

Announced Inspection

Name of Establishment:	Donnelly Dental
Establishment ID No:	11483
Date of Inspection:	5 August 2014
Inspector's Name:	Emily Campbell
Inspection No:	18340

The Regulation and Quality Improvement Authority 9th floor Riverside Tower, 5 Lanyon Place, Belfast, BT1 3BT Tel: 028 9051 7500 Fax: 028 9051 7501

1.0 General Information

Name of establishment:	Donnelly Dental
Address:	9 - 11 Glenarm Road Larne BT40 1BN
Telephone number:	028 2827 8585
Registered organisation / registered provider:	Mrs Jillian Saulters
Registered manager:	Mrs Jillian Saulters
Person in charge of the establishment at the time of Inspection:	Mrs Jillian Saulters
Registration category:	IH-DT
Type of service provision:	Private dental treatment
Maximum number of places registered: (dental chairs)	3
Date and type of previous inspection:	Announced Inspection 30 May 2013
Date and time of inspection:	5 August 2014 10.00am – 12.30pm
Name of inspector:	Emily Campbell

2.0 Introduction

The Regulation and Quality Improvement Authority (RQIA) is empowered under The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003 to inspect dental practices providing private dental care and treatment. A minimum of one inspection per year is required.

This is a report of the announced inspection to assess the quality of services being provided. The report details the extent to which the standards measured during inspection were met.

3.0 Purpose of the Inspection

The purpose of this inspection was to consider whether the service provided to patients was in accordance with their assessed needs and preferences and was in compliance with legislative requirements, minimum standards and other good practice indicators. This was achieved through a process of analysis and evaluation of available evidence.

RQIA not only seeks to ensure that compliance with regulations and standards is met but also aims to use inspection to support providers in improving the quality of services. For this reason, inspection involves in-depth examination of an identified number of aspects of service provision.

The aims of the inspection were to examine the policies, practices and monitoring arrangements for the provision of dental care, and to determine the provider's compliance with the following:

- The HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003;
- The Independent Health Care Regulations (Northern Ireland) 2005;
- The Regulation and Improvement Authority (Independent Health Care) (Fees and Frequency of Inspections) (Amendment) Regulations (Northern Ireland) 2011;
- The Minimum Standards for Dental Care and Treatment 2011; and
- Health Technical Memorandum HTM 01-05: Decontamination in Primary Care Dental Practices and Professional Estates Letter (PEL) (13) 13.

Other published standards which guide best practice may also be referenced during the inspection process.

4.0 Methods/Process

Committed to a culture of learning, the RQIA has developed an approach which uses self-assessment, a critical tool for learning, as a method for preliminary assessment of achievement of the Minimum Standards.

The inspection process has three key parts; self-assessment (including completion of self-declaration), pre-inspection analysis and the inspection visit by the inspector.

Specific methods/processes used in this inspection include the following:

- a self-assessment was submitted prior to the inspection and has been analysed;
- discussion with Mrs Jillian Saulters, registered provider;
- examination of relevant records;
- consultation with relevant staff;
- tour of the premises; and
- evaluation and feedback.

Any other information received by RQIA about this practice has also been considered by the inspector in preparing for this inspection.

5.0 Consultation Process

During the course of the inspection, the inspector spoke with staff on duty. Questionnaires were provided to staff prior to the inspection by the practice, on behalf of the RQIA to establish their views regarding the service. Matters raised by staff were addressed by the inspector during the course of this inspection:

		Number
Discussion with staff	3	
Staff Questionnaires	12 issued	9 returned

Prior to the inspection the registered person/s were asked, in the form of a declaration, to confirm that they have a process in place for consulting with service users and that a summary of the findings has been made available. The consultation process may be reviewed during this inspection.

6.0 Inspection Focus

The inspection sought to establish the level of compliance achieved with respect to the selected DHSSPS Minimum Standards for Dental Care and Treatment and a thematic focus incorporating selected standards and good practice indicators. An assessment on the progress in relation to the issues raised during and since the previous inspection was also undertaken.

In 2012 the DHSSPS requested that RQIA make compliance with best practice in local decontamination, as outlined in HTM 01-05 Decontamination in Primary Care Dental Premises, a focus for the 2013/14 inspection year.

The DHSSPS and RQIA took the decision to review compliance with best practice over two years. The focus of the two years is as follows:

- Year 1 Decontamination 2013/14 inspection year
- Year 2 Cross infection control 2014/15 inspection year

Standard 13 – Prevention and Control of Infection [Safe and effective care]

The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

The decontamination section of the Infection Prevention Society Audit tool, which has been endorsed by the Department of Health, was used as a framework for development of a self-assessment tool and for planned inspections during 2013/14.

The following sections of the 2013 edition of the Infection Prevention Society Audit tool, which has been endorsed by the Department of Health have been used as a framework for the development of a self-assessment tool and for planned inspections in 2014/15:

- prevention of Blood-borne virus exposure;
- environmental design and cleaning;
- hand Hygiene;
- management of Dental Medical Devices;
- personal Protective Equipment; and
- waste.

A number of aspects of the Decontamination section of the Audit tool have also been revisited.

RQIA have highlighted good practice guidance sources to service providers, making them available on our website where possible. Where appropriate, requirements will be made against legislation and recommendations will be made against DHSSPS Minimum Standards for Dental Care and Treatment (2011) and other recognised good practice guidance documents. The registered provider/manager and the inspector have each rated the practice's compliance level against each section of the self-assessment.

The table below sets out the definitions that RQIA has used to categorise the service's performance:

Guidance - Compliance statements		
Compliance statement	Definition	Resulting Action in Inspection Report
0 - Not applicable		A reason must be clearly stated in the assessment contained within the inspection report.
1 - Unlikely to become compliant		A reason must be clearly stated in the assessment contained within the inspection report.
2 - Not compliant	Compliance could not be demonstrated by the date of the inspection.	In most situations this will result in a requirement or recommendation being made within the inspection report.
3 - Moving towards compliance	Compliance could not be demonstrated by the date of the inspection. However, the service could demonstrate a convincing plan for full compliance by the end of the Inspection year.	In most situations this will result in a requirement or recommendation being made within the inspection report.
4 – Substantially Compliant	Arrangements for compliance were demonstrated during the inspection. However, appropriate systems for regular monitoring, review and revision are not yet in place.	In most situations this will result in a recommendation, or in some circumstances a requirement, being made within the inspection report.
5 – Compliant	Arrangements for compliance were demonstrated during the inspection. There are appropriate systems in place for regular monitoring, review and any necessary revisions to be undertaken.	In most situations this will result in an area of good practice being identified and comment being made within the inspection report.

7.0 Profile of Service

Donnelly Dental is located within a residential building which has been converted to accommodate a dental practice.

The premises are located on the Glenarm Road, near the town centre of Larne. On street parking is available for patients and public transport routes operate close by.

The establishment is accessible for patients with a disability and disabled toilet facilities are provided. A surgery and patient toilet facilities are located on the ground floor.

Donnelly Dental provides three surgeries, a waiting and reception area, a decontamination room, an x-ray room, staff facilities, office and storage facilities.

Donnelly Dental operates three dental chairs, providing both private and NHS dental care. Mrs Saulters works alongside associate dentists, hygienists and a team of dental nurses and administrative staff.

Mrs Saulters has converted an area in the practice to provide a fourth dental surgery. Mrs Saulters confirmed this will not made operational until application for variation has been submitted to RQIA to increase the number of registered dental chairs from three to four.

Mrs Saulters has been the registered provider/manager since registration with RQIA in February 2013.

The establishment's statement of purpose outlines the range of services provided.

The practice is registered with RQIA as an independent hospital (IH) providing dental treatment (DT).

8.0 Summary of Inspection

This announced inspection of Donnelly Dental was undertaken by Emily Campbell on 5 August 2014 between the hours of 10.00am and 12.30pm. Mrs Jillian Saulters, registered provider, was available during the inspection and for verbal feedback at the conclusion of the inspection.

The requirements and recommendations made as a result of the previous inspection were also examined. Observations and discussion demonstrated that all of the requirements and recommendations made have been addressed. The detail of the action taken by Mrs Saulters can be viewed in the section following this summary.

Prior to the inspection, Mrs Saulters completed a self-assessment using the standard criteria outlined in the theme inspected. The comments provided by Mrs Saulters in the self-assessment were not altered in any way by RQIA. The self-assessment is included as appendix one in this report.

During the course of the inspection the inspector met with staff, discussed operational issues, examined a selection of records and carried out a general inspection of the establishment.

Questionnaires were also issued to staff; nine were returned to RQIA within the timescale required. Review of submitted questionnaires and discussion with staff evidenced that staff were knowledgeable regarding the inspection theme and that they have received training appropriate to their relevant roles. Staff confirmed that they are familiar with the practice policies and procedures and have received infection prevention and control training. Clinical staff also confirmed that they have been immunised against Hepatitis B.

Inspection Theme – Cross infection control

Dental practices in Northern Ireland have been directed by the DHSSPS, that best practice recommendations in the Health Technical Memorandum (HTM) 01-05, Decontamination in primary care dental practices, along with Northern Ireland amendments, should have been fully implemented by November 2012. HTM 01-05 was updated in 2013 and Primary Care Dental Practices were advised of this through the issue of Professional Estates Letter (PEL) (13) 13 on 1 October 2013. The PEL (13) 13 advised General Dental Practitioners of the publication of the 2013 version of HTM 01-05 and the specific policy amendments to the guidance that apply in Northern Ireland.

RQIA reviewed the compliance of the decontamination aspect of HTM 01-05 in the 2013/2014 inspection year. The focus of the inspection for the 2014/2015 inspection year is cross infection control. A number of aspects of the decontamination section of HTM 01-05 have also been revisited.

A copy of the 2013 edition of HTM 01-05 Decontamination in primary dental care practices is available at the practice for staff reference. Staff are familiar with best practice guidance outlined in the document and audit compliance on an ongoing basis.

The practice has a policy and procedure in place for the prevention and management of blood-borne virus exposure, including management of spillages, sharps and inoculation incidents in accordance with national guidance. Review of documentation and discussion with Mrs Saulters and staff evidenced that appropriate arrangements are in place for the prevention and management of bloodborne virus exposure. Staff confirmed that they are aware of and are adhering to the practice policy in this regard. A recommendation was made that records are retained regarding the Hepatitis B immunisation status of all clinical staff. Sharps management at the practice was observed to be in line with best practice.

The premises were clean and tidy and clutter was kept to a minimum. The patient toilet is in need of repainting however, Mrs Saulters has plans to address this in the near future.

Satisfactory arrangements are in place for the cleaning of the general environment and dental equipment. The floor coverings in the two surgeries observed were not sealed at the edges or where cabinetry meets the flooring and both had carpeted areas. Mrs Saulters confirmed that the third surgery also had a carpeted area. A recommendation was made that a refurbishment programme should be established to ensure all surgery floors are impervious and easy to clean. In the interim the vinyl flooring in surgeries should be sealed where it meets the walls and where cabinetry meets the flooring. Fixtures, fittings and equipment were free from damage, dust and visible dirt. Two large tears were identified in one dental chair. These were covered with barrier film and staff confirmed that the barrier film was replaced between each patient in order to reduce the risk of infection. A recommendation was made that arrangements should be established for the repair/recovering of any torn dental chairs.

The practice has a hand hygiene policy and procedure in place and staff demonstrated that good practice is adhered to in relation to hand hygiene. Dedicated hand washing basins are available in the appropriate locations. The hand wash basin in one surgery had an overflow and a recommendation was made that this should be blanked off with a stainless steel plate sealed with antibacterial mastic. Information promoting hand hygiene is provided for staff.

A written scheme for the prevention of legionella is available. Procedures are in place for the use, maintenance, service and repair of all medical devices. Observations made and discussion with staff confirmed that dental unit water lines (DUWLs) are appropriately managed.

The practice has a policy and procedure in place for the use of personal protective equipment (PPE) and staff spoken with demonstrated awareness of this. Observations made confirmed that PPE was readily available and used appropriately by staff.

Appropriate arrangements were in place for the management of general and clinical waste, including sharps. Waste was appropriately segregated and suitable

arrangements were in place for the storage and collection of waste by a registered waste carrier. Relevant consignment notes are retained in the practice for at least three years. Waste bins in surgeries and the decontamination room are not pedal operated and a recommendation was made in this regard.

A decontamination room separate from patient treatment areas and dedicated to the decontamination process is available. Appropriate validated equipment, including a washer disinfector and two steam sterilisers have been provided to meet the practice requirements. Equipment logbooks evidenced that periodic tests are undertaken and recorded in keeping with HTM 01-05.

The evidence gathered through the inspection process concluded that Donnelly Dental is substantially compliant with this inspection theme.

Mrs Saulters confirmed on the submitted self-assessment that arrangements are in place for consultation with patients, at appropriate intervals, that feedback provided by patients has been used by the service to improve and that results of the consultation have been made available to patients.

The practice is currently registered for three dental chairs. Mrs Saulters has converted an area in the practice to provide a fourth dental surgery. Mrs Saulters confirmed this will not made operational until application of variation has been submitted to RQIA to increase the number of registered dental chairs from three to four. The inspector made arrangements following the inspection for the application of variation to be provided to Mrs Saulters.

Review of the additional surgery evidenced that it has been finished to a high standard and is fully equipped. A critical examination of the x-ray unit was carried out by the radiation protection advisor (RPA) on 29 January 2014 and review of the PRA report evidenced that no recommendations were made in this regard. A recommendation was made that supporting information as detailed in section 11.3 of the report is provided with the application of variation. On receipt of the application of variation and the supporting information the registration of the fourth dental chair will be recommended.

Six recommendations were made as a result of the announced inspection, details can be found in the main body of the report and the attached Quality Improvement Plan (QIP).

The inspector wishes to thank Mrs Saulters and staff for their helpful discussions, assistance and hospitality throughout the inspection process.

Νο	Regulation Ref.	Requirements	Action taken - as confirmed during this inspection	Inspector's Validation of Compliance
1	15 (7)	Address the ventilation issues in the decontamination room.	Extract ventilation from the dirty side of the decontamination room and make up air from the clean side is now provided. Requirement addressed.	Compliant
2	15 (7)	Ensure that sufficient instruments are available or a second washer disinfector provided to ensure that manual cleaning is restricted to devices not compatible with an automated validated process, or when the washer disinfector is temporarily unavailable.	Mrs Saulters and a dental nurse confirmed that additional dental instruments have been provided and that manual cleaning is restricted to devices not compatible with an automated validated process, or when the washer disinfector is temporarily unavailable. Mrs Saulters advised that it also her intention to provide a second washer disinfector in the near future to meet the anticipated additional need generated from the additional surgery. Requirement addressed.	Compliant
3	15 (7)	Ensure sterilisers are validated and establish arrangements for annual validation thereafter.	Review of documentation evidenced that this requirement has been addressed.	Compliant
4	25 (2) (a) (b)	Review the storage arrangements in the x-ray processing/storage room and include it in the practice's refurbishment programme. Any trip/hazard issues should be addressed with immediate effect in the interest of health and safety for staff.	The x-ray processor has now been relocated to another room. The trip/hazard issue has been addressed and the storage room has been decluttered. Requirement addressed.	Compliant

No	Minimum Standard Ref.	Recommendations	Action Taken – as confirmed during this inspection	Inspector's Validation of Compliance
1	13.4	The layout of the steriliser equipment in the decontamination room should be reviewed to facilitate a larger set down area for clean instruments at the end of the dirty to clean flow.	Review of the layout of the decontamination room evidenced that this recommendation has been addressed.	Compliant
2	13.4	The floor covering of the decontamination room should be sealed at the edges. On refurbishment of the decontamination room coved flooring should be provided.	The floor covering of the decontamination room has been sealed at the edges and Mrs Saulters confirmed that on the next refurbishment of the room coved flooring will be provided. Recommendation addressed.	Compliant
3	13.4	Establish a partition in the decontamination room between the clean set down area and the hand washing sink and dedicate this sink for hand washing only. The overflow of the hand washing sink should be blanked off using a stainless steel plate and sealing it with anti-bacterial mastic. A specific hand washing basin with sensor or elbow operated taps should be installed on refurbishment of the decontamination room.	Review of the decontamination room evidenced that all aspects of this recommendation have been addressed.	Compliant
4	13.4	Provide dispensers for the paper hand towel rolls in the decontamination room. Cease the practice of decanting liquids/gels from larger containers to smaller ones with immediate effect.	Observations made and discussion with Mrs Saulters and a dental nurse evidenced that this recommendation has been addressed.	Compliant

5	13.4	Review the infection prevention and control policy to ensure it is reflective of the arrangements in the practice.	Review of the infection prevention and control policy evidenced that this recommendation has been addressed.	Compliant
---	------	---	--	-----------

10.0 Inspection Findings

10.1 Prevention of blood-borne virus exposure

STANDARD 13 – Prevention and Control of Infection (Safe and effective care) The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

Criteria Assessed:

11.2 You receive care and treatment from a dental team (including temporary members) who have undergone appropriate checks before they start work in the service.

13.2 Your dental service adheres to the appropriate infection control policies and procedures in line with current best practice and legislation.

13.3 Your dental service has systems in place, including induction and ongoing training, to make sure these policies and procedures are known, and are being appropriately applied to the service at all times.

Inspection Findings:

Mrs Saulters rated the practice arrangements for the prevention of blood-borne virus exposure as compliant on the self-assessment.

The practice has a policy and procedure in place for the prevention and management of bloodborne virus exposure, including management of spillages, sharps and inoculation incidents in accordance with national guidance.

Review of documentation and discussion with Mrs Saulters and staff evidenced that:

- the prevention and management of blood-borne virus exposure is included in the staff induction programme;
- staff training has been provided for clinical staff; and
- all recently appointed staff have received an occupational health check.

Records are retained regarding the Hepatitis B immunisation status of some clinical staff but not all and a recommendation was made in this regard.

Discussion with staff confirmed that staff are aware of the policies and procedures in place for the prevention and management of blood-borne virus exposure.

Observations made and discussion with staff evidenced that sharps are appropriately handled. Sharps boxes are wall mounted, appropriately used, signed and dated on assembly and final closure. Used sharps boxes are locked with the integral lock and are collected by the registered waste contactor from the point of use on a regular basis.

Discussion with staff and review of documentation evidenced that arrangements are in place for the management of a sharps injury, including needle stick injury. Staff are aware of the actions to be taken in the event of a sharps injury.

Provider's overall assessment of the dental practice's compliance level against the standard assessed	Compliant
Inspector's overall assessment of the dental practice's compliance level against the standard assessed	Substantially compliant

10.2 Environmental design and cleaning

STANDARD 13 – Prevention and Control of Infection (Safe and effective care) The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

Criterion Assessed:

13.1 Your dental service's premises are clean.

Inspection Findings:

Mrs Saulters rated the practice arrangements for environmental design and cleaning as substantially compliant on the self-assessment.

The practice has a policy and procedure in place for cleaning and maintaining the environment.

The inspector undertook a tour of the premises which were found to be maintained to a good standard of cleanliness. The patient toilet is in need of repainting however, Mrs Saulters has plans to address this in the near future. Mrs Saulters also plans to refurbish the staff toilet facility.

The inspector reviewed two of the three dental surgeries, a newly established surgery which has not yet been operationalised and the decontamination room. Clinical and decontamination areas were tidy and uncluttered and work surfaces were intact and easy to clean. The floor coverings in the new dental surgery and the decontamination room are coved and sealed at the edges respectively. The floor coverings in the two surgeries observed were not sealed at the edges or where cabinetry meets the flooring and both had carpeted areas. Mrs Saulters confirmed that the third surgery also has a carpeted area. A recommendation was made that a refurbishment programme should be established to ensure all surgery floors are impervious and easy to clean. In the interim the vinyl flooring in surgeries should be sealed where it meets the walls and where cabinetry meets the flooring. Fixtures, fittings and equipment were free from damage, dust and visible dirt. Two large tears were identified in one dental chair. These were covered with barrier film and staff confirmed that the barrier film was replaced between each patient in order to reduce the risk of infection. A recommendation was made that arrangements should be established for the repair/recovering of any torn dental chairs.

Discussion with staff confirmed that appropriate arrangements are in place for cleaning including:

- Equipment surfaces, including the dental chair, are cleaned between each patient;
- Daily cleaning of floors, cupboard doors and accessible high level surfaces;
- Weekly/monthly cleaning schedule;
- Cleaning equipment is colour coded;
- Cleaning equipment is stored in a non-clinical area; and
- Dirty water is disposed of at an appropriate location.

Discussion with staff and review of submitted questionnaires confirmed that staff had received relevant training to undertake their duties.

The practice has a local policy and procedure for spillage in accordance with the Control of Substances Hazardous to Health (COSHH) and staff spoken with demonstrated awareness of this.

Provider's overall assessment of the dental practice's compliance	Substantially
level against the standard assessed	Compliant
Inspector's overall assessment of the dental practice's compliance level against the standard assessed	Substantially Compliant

10.3 Hand Hygiene

STANDARD 13 – Prevention and Control of Infection (Safe and effective care) The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

Criteria Assessed:

13.2 Your dental service adheres to the appropriate infection control policies and procedures in line with current best practice and legislation.

13.3 Your dental service has systems in place, including induction and ongoing training, to make sure these policies and procedures are known, and are being appropriately applied to the service at all times.

Inspection Findings:

Mrs Saulters rated the practice arrangements for hand hygiene as compliant on the selfassessment.

The practice has a hand hygiene policy and procedure in place.

Staff confirmed that hand hygiene is included in the induction programme and that hand hygiene training is updated periodically.

Discussion with staff confirmed that hand hygiene is performed before and after each patient contact and at appropriate intervals. Observations made evidenced that clinical staff had short clean nails and jewellery such as wrist watches and stoned rings were not worn in keeping with good practice.

Dedicated hand washing basins are available in the dental surgeries and the decontamination room and adequate supplies of liquid soap, paper towels and disinfectant rub/gel were available. The hand wash basin in one surgery had an overflow and a recommendation was made that this should be blanked off with a stainless steel plate sealed with antibacterial mastic. Staff confirmed that nail brushes and bar soap are not used in the hand hygiene process in keeping with good practice.

The inspector observed that laminated /wipe-clean posters promoting hand hygiene were on display in dental surgeries, the decontamination room and the staff toilet facility. The inspector suggested that a poster promoting hand hygiene is also displayed in the patient toilet facility.

Provider's overall assessment of the dental practice's compliance level against the standard assessed	Compliant
Inspector's overall assessment of the dental practice's compliance level against the standard assessed	Substantially compliant

10.4 Management of Dental Medical Devices

STANDARD 13 – Prevention and Control of Infection (Safe and effective care) The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

Criterion Assessed:

13.4 Your dental service meets current best practice guidance on the decontamination of reusable dental and medical instruments.

Inspection Findings:

Mrs Saulters rated the practice approach to the management of dental medical devices as compliant on the self-assessment.

The practice has an infection control policy that includes procedures for the use, maintenance, service and repair of all medical devices.

The inspector reviewed the written scheme for the prevention of legionella contamination in water pipes and other water lines and discussion with staff confirmed that this is adhered to.

Staff confirmed that impression materials, prosthetic and orthodontic appliances are decontaminated prior to despatch to laboratory and before being placed in the patient's mouth.

Observations made and discussion with staff confirmed that DUWLs are appropriately managed. This includes that:

- Filters are cleaned/replaced as per manufacturer's instructions;
- An independent bottled-water system is used to dispense distilled water to supply the DUWLs;
- Self-contained water bottles are flushed and re-filled with distilled water treated with disinfectant in accordance with manufacturer's guidance;
- DUWLs are flushed at the start of each working day and between every patient;
- DUWLs and handpieces are fitted with anti-retraction valves; and
- DUWLs are purged using disinfectant as per manufacturer's recommendations.

Provider's overall assessment of the dental practice's compliance level against the standard assessed	Compliant
Inspector's overall assessment of the dental practice's compliance level against the standard assessed	Compliant

10.5 Personal Protective Equipment

STANDARD 13 – Prevention and Control of Infection (Safe and effective care) The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

Criterion Assessed:

13.2 Your dental service adheres to the appropriate infection control policies and procedures in line with current best practice and legislation.

13.3 Your dental service has systems in place, including induction and ongoing training, to make sure these policies and procedures are known, and are being appropriately applied to the service at all times.

Inspection Findings:

Mrs Saulters rated the practice approach to the management of personal protective equipment (PPE) as compliant on the self-assessment.

The practice has a policy and procedure in place for the use of PPE and staff spoken with demonstrated awareness of this. Staff confirmed that the use of PPE is included in the induction programme.

Observations made and discussion with staff evidenced that PPE was readily available and in use in the practice.

Discussion with staff confirmed that:

- Hand hygiene is performed before donning and following the removal of disposable gloves;
- Single use PPE is disposed of appropriately after each episode of patient care;
- Heavy duty gloves are available for domestic cleaning and decontamination procedures where necessary; and
- Eye protection for staff and patients is decontaminated after each episode.

Staff confirmed that they were aware of the practice uniform policy.

Provider's overall assessment of the dental practice's compliance level against the standard assessed	Compliant
Inspector's overall assessment of the dental practice's compliance level against the standard assessed	Compliant

10.6 Waste

STANDARD 13 – Prevention and Control of Infection (Safe and effective care) The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

Criterion Assessed:

13.2 Your dental service adheres to the appropriate infection control policies and procedures in line with current best practice and legislation.

13.3 Your dental service has systems in place, including induction and ongoing training, to make sure these policies and procedures are known, and are being appropriately applied to the service at all times..

Inspection Findings:

Mrs Saulters rated the practice approach to the management of waste as compliant on the selfassessment.

The practice has a policy and procedure in place for the management and disposal of waste in keeping with HTM 07-01. Staff confirmed that the management of waste is included in the induction programme and that waste management training is updated periodically.

Review of documentation confirmed that contracted arrangements are in place for the disposal of waste by a registered waste carrier and relevant consignment notes are retained in the practice for at least three years.

Observations made and discussion with staff confirmed that staff are aware of the different types of waste and appropriate disposal streams.

Waste bins in surgeries and the decontamination room are not pedal operated and a recommendation was made in this regard.

Appropriate arrangements are in place in the practice for the storage and collection of general and clinical waste, including sharps waste.

The inspector observed adequate provision of sharps containers throughout the practice. These were being appropriately managed as discussed in section 10.1 of the report. Mrs Saulters confirmed that purple lidded sharps boxes for pharmaceutical waste have been ordered.

Provider's overall assessment of the dental practice's compliance level against the standard assessed	Compliant
Inspector's overall assessment of the dental practice's compliance level against the standard assessed	Compliant

10.7 Decontamination

STANDARD 13 – Prevention and Control of Infection (Safe and effective care) The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.

Criterion Assessed: 13.4

Your dental service meets current best practice guidance on the decontamination of reusable dental and medical instruments.

Inspection Findings:

Mrs Saulters rated the decontamination arrangements of the practice as compliant on the selfassessment.

A decontamination room separate from patient treatment areas and dedicated to the decontamination process is available.

Appropriate equipment, including a washer disinfector and two steam sterilisers have been provided to meet the practice requirements. Mrs Saulters advised that it also her intention to provide a second washer disinfector in the near future to meet the anticipated additional need generated from the additional surgery.

Review of documentation evidenced that equipment used in the decontamination process has been appropriately validated.

Review of equipment logbooks evidenced that periodic tests are undertaken and recorded in keeping with HTM 01-05.

11.0 Additional Areas Examined

11.1 Staff Consultation/Questionnaires

During the course of the inspection, the inspector spoke with a dental nurse and two dentists. Questionnaires were also provided to staff prior to the inspection by the practice on behalf of the RQIA. Nine were returned to RQIA within the timescale required.

Review of submitted questionnaires and discussion with staff evidenced that staff were knowledgeable regarding the inspection theme and that they have received training appropriate to their relevant roles. Staff confirmed that they are familiar with the practice policies and procedures and have received infection prevention and control training. Clinical staff also confirmed that they have been immunised against Hepatitis B.

11.2 Patient Consultation

Mrs Saulters confirmed on the submitted self-assessment that arrangements are in place for consultation with patients, at appropriate intervals, that feedback provided by patients has been used by the service to improve and that results of the consultation have been made available to patients. The inspector reviewed the summary of the most recent patient satisfaction survey completed in April 2014.

11.3 Registration Status

The practice is currently registered for three dental chairs. Mrs Saulters has converted an area in the practice to provide a fourth dental surgery. Mrs Saulters confirmed this will not made operational until application of variation has been submitted to RQIA to increase the number of registered dental chairs from three to four. The inspector made arrangements following the inspection for the application of variation to be provided to Mrs Saulters.

Review of the additional surgery evidenced that it has been finished to a high standard and is fully equipped. Flooring is coved and sealed at the edges and a dedicated hand wash basin is provided. A critical examination of the x-ray unit was carried out by the RPA on 29 January 2014 and review of the PRA report evidenced that no recommendations were made in this regard.

Review of documentation evidenced that the appropriate building control approval was submitted.

Following the inspection, the inspector spoke with an estates inspector who advised that prior to the registration of this fourth dental chair being recommended the following should be addressed:

- A copy of the building control completion certificate should be forwarded to RQIA
- A copy of the electrical installation certificate should be submitted to RQIA

• Confirmation should be provided that the fire risk assessment and the legionella risk assessment have been updated to include the new arrangements in the practice

A recommendation was made in this regard. On receipt of the application of variation and the supporting information as noted above the registration of this fourth dental chair will be recommended. This information was provided to Mrs Saulters by email on 15 August 2014.

12.0 Quality Improvement Plan

The details of the Quality Improvement Plan appended to this report were discussed with Mrs Jillian Saulters as part of the inspection process.

The timescales for completion commence from the date of inspection.

The registered provider/manager is required to record comments on the Quality Improvement Plan.

Matters to be addressed as a result of this inspection are set in the context of the current registration of your premises. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises the RQIA would apply standards current at the time of that application.

Enquiries relating to this report should be addressed to:

Emily Campbell The Regulation and Quality Improvement Authority 9th Floor Riverside Tower 5 Lanyon Place Belfast BT1 3BT

Quality Improvement Plan

Announced Inspection

Donnelly Dental

5 August 2014

The areas where the service needs to improve, as identified during this inspection visit, are detailed in the inspection report and Quality Improvement Plan.

The specific actions set out in the Quality Improvement Plan were discussed with Mrs Jillian Saulters either during or after the inspection visit.

Any matters that require completion within 28 days of the inspection visit have also been set out in separate correspondence to the registered persons.

Registered providers/managers should note that failure to comply with regulations may lead to further enforcement and/or prosecution action as set out in The HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003.

It is the responsibility of the registered provider/manager to ensure that all requirements and recommendations contained within the Quality Improvement Plan are addressed within the specified timescales.

Matters to be addressed as a result of this inspection are set in the context of the current registration of your premises. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises the RQIA would apply standards current at the time of that application.

	MMENDATIONS		_					
	These recommendations are based on The Minimum Standards for Dental Care and Treatment (2011), research or recognised sources. They promote current good practice and if adopted by the registered person may enhance service, quality and delivery.							
NO.	MINIMUM STANDARD REFERENCE	RECOMMENDATIONS	NUMBER OF TIMES STATED	DETAILS OF ACTION TAKEN BY REGISTERED PERSON(S)	TIMESCALE			
1	13	Records should be retained regarding the Hepatitis B immunisation status of all clinical staff. Ref 10.1	One	UNDERTAKEN	Three months			
2	13	A refurbishment programme should be established to ensure all surgery floors are impervious and easy to clean. In the interim the vinyl flooring in surgeries should be sealed where it meets the walls and where cabinetry meets the flooring. Ref 10.2	One	UNDERTAKEN	Three months			
3	13	Arrangements should be established for the repair/recovering of any torn dental chairs. Ref 10.2	One	UNDERTAKEN	Three months			
4	13	The overflow of the hand wash basin in the identified surgery should be blanked off with a stainless steel plate sealed with antibacterial mastic. Ref 10.3	One	UNDERTAKEN	Three months			
5	13	Waste bins in surgeries and the decontamination room should be pedal operated. Ref 10.6	One	UNDERTAKEN	Two months			

6	14	 The following information should be provided in association with the application of variation for the fourth dental chair: A copy of the building control completion certificate should be forwarded to RQIA A copy of the electrical installation certificate should be submitted to RQIA Confirmation should be provided that the fire risk assessment and the legionella risk assessment have been updated to include the new arrangements in the practice 	One	UNDERTAKEN	On submission of application of variation
		Ref 11.3			

Please complete the following table to demonstrate that this Quality Improvement Plan has been completed by the registered manager and approved by the responsible person / identified responsible person and return to independent.healthcare@rgia.org.uk

1 Prevention of bloodborne virus exposure						
Inspection criteria (Numbers in brackets reflect HTM 01-05/policy reference)	Yes	No	If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.			
1.1 Does the practice have a policy and procedure/s in place for the prevention and management of blood borne virus exposure, including management of spillages, sharps and inoculation incidents in accordance with national guidance? (2.6)	У					
1.2 Have all staff received training in relation to the prevention and management of blood-borne virus exposure? (1.22, 9.1, 9.5)	У					
1.3 Have all staff at risk from sharps injuries received an Occupational Health check in relation to risk reduction in blood- borne virus transmission and general infection? (2.6)	У					
1.4 Can decontamination and clinical staff demonstrate current immunisation with the hepatitis B vaccine e.g. documentation? (2.4s, 8.8)	У					
1.5 Are chlorine-releasing agents available for blood /bodily fluid spillages and used as per manufacturer's instructions? (6.74)	У					
1.6 Management of sharps Any references to sharps management should be read in conjunction with The Health and Safety (Sharp Instruments in Healthcare) Regulations (Northern Ireland) 2013 Are sharps containers correctly assembled?	У					

1.7 Are in-use sharps containers labelled with date, locality and a signature?	У			
1.8 Are sharps containers replaced when filled to the indicator mark?	У			
1.9 Are sharps containers locked with the integral lock when filled to the indicator mark? Then dated and signed?	У			
1.10 Are full sharps containers stored in a secure facility away from public access?	У			
1.11 Are sharps containers available at the point of use and positioned safely (e.g. wall mounted)?	У			
1.12 Is there a readily-accessible protocol in place that ensures staff are dealt with in accordance with national guidance in the event of blood-borne virus exposure? (2.6)	У			
1.13 Are inoculation injuries recorded?	У			
1.14 Are disposable needles and disposable syringes discarded as a single unit?	У			
Provider's level of compliance			Compliant	

2 Environmental design and cleaning						
Inspection criteria	Yes	No	If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.			
2.1 Does the practice have a policy and procedure for cleaning and maintaining the environment? (2.6, 6.54)	У					
2.2 Have staff undertaking cleaning duties been fully trained to undertake such duties? (6.55)	у					
2.3 Is the overall appearance of the clinical and decontamination environment tidy and uncluttered? (5.6)	У					
2.4 Is the dental chair cleaned between each patient? (6.46, 6.62)	У					
2.5 Is the dental chair free from rips or tears? (6.62)		n	tear in dental chair covered by adhesive covering which is replaced between patients. Chair will be reupholstered during future update.			
2.6 Are all surfaces i.e. walls, floors, ceilings, fixtures and fittings and chairs free from damage and abrasion? (6.38)	У					
2.7 Are all work-surface joints intact, seamless, with no visible damage? (6.46, 6.47)	у					
2.8 Are all surfaces i.e. walls, floors, ceilings, fixtures and fittings and chairs free from dust and visible dirt? (6.38)	У					
2.9 Are the surfaces of accessible ventilation fittings/grills cleaned at a minimum weekly? (6.64)	У					
2.10 Are all surfaces including flooring in clinical and decontamination areas impervious and easy to clean? (6.46, 6.64)	У					

			a succed a days a will be a several stand where
2.11 Do all floor coverings in clinical and decontamination areas have coved edges that are sealed and impervious to moisture? (6.47)		n	coved edges will be completed when flooring replaced
2.12 Are keyboard covers or "easy- clean" waterproof keyboards used in clinical areas? (6.66)			n/a
2.13 Are toys provided easily cleaned? (6.73)	У		
2.14 Confirm free standing or ceiling mounted fans are not used in clinical/ decontamination areas? (6.40)		n	
2.15 Is cleaning equipment colour- coded, in accordance with the National Patient Safety Agency recommendations as detailed in HTM 01-05? (6.53)	У		
2.16 Is cleaning equipment stored in a non-clinical area? (6.60)	У		
2.17 Where disposable single-use covers are used, are they discarded after each patient contact? (6.65)	У		
2.18 Are the surfaces of equipment cleaned between each patient (E.g. work surfaces, dental chairs, curing lamps, delivery units, inspection handles and lights, spittoons, external surface of aspirator and X-ray heads)? (6.62)	У		
2.19 Are all taps, drainage points, splash backs, sinks, aspirators, drains, spittoons, cleaned after every session with a surfactant/detergent? (6.63)	У		
2.20 Are floors, cupboard doors and accessible high level surfaces and floors cleaned daily? (6.63)	У		

2.21 Is there a designated area for the disposal of dirty water, which is outside the kitchen, clinical and decontamination areas; for example toilet, drain or slop- hopper (slop hopper is a device used for the disposal of liquid or solid waste)?	У		
2.22 Does the practice have a local policy and procedure/s for spillage in accordance with COSHH? (2.4d, 2.6)	У		
Provider's level of compliance			Substantially compliant

3 Hand hygiene	3 Hand hygiene					
Inspection criteria	Yes	Νο	If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.			
3.1 Does the practice have a local policy and procedure for hand hygiene? (2.6 Appendix 1)	У					
3.2 Is hand hygiene an integral part of staff induction? (6.3)	У					
3.3 Is hand hygiene training provided periodically throughout the year? (1.22, 6.3)	У					
3.4 Is hand hygiene carried out before and after every new patient contact? (Appendix 1)	У					
 3.5 Is hand hygiene performed before donning and following the removal of gloves? (6.4, Appendix 1) 	У					
3.6 Do all staff involved in any clinical and decontamination procedures have short nails that are clean and free from nail extensions and varnish? (6.8, 6.23, Appendix 1)	у					
3.7 Do all clinical and decontamination staff remove wrist watches, wrist jewellery, rings with stones during clinical and decontamination procedures? (6.9, 6.22)	У					
3.8 Are there laminated or wipe- clean posters promoting hand hygiene on display? (6.12)	у					
3.9 Is there a separate dedicated hand basin provided for hand hygiene in each surgery where clinical practice takes place? (2.4g, 6.10)	У					

	r	r	Inspection ID. 10340 /RQIA ID. 11403
3.10 Is there a separate dedicated hand basin available in each room where the decontamination of equipment takes place? (2.4u, 5.7, 6.10)	у		
3.11 Are wash-hand basins free from equipment and other utility items? (2.4g, 5.7)	У		
3.12 Are hand hygiene facilities clean and intact (check sinks taps, splash backs, soap and paper towel dispensers)? (6.11, 6.63)	У		
3.13 Do the hand washing basins provided in clinical and decontamination areas have :	У		
no plug; andno overflow.			
Lever operated or sensor operated taps.(6.10)			
3.14 Confirm nailbrushes are not used at wash-hand basins? (Appendix 1)		n	
3.15 Is there good quality, mild liquid soap dispensed from single-use cartridge or containers available at each wash-hand basin?	У		
Bar soap should not be used. (6.5, Appendix 1)			
3.16 Is skin disinfectant rub/gel available at the point of care? (Appendix 1)	У		
 3.17 Are good quality disposable absorbent paper towels used at all wash-hand basins? (6.6, Appendix 1) 	у		

3.18 Are hand-cream dispensers with disposable cartridges available for all clinical and decontamination staff? (6.7, Appendix 1)	У		
Provider's level of compliance			Compliant

4 Management of dental medical devices						
Inspection criteria	Yes	No	If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.			
4.1 Does the practice have an infection control policy that includes procedures for the use, maintenance, service and repair of all medical devices? (1.18, 2.4a, 2.6, 2.7, 3.54)	У					
4.2 Has the practice carried out a risk assessment for legionella under the Health and Safety Commission's "Legionnaires' disease - the control of legionella bacteria in water systems Approved Code of Practice and Guidance" (also known as L8)? (6.75-6.90, 19.0)	у					
4.3 Has the practice a written scheme for prevention of legionella contamination in water pipes and other water lines?(6.75, 19.2)	У					
4.4 Impression material, prosthetic and orthodontic appliances: Are impression materials, prosthetic and orthodontic appliances decontaminated in the surgery prior to despatch to laboratory in accordance with manufacturer's instructions?(7.0)	У					
4.5 Impression material, prosthetic and orthodontic appliances: Are prosthetic and orthodontic appliances decontaminated before being placed in the patient's mouth? (7.1b)	У					
4.6 Dental Unit Water lines (DUWLs): Are in-line filters cleaned/replaced as per manufacturer's instructions?(6.89, 6.90)	У					

			Inspection ID: 18340 /RQIA ID: 11483
4.7 Dental Unit Water lines (DUWLs): Is there an independent bottled-water system used to dispense distilled, reverse osmosis (RO) or sterile water to supply the DUWL? (6.84)	У		
4.8 Dental Unit Water lines (DUWLs): For dental surgical procedures involving irrigation; is a separate single-use sterile water source used for irrigation? (6.91)			n/a
4.9 Dental Unit Water lines (DUWLs): Are the DUWLs drained down at the end of every working day?(6.82)		n	manufacturers guidelines are adhered to.
4.10 Dental Unit Water lines (DUWLs): Are self-contained water bottles (bottled water system) removed, flushed with distilled or RO water and left open to the air for drying on a daily basis, and if necessary overnight, and in accordance with manufacturer's guidance? (6.83)		n	manufacturers guidelines adhered to.
4.11 Dental Unit Water lines (DUWLs): Where bottled water systems are not used is there a physical air gap separating dental unit waterlines from mains water systems. (Type A)?(6.84)			n/a
4.12 Dental Unit Water lines (DUWLs): Are DUWLs flushed for a minimum of 2 minutes at start of each working day and for a minimum of 20-30 seconds between every patient? (6.85)	У		
4.13 Dental Unit Water lines (DUWLs): Are all DUWL and hand pieces fitted with anti-retraction valves? (6.87)	У		
4.14 Dental Unit Water lines (DUWLs): Are DUWLs either disposable or purged using manufacturer's recommended disinfectants? (6.84-6.86)	У		

4.15 Dental Unit Water lines (DUWLs): Are DUWL filters changed according to the manufacturer's guidelines? (6.89)	У		
Provider's level of compliance		Compliant	

5 Personal Protective Equipment					
Inspection criteria	Yes	No	If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.		
5.1 Does the practice have a policy and procedures for the use of personal protective equipment? (2.6, 6.13)	У				
5.2 Are staff trained in the use of personal protective equipment as part of the practice induction? (6.13)	У				
5.3 Are powder-free CE marked gloves used in the practice? (6.20)	У				
5.4 Are alternatives to latex gloves available? (6.19, 6.20)	У				
5.5 Are all single-use PPE disposed of after each episode of patient care? (6.21, 6.25, 6.36c)	у				
5.6 Is hand hygiene performed before donning and following the removal of gloves? (6.4 Appendix 1)	У				
5.7 Are clean, heavy duty household gloves available for domestic cleaning and decontamination procedures where necessary? (6.23)	У				
5.8 Are heavy-duty household gloves washed with detergent and hot water and left to dry after each use? (6.23)	У				
5.9 Are heavy-duty household gloves replaced weekly or more frequently if worn or torn? (6.23)	у				

5.10 Are disposable plastic aprons worn during all decontamination processes or clinical procedures where there is a risk that clothing/uniform may become contaminated? (6.14, 6.24-6.25)	У			
5.11 Are single-use plastic aprons disposed of as clinical waste after each procedure? (6.25)	У			
5.12 Are plastic aprons, goggles, masks or face shields used for any clinical and decontamination procedures where there is a danger of splashes? (6.14, 6.26- 6.29)	у			
5.13 Are masks disposed of as clinical waste after each use? (6.27, 6.36)	У			
5.14 Are all items of PPE stored in accordance with manufacturers' instructions? (6.14)	У			
5.15 Are uniforms worn by all staff changed at the end of each day and when visibly contaminated? (6.34)	У			
5.16 Is eye protection for staff used during decontamination procedures cleaned after each session or sooner if visibly contaminated? (6.29)	у			
5.17 Is eye protection provided for the patient and staff decontaminated after each episode of patient care? (6.29)	У			
Provider's level of compliance			Compliant	

6 Waste						
Inspection criteria	Yes	No	If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 07-01.			
6.1 Does the practice have a policy and procedure/s for the management and disposal of waste? (2.6, 6.1 (07-01) 6.4 (07- 01))	У					
6.2 Have all staff attended induction and on-going training in the process of waste disposal? (1.22, 6.43 (07-01) 6.51 (07-01))	У					
6.3 Is there evidence that the waste contractor is a registered waste carrier? (6.87 (07-01) 6.90 (07-01))	У					
6.4 Are all disposable PPE disposed of as clinical waste? (6.26, 6.27, 6.36, HTM 07-01 PEL (13) 14)	у					
6.5 Are orange bags used for infectious Category B waste such as blooded swabs and blood contaminated gloves? (HTM 07-01, PEL (13) 14, 5.39 (07-01) Chapter 10 - Dental 12 (07-01))	У					
6.6 Are black/orange bags used for offensive/hygiene waste such as non-infectious recognisable healthcare waste e.g. gowns, tissues, non-contaminated gloves, X-ray film, etc, which are not contaminated with saliva, blood, medicines, chemicals or amalgam? (HTM 07-01, PEL (13) 14, 5.50 (07-01) Chapter 10-Dental 8 (07-01))	У					
6.8 Are black/clear bags used for domestic waste including paper towels? (HTM 07-01, PEL (13) 14, 5.51 (07-01))	У					

			Inspectic	on ID: 18340 /RQIA ID: 11483
6.9 Are bins foot operated or sensor controlled, lidded and in good working order? (5.90 (07-01))		n	as provided b	y waste disposal company
6.10 Are local anaesthetic cartridges and other Prescription Only Medicines (POMs) disposed of in yellow containers with a purple lid that conforms to BS 7320 (1990)/UN 3291? (HTM 07-01 PEL (13) 14, Chapter 10 - Dental 11 (07-01))		n	currently on c	order
6.11 Are clinical waste sacks securely tied and sharps containers locked before disposal? (5.87 (07-01))	У			
6.12 Are all clinical waste bags and sharps containers labelled before disposal? (5.23 (07-01), 5.25 (07-01))	У			
6.13 Is waste awaiting collection stored in a safe and secure location away from the public within the practice premises? (5.33 (07-01), 5.96 (07-01))	у			
6.14 Are all clinical waste bags fully described using the appropriate European Waste Catalogue (EWC) Codes as listed in HTM 07-01 (Safe Management of Healthcare Waste)?(3.32 (07-01))	У			
6.15 Are all consignment notes for all hazardous waste retained for at least 3 years?(6.105 (07-01))	У			
6.16 Has the practice been assured that a "duty of care" audit has been undertaken and recorded from producer to final disposal? (6.1 (07-01), 6.9 (07-01))	У			
6.17 Is there evidence the practice is segregating waste in accordance with HTM 07-01? (5.86 (07-01), 5.88 (07-01), 4.18 (07-01))	У			
Provider's level of compliance				Compliant

7 Decontamination					
Inspection criteria	Yes	No	If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.		
7.1 Does the practice have a room separate from the patient treatment area, dedicated to decontamination meeting best practice standards? (5.3–5.8)	У				
7.2 Does the practice have washer disinfector(s) in sufficient numbers to meet the practice requirements? (PEL(13)13)	У				
7.3 Are all reusable instruments being disinfected using the washer disinfector? (PEL(13)13)	у				
7.4 Does the practice have steam sterilisers in sufficient numbers to meet the practice requirements?	у				
7.5 a Has all equipment used in the decontamination process been validated?	у				
7.5 b Are arrangements in place to ensure that all equipment is validated annually? (1.9, 11.1, 11.6, 12,13, 14.1, 14.2, 15.6)	у				
7.6 Have separate log books been established for each piece of equipment?	У				
Does the log book contain all relevant information as outlined in HTM01-05? (11.9)	у				

7.7 a Are daily, weekly, monthly periodic tests undertaken and recorded in the log books as outlined in HTM 01-05? (12, 13, 14)	У		
7.7 b Is there a system in place to record cycle parameters of equipment such as a data logger?	у		
Provider's level of compliance			Compliant

Please provide any comments you wish to add regarding good practice

Appendix 1

Name of practice: Donnelly Dental

Declaration on consultation with patients

The need for consultation with patients is outlined in The Independent Health Care Regulations (Northern Ireland) 2005, Regulation 17(3) and The Minimum Standards for Dental Care and Treatment 2011, Standard 9.

1 Do you have a system in place for consultation with patients, undertaken at appropriate intervals?

Yes	У	No	
If no or	other please giv	e details:	

2 If appropriate has the feedback provided by patients been used by the service to improve?

3 Are the results of the consultation made available to patients?

No

Yes y No
