staff meetings are retained. Staff spoken with confirmed that meetings also facilitated informal in house training sessions.

Staff confirmed that there are good working relationships and there is an open and transparent culture within the practice.

Patient and staff views

All of the patients who submitted questionnaire responses indicated that they get the right care, at the right time and with the best outcome for them. All of the patients indicated that they were very satisfied with this aspect of care.

All submitted staff questionnaire responses indicated that they felt that patients get the right care, at the right time and with the best outcome for them. All staff indicated they were very satisfied with this aspect of care. Staff spoken with during the inspection concurred with this. One comment provided included the following:

- “Very good note taking in practice, very good service for patients’ needs”

Areas of good practice

There were examples of good practice found in relation to the management of clinical records, the range and quality of audits, health promotion strategies and ensuring effective communication between patients and staff.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.6 Is care compassionate?

Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.

Dignity, respect and involvement in decision making

Staff demonstrated a good understanding of the core values of privacy, dignity, respect and patient choice. Staff confirmed that if they needed to speak privately with a patient that arrangements are provided to ensure the patient’s privacy is respected. Staff were observed to converse with patients and conduct telephone enquiries in a professional and confidential manner.

The importance of emotional support needed when delivering care to patients who were very nervous or fearful of dental treatment was clear.

It was confirmed that treatment options, including the risks and benefits, were discussed with each patient. This ensures that patients understand what treatment is available to them and can make an informed choice. Staff demonstrated how consent would be obtained.

The practice undertakes patient satisfaction surveys on an annual basis. Review of the most recent patient satisfaction report demonstrated that the practice pro-actively seeks the views of patients about the quality of treatment and other services provided. Patient feedback whether constructive or critical, is used by the practice to improve, as appropriate.

A policy and procedure was in place in relation to confidentiality.

Patient and staff views

All of the patients who submitted questionnaire responses indicated that they are treated with dignity and respect and are involved in decision making affecting their care. Eighteen patients indicated they were very satisfied with this aspect of care and one indicated they were satisfied.

All submitted staff questionnaire responses indicated that they felt that patients are treated with dignity and respect and are involved in decision making affecting their care. All staff indicated they were very satisfied with this aspect of care. Staff spoken with during the inspection concurred with this. One comment provided included the following:

- “Patients are treated with complete dignity and respect, total confidentiality. Patients are asked for comments verbally and in satisfaction surveys.”

Areas of good practice

There were examples of good practice found in relation to maintaining patient confidentiality, ensuring the core values of privacy and dignity were upheld and providing the relevant information to allow patients to make informed choices.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.7 Is the service well led?

Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.

Management and governance arrangements

There was a clear organisational structure within the practice and staff were able to describe their roles and responsibilities and were aware of who to speak to if they had a concern. Staff confirmed that there were good working relationships and that management were responsive to any suggestions or concerns raised.

Mr Kelly is the nominated individual with overall responsibility for the day to day management of the practice.

Policies and procedures were available for staff reference. Observations made confirmed that policies and procedures were indexed, dated and systematically reviewed on a three yearly basis. Staff spoken with were aware of the policies and how to access them.

Arrangements were in place to review risk assessments.

A copy of the complaints procedure was available in the practice. The policy reviewed was not in accordance with the DHSSPS guidance on complaints handling in regulated establishments and agencies (April 2009) and the Independent Health Care Regulations (Northern Ireland) 2005. This was discussed with Mr Kelly and a revised complaints procedure was forwarded to RQIA following the inspection.

Staff demonstrated a good awareness of complaints management. A complaints questionnaire was forwarded by RQIA to the practice for completion. The returned questionnaire indicated that no complaints have been received for the period 1 April 2016 to 31 March 2017.

A system was in place to ensure that notifiable events were investigated and reported to RQIA or other relevant bodies as appropriate. A system was also in place to ensure that urgent communications, safety alerts and notices are reviewed, and where appropriate, made available to key staff in a timely manner.

Mr Kelly confirmed that arrangements were in place to monitor, audit and review the effectiveness and quality of care delivered to patients at appropriate intervals. If required an action plan is developed and embedded into practice to address any shortfalls identified during the audit process.

A whistleblowing/raising concerns policy was available. Discussion with staff confirmed that they were aware of whom to contact if they had a concern.

Mr Kelly demonstrated a clear understanding of his role and responsibility in accordance with legislation. It was confirmed that the statement of purpose and patient's guide are kept under review, revised and updated when necessary and available on request.

The RQIA certificate of registration was up to date and displayed appropriately.

Observation of insurance documentation confirmed that current insurance policies were in place.

Patient and staff views

All of the patients who submitted questionnaire responses indicated that they felt that the care is well led. Eighteen patients indicated they were very satisfied with this aspect of the care and one indicated they were satisfied.

All submitted staff questionnaire responses indicated that they felt that the service is well led and were very satisfied with this aspect of the service. Staff spoken with during the inspection concurred with this. One comment provided included the following:

- “The service is very well managed.”

Areas of good practice

There were examples of good practice found in relation to governance arrangements, management of complaints and incidents, quality improvement and maintaining good working relationships.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

7.0 Quality improvement plan

Areas for improvement identified during this inspection are detailed in the QIP. Details of the QIP were discussed with Mr Kelly, registered person, as part of the inspection process. The timescales commence from the date of inspection.

The registered person/manager should note that if the action outlined in the QIP is not taken to comply with regulations and standards this may lead to further enforcement action including possible prosecution for offences. It is the responsibility of the registered person to ensure that all areas for improvement identified within the QIP are addressed within the specified timescales.

Matters to be addressed as a result of this inspection are set in the context of the current registration of the dental practice. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises RQIA would apply standards current at the time of that application.

7.1 Areas for improvement

Areas for improvement have been identified where action is required to ensure compliance with The Independent Health Care Regulations (Northern Ireland) 2005, The Regulation and Improvement Authority (Independent Health Care) (Fees and Frequency of Inspections) (Amendment) Regulations (Northern Ireland) 2011 and the Department of Health, Social Services and Public Safety (DHSSPS) Minimum Standards for Dental Care and Treatment (2011).

7.2 Actions to be taken by the service

The QIP should be completed and detail the actions taken to address the areas for improvement identified. The registered provider should confirm that these actions have been completed and return the completed QIP via Web Portal for assessment by the inspector.
