

Unannounced Medicines Management Inspection Report 24 August 2018

Balmoral View Care Centre

Type of Service: Nursing Home

Address: 5 The Manor, Blacks Road, Dunmurry, BT10 0NB

Tel No: 028 9062 9331 Inspector: Catherine Glover

www.rqia.org.uk

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

1.0 What we look for

2.0 Profile of service

This is a nursing home with 39 beds that provides care for patients with a range of healthcare needs as detailed in Section 3.0.

3.0 Service details

Organisation/Registered Provider: Four Seasons Health Care Responsible Individual: Dr Maureen Claire Royston	Registered Manager: Mr Rosendo Soriano
Person in charge at the time of inspection: Mrs Ursula Mulholland, Sister	Date manager registered: 5 May 2017
Categories of care: Nursing Homes I – Old age not falling within any other category. DE – Dementia. PH – Physical disability other than sensory impairment. PH(E) - Physical disability other than sensory impairment – over 65 years. TI – Terminally ill. MP – Mental disorder excluding learning disability or dementia.	Number of registered places: 39 A maximum of 15 patients in category NH-DE to be accommodated in the dementia unit. Category NH-MP for one named patient only. There shall be a maximum of two named residents receiving residential care in category RC-I.

4.0 Inspection summary

An unannounced inspection took place on 24 August 2018 from 10.00 to 13.30.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Nursing Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015.

The inspection assessed progress with any areas for improvement identified during and since the last medicines management inspection and to determine if the home was delivering safe, effective and compassionate care and if the service was well led.

Evidence of good practice was found in relation to medicine administration, the majority of records, storage and governance arrangements.

One area for improvement was identified in relation to recording the reason for and outcome of administering medicines which are prescribed on a "when required" basis for the management of distressed reactions.

Patients said they were happy and comfortable in the home and that the staff were very good.

The findings of this report will provide the home with the necessary information to assist them to fulfil their responsibilities, enhance practice and patients' experience.

4.1 Inspection outcome

	Regulations	Standards
Total number of areas for improvement	0	1

Details of the Quality Improvement Plan (QIP) were discussed with Mrs Ursula Mulholland, Sister, and with Ms Violet Graham, who has recently been appointed as the new manager for the home, by telephone on 29 August 2018. The timescales for completion commence from the date of inspection.

Enforcement action did not result from the findings of this inspection.

4.2 Action/enforcement taken following the most recent care inspection

Other than those actions detailed in the QIP no further actions were required to be taken following the most recent inspection on 3 July 2018. Enforcement action did not result from the findings of this inspection.

5.0 How we inspect

Prior to the inspection a range of information relevant to the service was reviewed. This included the following:

- recent inspection reports and returned QIPs
- recent correspondence with the home
- the management of medicine related incidents reported to RQIA since the last medicines management inspection.

A poster informing visitors to the home that an inspection was being conducted was displayed.

During the inspection we met with three patients, one relative, one registered nurse and the Sister in Charge.

Ten questionnaires were provided for distribution to patients and their representatives for completion and return to RQIA.

We asked the sister to display a poster in the home inviting staff to share their views of the home by completing an online questionnaire.

We left "Have we missed you?" cards. The cards facilitate patients or relatives who were not present at the time of the inspection to give feedback to RQIA on the quality of service provision. Flyers which gave information on raising a concern were also left in the home.

A sample of the following records was examined during the inspection:

- medicines requested and received
- personal medication records
- medicine administration records
- medicines disposed of or transferred
- medicine audits
- care plans
- medicines storage temperatures
- controlled drug record book

Areas for improvement identified at the last medicines management inspection were reviewed and the assessment of compliance recorded as met, partially met, or not met.

The findings of the inspection were provided to the person in charge at the conclusion of the inspection.

6.0 The inspection

6.1 Review of areas for improvement from the most recent inspection dated 3 July 2018

The most recent inspection of the home was an unannounced follow up care inspection. The completed QIP was returned and approved by the care inspector. This QIP will be validated by the care inspector at the next care inspection.

6.2 Review of areas for improvement from the last medicines management inspection dated 1 June 2017

Action required to ensure	vement from the last medicines management ins	Validation of
Regulations (Northern Ire		compliance
Area for improvement 1 Ref: Regulation 13 (4)	The registered person shall ensure that the procedures in place to ensure the safe management of medicines during a patient's admission to the home are reviewed.	•
Stated: Second time	Action taken as confirmed during the inspection: The records for two recently admitted patients were examined and the procedures were found to be satisfactory.	Met
Action required to ensure compliance with the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015		Validation of compliance
Area for improvement 1 Ref: Standard 29 Stated: First time	The registered person shall ensure that procedures are reviewed to ensure that all incoming medicines received are accurately recorded.	Met
	Action taken as confirmed during the	

6.3 Inspection findings

6.4 Is care safe?

Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.

Medicines were managed by staff who have been trained and deemed competent to do so. The impact of training was monitored through team meetings, supervision and annual appraisal. Competency assessments were completed annually. Refresher training in medicines management, syringe drivers and PEG tubes was provided in the last year. Staff have also had safeguarding training.

There were procedures in place to ensure the safe management of medicines during a patient's admission to the home.

Systems were in place to manage the ordering of prescribed medicines to ensure adequate supplies were available and to prevent wastage. Staff advised of the procedures to identify and report any potential shortfalls in medicines. Newly prescribed medicines had been received into the home without delay. Satisfactory arrangements were in place for the acquisition and storage of prescriptions.

There were satisfactory arrangements in place to manage changes to prescribed medicines. Personal medication records and handwritten entries on medication administration records were updated by two registered nurses. This safe practice was acknowledged.

Records of the receipt, administration and disposal of controlled drugs subject to record keeping requirements were maintained in a controlled drug record book. Checks were performed on controlled drugs which require safe custody, at the end of each shift. Additional checks were also performed on other controlled drugs which is good practice.

Discontinued or expired medicines were disposed of appropriately. Discontinued controlled drugs were denatured and rendered irretrievable prior to disposal.

Medicines were stored safely and securely and in accordance with the manufacturer's instructions. Medicine storage areas were clean, tidy and well organised. There were systems in place to alert staff of the expiry dates of medicines with a limited shelf life, once opened. Medicine refrigerators and oxygen equipment were checked at regular intervals.

Areas of good practice

There were examples of good practice in relation to staff training, competency assessment, the management of medicines on admission and controlled drugs.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.5 Is care effective?

The right care, at the right time in the right place with the best outcome.

The sample of medicines examined had been administered in accordance with the prescriber's instructions. There was evidence that time critical medicines had been administered at the correct time. There were arrangements in place to alert staff of when doses of weekly medicines were due.

When a patient was prescribed a medicine for administration on a "when required" basis for the management of distressed reactions, the dosage instructions were recorded on the personal medication record. Staff knew how to recognise signs, symptoms and triggers which may cause a change in a patient's behaviour and were aware that this change may be associated with pain. A care plan was maintained. The reason for and the outcome of administration had not always been recorded and an area for improvement was identified in relation to this.

The sample of records examined indicated that medicines which were prescribed to manage pain had been administered as prescribed. Staff were aware that ongoing monitoring was necessary to ensure that the pain was well controlled and the patient was comfortable. Staff advised that most of the patients could verbalise any pain, and a pain tool was used as needed. A care plan was maintained. Staff were advised that some of the care plans may need to be updated with new dosage directions and it was agreed that this would be completed following the inspection.

The management of swallowing difficulty was examined. For those patients prescribed a thickening agent, this was recorded on their personal medication record and included details of the fluid consistency. Care plans and speech and language assessment reports were in place.

Staff confirmed that compliance with prescribed medicine regimes was monitored and any omissions or refusals likely to have an adverse effect on the patient's health were reported to the prescriber.

Medicine records were well maintained and facilitated the audit process. Areas of good practice were acknowledged.

Practices for the management of medicines were audited throughout the month by the staff and management. This included running stock balances for several solid dosage medicines, nutritional supplements and inhaled medicines. In addition, a quarterly audit was completed by the community pharmacist.

Following discussion with the registered manager and staff, it was evident that other healthcare professionals are contacted when required to meet the needs of patients.

Areas of good practice

There were examples of good practice in relation to the standard of record keeping, care planning and the administration of medicines.

Areas for improvement

The reason for, and outcome of, administering "when required" medicines for distressed reactions should be recorded.

	Regulations	Standards
Total number of areas for improvement	0	1

6.6 Is care compassionate?

Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.

The administration of medicines to patients was not observed during this inspection, however staff were knowledgeable regarding the patients' medicines and requirements.

Patients were observed to be relaxed and comfortable in their surroundings and in their interactions with staff. Staff were noted to be friendly, courteous and happy in their work; they treated the patients with dignity.

We spoke to three patients who advised that they were happy in the home and that the staff were good. Comments included:

We spoke to one patient's relative who advised that she was very satisfied with the care provided and that her relative was settled and happy.

None of the questionnaires that were left in the home for patients and relatives were returned within the timeframe for inclusion in this report (two weeks).

Areas of good practice

Staff were engaged with patients and good relationships were evident.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

[&]quot;The staff are brilliant."

[&]quot;I like it here."

[&]quot;It's like I've woke up in heaven, it's so good."

[&]quot;The food is great."

6.7 Is the service well led?

Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.

We discussed arrangements in place in relation to the equality of opportunity for patients and the importance of staff being aware of equality legislation and recognising and responding to the diverse needs of patients. Arrangements are place to implement the collection of equality data.

Written policies and procedures for the management of medicines were in place. Following discussion with staff it was evident that they were familiar with the policies and procedures and that any updates were highlighted to staff.

There were robust arrangements in place for the management of medicine related incidents. Staff confirmed that they knew how to identify and report incidents. Medicine related incidents reported since the last medicines management inspection were discussed. There was evidence of the action taken and learning implemented following incidents. In relation to the regional safeguarding procedures, staff confirmed that they were aware that medicine incidents may need to be reported to the safeguarding team.

A review of the audit records indicated that largely satisfactory outcomes had been achieved. Where a discrepancy had been identified, there was evidence of the action taken and learning which had resulted in a change of practice.

Following discussion with the sister and registered nurse, it was evident that staff were familiar with their roles and responsibilities in relation to medicines management.

Staff confirmed that any concerns in relation to medicines management were raised with management. They advised that the registered manager was approachable and willing to listen. Comments from staff included:

There were no responses to the online staff questionnaire.

Areas of good practice

There were examples of good practice in relation to governance arrangements, the management of medicine incidents and quality improvement. There were clearly defined roles and responsibilities for staff.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

[&]quot;I love it here."

[&]quot;The new manager is very supportive."

7.0 Quality improvement plan

Areas for improvement identified during this inspection are detailed in the QIP. Details of the QIP were discussed with Mrs Ursula Mulholland, Sister, and with Ms Violet Graham, by telephone on 29 August 2018, who has recently been appointed as the new manager for the home. The timescales commence from the date of inspection.

The registered provider/manager should note that if the action outlined in the QIP is not taken to comply with regulations and standards this may lead to further enforcement action including possible prosecution for offences. It is the responsibility of the registered provider to ensure that all areas for improvement identified within the QIP are addressed within the specified timescales.

Matters to be addressed as a result of this inspection are set in the context of the current registration of the nursing home. The registration is not transferable so that in the event of any future application to alter, extend or to sell the premises RQIA would apply standards current at the time of that application.

7.1 Areas for improvement

Areas for improvement have been identified where action is required to ensure compliance with The Nursing Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015.

7.2 Actions to be taken by the service

The QIP should be completed and detail the actions taken to address the areas for improvement identified. The registered provider should confirm that these actions have been completed and return the completed via the Web Portal for assessment by the inspector.

Action required to ensure compliance with the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015 Area for improvement 1 Ref: Standard 4 Stated: First time Ref: 6.5 Response by registered person detailing the actions taken: To be completed by: 24 September 2018

"when required" medicine for distressed reactions.
