## **2.0 Introduction**

The Regulation and Quality Improvement Authority (RQIA) is empowered under The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003 to inspect dental practices providing private dental care and treatment. A minimum of one inspection per year is required.

This is a report of the announced inspection to assess the quality of services being provided. The report details the extent to which the standards measured during inspection were met.

## **3.0 Purpose of the Inspection**

The purpose of this inspection was to consider whether the service provided to patients was in accordance with their assessed needs and preferences and was in compliance with legislative requirements, minimum standards and other good practice indicators. This was achieved through a process of analysis and evaluation of available evidence.

RQIA not only seeks to ensure that compliance with regulations and standards is met but also aims to use inspection to support providers in improving the quality of services. For this reason, inspection involves in-depth examination of an identified number of aspects of service provision.

The aims of the inspection were to examine the policies, practices and monitoring arrangements for the provision of dental care, and to determine the provider's compliance with the following:

- The HPSS (Quality, Improvement and Regulation) (Northern Ireland) Order 2003;
- The Independent Health Care Regulations (Northern Ireland) 2005;
- The Regulation and Improvement Authority (Independent Health Care) (Fees and Frequency of Inspections) (Amendment) Regulations (Northern Ireland) 2011;
- The Minimum Standards for Dental Care and Treatment 2011; and
- Health Technical Memorandum HTM 01-05: Decontamination in Primary Care Dental Practices and Professional Estates Letter (PEL) (13) 13.

Other published standards which guide best practice may also be referenced during the inspection process.

#### 4.0 Methods/Process

Committed to a culture of learning, the RQIA has developed an approach which uses self-assessment, a critical tool for learning, as a method for preliminary assessment of achievement of the Minimum Standards.

The inspection process has three key parts; self-assessment (including completion of self-declaration), pre-inspection analysis and the inspection visit by the inspector.

Specific methods/processes used in this inspection include the following:

- a self-assessment was submitted prior to the inspection and has been analysed;
- discussion with Ms Rita O'Boyle, registered provider;
- examination of relevant records;
- consultation with relevant staff;
- tour of the premises; and
- evaluation and feedback.

Any other information received by RQIA about this practice has also been considered by the inspector in preparing for this inspection.

#### 5.0 Consultation Process

During the course of the inspection, the inspector spoke with staff on duty. Questionnaires were provided to staff prior to the inspection by the practice, on behalf of the RQIA to establish their views regarding the service. Matters raised by staff were addressed by the inspector during the course of this inspection:

|                              | <b>Number</b> |            |
|------------------------------|---------------|------------|
| <b>Discussion with staff</b> | 1             |            |
| <b>Staff Questionnaires</b>  | 10 issued     | 8 returned |

Prior to the inspection the registered person/s were asked, in the form of a declaration, to confirm that they have a process in place for consulting with service users and that a summary of the findings has been made available. The consultation process may be reviewed during this inspection.

## 6.0 Inspection Focus

The inspection sought to establish the level of compliance achieved with respect to the selected DHSSPS Minimum Standards for Dental Care and Treatment and a thematic focus incorporating selected standards and good practice indicators. An assessment on the progress in relation to the issues raised during and since the previous inspection was also undertaken.

In 2012 the DHSSPS requested that RQIA make compliance with best practice in local decontamination, as outlined in HTM 01-05 Decontamination in Primary Care Dental Premises, a focus for the 2013/14 inspection year.

The DHSSPS and RQIA took the decision to review compliance with best practice over two years. The focus of the two years is as follows:

- Year 1 – Decontamination – 2013/14 inspection year
- Year 2 - Cross infection control – 2014/15 inspection year

### **Standard 13 – Prevention and Control of Infection [Safe and effective care]**

**The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.**

The decontamination section of the Infection Prevention Society Audit tool, which has been endorsed by the Department of Health, was used as a framework for development of a self-assessment tool and for planned inspections during 2013/14.

The following sections of the 2013 edition of the Infection Prevention Society Audit tool, which has been endorsed by the Department of Health have been used as a framework for the development of a self-assessment tool and for planned inspections in 2014/15:

- Prevention of Blood-borne virus exposure;
- Environmental design and cleaning;
- Hand Hygiene;
- Management of Dental Medical Devices;
- Personal Protective Equipment; and
- Waste.

A number of aspects of the Decontamination section of the Audit tool have also been revisited.

RQIA have highlighted good practice guidance sources to service providers, making them available on our website where possible. Where appropriate, requirements will be made against legislation and recommendations will be made against DHSSPS Minimum Standards for Dental Care and Treatment (2011) and other recognised good practice guidance documents.

The registered provider/manager and the inspector have each rated the practice's compliance level against each section of the self-assessment.

The table below sets out the definitions that RQIA has used to categorise the service's performance:

| <b>Guidance - Compliance statements</b> |  |   |
|---|--|---|
| <b>Compliance statement</b>             | <b>Definition</b>  | <b>Resulting Action in Inspection Report</b>  |
| <b>0 - Not applicable</b>               |  | A reason must be clearly stated in the assessment contained within the inspection report.   |
| <b>1 - Unlikely to become compliant</b> |  | A reason must be clearly stated in the assessment contained within the inspection report.   |
| <b>2 - Not compliant</b>                | Compliance could not be demonstrated by the date of the inspection.  | In most situations this will result in a requirement or recommendation being made within the inspection report.                           |
| <b>3 - Moving towards compliance</b>    | Compliance could not be demonstrated by the date of the inspection. However, the service could demonstrate a convincing plan for full compliance by the end of the Inspection year.      | In most situations this will result in a requirement or recommendation being made within the inspection report.                           |
| <b>4 – Substantially Compliant</b>      | Arrangements for compliance were demonstrated during the inspection. However, appropriate systems for regular monitoring, review and revision are not yet in place.                      | In most situations this will result in a recommendation, or in some circumstances a requirement, being made within the inspection report. |
| <b>5 – Compliant</b>                    | Arrangements for compliance were demonstrated during the inspection. There are appropriate systems in place for regular monitoring, review and any necessary revisions to be undertaken. | In most situations this will result in an area of good practice being identified and comment being made within the inspection report.     |

## 7.0 Profile of Service

Hughes O'Boyle Dental Surgery, Newcastle, is situated within a former residential property which has been converted and extended to accommodate a dental practice. The practice is located in Newcastle town centre.

On street car parking is available outside the practice and public car parking is available nearby for patients.

The establishment is accessible for patients with a disability as two surgeries and disabled access toilets are available on the ground floor.

Hughes O'Boyle Dental Surgery also own a practice in Newry, County Down. Ms Rita O'Boyle is the registered provider of Hughes O'Boyle Dental Surgery Newcastle and Mr Seamus Hughes is the registered provider of Hughes O'Boyle Dental Surgery Newry.

Hughes O'Boyle Dental Surgery, Newcastle, operates four dental chairs, providing both private and NHS dental care. Two surgeries, waiting area, x-ray room, reception and disabled access toilets are available on the ground floor. The first floor accommodates two surgeries a waiting area and decontamination room.

Ms O'Boyle has been the registered provider of Hughes O'Boyle Dental Surgery, Newcastle since registration with RQIA in November 2012.

Ms O'Boyle is supported by associate dentists and a team of dental nurses and reception staff.

The establishment's statement of purpose outlines the range of services provided.

The practice is registered as an independent hospital (IH) providing dental treatment (DT).

## 8.0 Summary of Inspection

This announced inspection of Hughes O'Boyle Dental Surgery, Newcastle was undertaken by Philip Colgan on 11 November 2014 between the hours of 10:50 and 12:10. Ms O'Boyle was available during the inspection and for verbal feedback at the conclusion of the inspection.

The recommendations made as a result of the previous inspection were also examined. Observations and discussion demonstrated that these have been addressed. The detail of the action taken by Ms O'Boyle can be viewed in the section following this summary.

Prior to the inspection, Ms O'Boyle completed a self-assessment using the standard criteria outlined in the theme inspected. The comments provided by Ms O'Boyle in the self-assessment were not altered in any way by RQIA. The self-assessment is included as appendix one in this report.

Questionnaires were also issued to staff. Eight were returned to RQIA within the timescale required.

Review of submitted questionnaires and discussion with the dental nurse evidenced that staff were knowledgeable regarding the inspection theme and that they have received training appropriate to their relevant roles. The dental nurse confirmed that staff are familiar with the practice policies and procedures and have received training in infection prevention and control. Clinical staff confirmed that they have been immunised against Hepatitis B.

### Inspection Theme – Cross infection control

Dental practices in Northern Ireland have been directed by the DHSSPS, that best practice recommendations in the Health Technical Memorandum (HTM) 01-05, Decontamination in primary care dental practices, along with Northern Ireland amendments, should have been fully implemented by November 2012. HTM 01-05 was updated in 2013 and Primary Care Dental Practices were advised of this through the issue of Professional Estates Letter (PEL) (13) 13 on 01 October 2013. The PEL (13) 13 advised General Dental Practitioners of the publication of the 2013 version of HTM 01-05 and the specific policy amendments to the guidance that apply in Northern Ireland.

RQIA reviewed the compliance of the decontamination aspect of HTM 01-05 in the 2013/2014 inspection year. The focus of the inspection for the 2014/2015 inspection year is cross infection control. A number of aspects of the decontamination section of HTM 01-05 have also been revisited.

A copy of the 2013 edition of HTM 01-05 Decontamination in primary dental care practices is available at the practice for staff reference. Staff are familiar with best practice guidance outlined in the document and audit compliance on an ongoing basis.

The practice has a policy and procedure in place for the prevention and management of blood-borne virus exposure, including management of spillages, sharps and inoculation incidents in accordance with national guidance. Review of documentation and discussion with Ms O'Boyle and the dental nurse evidenced that appropriate arrangements are in place for the prevention and management of blood-borne virus exposure. The dental nurse confirmed that staff are aware of, and are adhering to, the practice policy in this regard. Sharps management at the practice was observed to be in line with best practice.

The premises were clean and tidy and clutter was kept to a minimum. Satisfactory arrangements are in place for the cleaning of the general environment and dental equipment.

The practice has a hand hygiene policy and procedure in place and the dental nurse demonstrated that good practice is adhered to in relation to hand hygiene. Dedicated hand washing basins are available in the appropriate locations. Information promoting hand hygiene is provided for staff and patients.

A written scheme for the prevention of legionella is available. Procedures are in place for the use, maintenance, service and repair of all medical devices. Observations made and discussion with the dental nurse confirmed that dental unit water lines (DUWLs) are appropriately managed.

The practice has a policy and procedure in place for the use of personal protective equipment (PPE) and the dental nurse spoken with demonstrated awareness of this.

Observations made confirmed that PPE was readily available and used appropriately by staff.

Appropriate arrangements were in place for the management of general and clinical waste, including sharps. Waste was appropriately segregated and suitable arrangements were in place for the storage and collection of waste by a registered waste carrier. Relevant consignment notes are retained in the practice for at least three years.

A decontamination room separate from patient treatment areas and dedicated to the decontamination process is available. Appropriate validated equipment, including a washer disinfectant, a DAC universal and two steam sterilisers have been provided to meet the practice requirements. Equipment logbooks evidenced that periodic tests are undertaken and recorded in keeping with HTM 01-05.

The evidence gathered through the inspection process concluded that Hughes O'Boyle Dental Surgery, Newcastle is compliant with this inspection theme.

Ms O'Boyle confirmed on the submitted self-assessment that arrangements are in place for consultation with patients at appropriate intervals, that feedback provided by patients has been used by the service to improve and that results of the consultation have been made available to patients.

No requirements or recommendations were made as a result of the announced inspection. Findings of the inspection can be found in the main body of the report.

The inspector wishes to thank Ms O'Boyle and staff for their helpful discussions, assistance and hospitality throughout the inspection process.

## 9.0 Follow-up on Previous Issues

| No | Minimum Standard Ref. | Recommendations  | Action Taken – as confirmed during this inspection  | Inspector's Validation of Compliance |
|----|-----------------------|--|---|--------------------------------------|
| 1  | 13                    | <p>Develop a DAC Universal logbook and steriliser logbooks to include the following:</p> <ul style="list-style-type: none"> <li>• details of the machine and location;</li> <li>• commissioning report;</li> <li>• daily/weekly test record sheets;</li> <li>• quarterly test record sheets (as appropriate);</li> <li>• annual service/validation certification;</li> <li>• fault history;</li> <li>• record to show staff have been trained in correct use of the machine; and relevant contacts e.g. service engineer.</li> <li>• the periodic tests should also include: the daily automatic control test for the DAC Universal and sterilisers</li> <li>• cleaning efficacy test and that strainers/filters have been cleaned for the DAC Universal.</li> </ul> | Review of documentation evidenced that this recommendation has been addressed.                | Compliant                            |
| 2  | 13                    | The decontamination policies and procedures should be further developed to reflect the new arrangements regarding the washer disinfectant and DAC Universal equipment.   | Discussion and review of documentation evidenced that this recommendation has been addressed. | Compliant                            |

## 10.0 Inspection Findings

### 10.1 Prevention of Blood-borne virus exposure

|  |  |
|--|--|
| <p><b>STANDARD 13 – Prevention and Control of Infection (Safe and effective care)</b><br/> <b>The dental service takes every reasonable precaution to make sure you are not exposed to risk of infection.</b></p>  |  |
| <p><b>Criteria Assessed:</b><br/> <b>11.2</b> You receive care and treatment from a dental team (including temporary members) who have undergone appropriate checks before they start work in the service.<br/> <b>13.2</b> Your dental service adheres to the appropriate infection control policies and procedures in line with current best practice and legislation.<br/> <b>13.3</b> Your dental service has systems in place, including induction and ongoing training, to make sure these policies and procedures are known, and are being appropriately applied to the service at all times.</p>   |  |
| <p><b>Inspection Findings:</b><br/> Ms O’Boyle rated the practice arrangements for the prevention of blood-borne virus exposure as compliant on the self-assessment.</p> <p>The practice has a policy and procedure in place for the prevention and management of blood-borne virus exposure, including management of spillages, sharps and inoculation incidents in accordance with national guidance.</p> <p>Review of documentation and discussion with the dental nurse evidenced that:</p> <ul style="list-style-type: none"> <li>• the prevention and management of blood-borne virus exposure is included in the staff induction programme;</li> <li>• staff training has been provided for clinical staff;</li> <li>• all recently appointed staff have received an occupational health check; and</li> <li>• records are retained regarding the Hepatitis B immunisation status of clinical staff.</li> </ul> <p>Discussion with the dental nurse confirmed that she was aware of the policies and procedures in place for the prevention and management of blood-borne virus exposure.</p> <p>Observations made and discussion with the dental nurse evidenced that sharps are appropriately handled. Sharps boxes are kept out of patient reach, appropriately used, signed and dated on assembly and final closure. Used sharps boxes are locked with the integral lock and stored ready for collection away from public access.</p> <p>Discussion with the dental nurse and review of documentation evidenced that arrangements are in place for the management of a sharps injury, including needle stick injury. The dental nurse was aware of the actions to be taken in the event of a sharps injury.</p> |  |

|   |                  |

| <p><b>Criterion Assessed:</b> 13.4<br/>         Your dental service meets current best practice guidance on the decontamination of reusable dental and medical instruments.</p>   |
| <p><b>Inspection Findings:</b><br/>         Ms O’Boyle rated the decontamination arrangements of the practice as compliant on the self-assessment.</p> <p>A decontamination room, separate from patient treatment areas and dedicated to the decontamination process, is available. Appropriate validated equipment, including a washer disinfecter, a DAC universal and two steam sterilisers have been provided to meet the practice requirements.</p> <p>Review of equipment logbooks evidenced that periodic tests are undertaken and recorded in keeping with HTM 01-05.</p> |

## **11.0 Additional Areas Examined**

### **11.1 Staff Consultation/Questionnaires**

During the course of the inspection, the inspector spoke with a dental nurse. Questionnaires were also issued to staff. Eight were returned to RQIA within the timescale required.

Review of submitted questionnaires and discussion with the dental nurse evidenced that staff were knowledgeable regarding the inspection theme and that they have received training appropriate to their relevant roles. The dental nurse confirmed that staff are familiar with the practice policies and procedures and have received training in infection prevention and control. Clinical staff confirmed that they have been immunised against Hepatitis B.

### **11.2 Patient Consultation**

Ms O'Boyle confirmed on the submitted self-assessment that arrangements are in place for consultation with patients at appropriate intervals, that feedback provided by patients has been used by the service to improve and that results of the consultation have been made available to patients.

## **12.0 Quality Improvement Plan**

The findings of this inspection were discussed with Ms O'Boyle as part of the inspection process.

This inspection resulted in no recommendations or requirements being made. The registered provider/manager is asked to sign the appropriate page confirming they are assured about the factual accuracy of the content of the report.

Matters to be addressed as a result of this inspection are set in the context of the current registration of your premises. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises the RQIA would apply standards current at the time of that application.

| <b>2 Environmental design and cleaning</b>   |            |           |  |
|--|------------|-----------|--|
| <b>Inspection criteria</b>   | <b>Yes</b> | <b>No</b> | <b>If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.</b> |
| <b>2.1</b> Does the practice have a policy and procedure for cleaning and maintaining the environment? (2.6, 6.54)                 | ✓          |           |  |
| <b>2.2</b> Have staff undertaking cleaning duties been fully trained to undertake such duties? (6.55)                              | ✓          |           |  |
| <b>2.3</b> Is the overall appearance of the clinical and decontamination environment tidy and uncluttered? (5.6)                   | ✓          |           |  |
| <b>2.4</b> Is the dental chair cleaned between each patient? (6.46, 6.62)  | ✓          |           |  |
| <b>2.5</b> Is the dental chair free from rips or tears? (6.62)   | ✓          |           |  |
| <b>2.6</b> Are all surfaces i.e. walls, floors, ceilings, fixtures and fittings and chairs free from damage and abrasion? (6.38)   | ✓          |           |  |
| <b>2.7</b> Are all work-surface joints intact, seamless, with no visible damage? (6.46, 6.47)                                      | ✓          |           |  |
| <b>2.8</b> Are all surfaces i.e. walls, floors, ceilings, fixtures and fittings and chairs free from dust and visible dirt? (6.38) | ✓          |           |  |
| <b>2.9</b> Are the surfaces of accessible ventilation fittings/grills cleaned at a minimum weekly? (6.64)                          | ✓          |           |  |
| <b>2.10</b> Are all surfaces including flooring in clinical and decontamination areas impervious and easy to clean? (6.46, 6.64)   | ✓          |           |  |

|  |     |  |  |
|--|-----|--|--|
| 2.11 Do all floor coverings in clinical and decontamination areas have covered edges that are sealed and impervious to moisture? (6.47)  | ✓   |  |  |
| 2.12 Are keyboard covers or "easy-clean" waterproof keyboards used in clinical areas? (6.66)   | N/A |  |  |
| 2.13 Are toys provided easily cleaned? (6.73)  | N/A |  |  |
| 2.14 Confirm free standing or ceiling mounted fans are not used in clinical/ decontamination areas? (6.40)   | ✓   |  |  |
| 2.15 Is cleaning equipment colour-coded, in accordance with the National Patient Safety Agency recommendations as detailed in HTM 01-05? (6.53)  | ✓   |  |  |
| 2.16 Is cleaning equipment stored in a non-clinical area? (6.60)   | ✓   |  |  |
| 2.17 Where disposable single-use covers are used, are they discarded after each patient contact? (6.65)  | ✓   |  |  |
| 2.18 Are the surfaces of equipment cleaned between each patient (E.g. work surfaces, dental chairs, curing lamps, delivery units, inspection handles and lights, spittoons, external surface of aspirator and X-ray heads)? (6.62) | ✓   |  |  |
| 2.19 Are all taps, drainage points, splash backs, sinks, aspirators, drains, spittoons, cleaned after every session with a surfactant/detergent? (6.63)  | ✓   |  |  |
| 2.20 Are floors, cupboard doors and accessible high level surfaces and floors cleaned daily? (6.63)  | ✓   |  |  |

|   |          |  |                             |
|---|----------|--|-----------------------------|
| <p><b>2.21</b> Is there a designated area for the disposal of dirty water, which is outside the kitchen, clinical and decontamination areas; for example toilet, drain or slop-hopper (slop hopper is a device used for the disposal of liquid or solid waste)?</p> | <p>✓</p> |  |                             |
| <p><b>2.22</b> Does the practice have a local policy and procedure/s for spillage in accordance with COSHH? (2.4d, 2.6)</p>   | <p>✓</p> |  |                             |
| <p>Provider's level of compliance</p>   |          |  | <p>Provider to complete</p> |
| <p>COMPLIANT</p>  |          |  |                             |

| <b>3 Hand hygiene</b>  |            |           |  |
|--|------------|-----------|--|
| <b>Inspection criteria</b>   | <b>Yes</b> | <b>No</b> | <b>If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.</b> |
| <b>3.1</b> Does the practice have a local policy and procedure for hand hygiene? (2.6 Appendix 1)  | ✓          |           |  |
| <b>3.2</b> Is hand hygiene an integral part of staff induction? (6.3)  | ✓          |           |  |
| <b>3.3</b> Is hand hygiene training provided periodically throughout the year? (1.22, 6.3)   | ✓          |           |  |
| <b>3.4</b> Is hand hygiene carried out before and after every new patient contact? (Appendix 1)  | ✓          |           |  |
| <b>3.5</b> Is hand hygiene performed before donning and following the removal of gloves? (6.4, Appendix 1)   | ✓          |           |  |
| <b>3.6</b> Do all staff involved in any clinical and decontamination procedures have short nails that are clean and free from nail extensions and varnish? (6.8, 6.23, Appendix 1) | ✓          |           |  |
| <b>3.7</b> Do all clinical and decontamination staff remove wrist watches, wrist jewellery, rings with stones during clinical and decontamination procedures? (6.9, 6.22)          | ✓          |           |  |
| <b>3.8</b> Are there laminated or wipe-clean posters promoting hand hygiene on display? (6.12)   | ✓          |           |  |
| <b>3.9</b> Is there a separate dedicated hand basin provided for hand hygiene in each surgery where clinical practice takes place? (2.4g, 6.10)                                    | ✓          |           |  |

|   |   |  |  |
|---|---|--|--|
| <p><b>3.10</b> Is there a separate dedicated hand basin available in each room where the decontamination of equipment takes place? (2.4u, 5.7, 6.10)</p>  | ✓ |  |  |
| <p><b>3.11</b> Are wash-hand basins free from equipment and other utility items? (2.4g, 5.7)</p>  | ✓ |  |  |
| <p><b>3.12</b> Are hand hygiene facilities clean and intact (check sinks taps, splash backs, soap and paper towel dispensers)? (6.11, 6.63)</p>   | ✓ |  |  |
| <p><b>3.13</b> Do the hand washing basins provided in clinical and decontamination areas have :</p> <ul style="list-style-type: none"> <li>• no plug; and</li> <li>• no overflow.</li> </ul> <p>Lever operated or sensor operated taps.(6.10)</p> | ✓ |  |  |
| <p><b>3.14</b> Confirm nailbrushes are not used at wash-hand basins? (Appendix 1)</p>   | ✓ |  |  |
| <p><b>3.15</b> Is there good quality, mild liquid soap dispensed from single-use cartridge or containers available at each wash-hand basin?</p> <p>Bar soap should not be used. (6.5, Appendix 1)</p>   | ✓ |  |  |
| <p><b>3.16</b> Is skin disinfectant rub/gel available at the point of care? (Appendix 1)</p>  | ✓ |  |  |
| <p><b>3.17</b> Are good quality disposable absorbent paper towels used at all wash-hand basins? (6.6, Appendix 1)</p>   | ✓ |  |  |

|  |           |  |                      |
|--|-----------|--|----------------------|
| <b>3.18</b> Are hand-cream dispensers with disposable cartridges available for all clinical and decontamination staff? (6.7, Appendix 1) | ✓         |  |                      |
| Provider's level of compliance   | COMPLIANT |  | Provider to complete |

| <b>4 Management of dental medical devices</b>  |            |           |  |
|--|------------|-----------|--|
| <b>Inspection criteria</b>   | <b>Yes</b> | <b>No</b> | <b>If NO provide rationale and actions to be taken with timescales to achieve compliance with HTM 01-05.</b> |
| <b>4.1</b> Does the practice have an infection control policy that includes procedures for the use, maintenance, service and repair of all medical devices? (1.18, 2.4a, 2.6, 2.7, 3.54)   | ✓          |           |  |
| <b>4.2</b> Has the practice carried out a risk assessment for legionella under the Health and Safety Commission's "Legionnaires' disease - the control of legionella bacteria in water systems Approved Code of Practice and Guidance" (also known as L8)? (6.75-6.90, 19.0) | ✓          |           |  |
| <b>4.3</b> Has the practice a written scheme for prevention of legionella contamination in water pipes and other water lines?(6.75, 19.2)  | ✓          |           |  |
| <b>4.4</b> Impression material, prosthetic and orthodontic appliances: Are impression materials, prosthetic and orthodontic appliances decontaminated in the surgery prior to despatch to laboratory in accordance with manufacturer's instructions?(7.0)                    | ✓          |           |  |
| <b>4.5</b> Impression material, prosthetic and orthodontic appliances: Are prosthetic and orthodontic appliances decontaminated before being placed in the patient's mouth? (7.1b)   | ✓          |           |  |
| <b>4.6</b> Dental Unit Water lines (DUWLs): Are in-line filters cleaned/replaced as per manufacturer's instructions?(6.89, 6.90)   | ✓          |           |  |

|  |            |  |  |
|--|------------|--|--|
| <p><b>4.7 Dental Unit Water lines (DUWLs):</b> Is there an independent bottled-water system used to dispense distilled, reverse osmosis (RO) or sterile water to supply the DUWL? (6.84)</p>   | <p>✓</p>   |  |  |
| <p><b>4.8 Dental Unit Water lines (DUWLs):</b> For dental surgical procedures involving irrigation; is a separate single-use sterile water source used for irrigation? (6.91)</p>  | <p>✓</p>   |  |  |
| <p><b>4.9 Dental Unit Water lines (DUWLs):</b> Are the DUWLs drained down at the end of every working day?(6.82)</p>   | <p>✓</p>   |  |  |
| <p><b>4.10 Dental Unit Water lines (DUWLs):</b> Are self-contained water bottles (bottled water system) removed, flushed with distilled or RO water and left open to the air for drying on a daily basis, and if necessary overnight, and in accordance with manufacturer's guidance? (6.83)</p> | <p>✓</p>   |  |  |
| <p><b>4.11 Dental Unit Water lines (DUWLs):</b> Where bottled water systems are not used is there a physical air gap separating dental unit waterlines from mains water systems. (Type A)?(6.84)</p>   | <p>N/A</p> |  |  |
| <p><b>4.12 Dental Unit Water lines (DUWLs):</b> Are DUWLs flushed for a minimum of 2 minutes at start of each working day and for a minimum of 20-30 seconds between every patient? (6.85)</p>   | <p>✓</p>   |  |  |
| <p><b>4.13 Dental Unit Water lines (DUWLs):</b> Are all DUWL and hand pieces fitted with anti-retraction valves? (6.87)</p>  | <p>✓</p>   |  |  |
| <p><b>4.14 Dental Unit Water lines (DUWLs):</b> Are DUWLs either disposable or purged using manufacturer's recommended disinfectants? (6.84-6.86)</p>  | <p>✓</p>   |  |  |

|  |   |  |                             |
|--|---|--|-----------------------------|
| <b>4.15 Dental Unit Water lines (DUWLs): Are DUWL filters changed according to the manufacturer's guidelines? (6.89)</b> |  |  |                             |
| <b>Provider's level of compliance</b>  | COMPLIANT   |  | <b>Provider to complete</b> |
