

Unannounced Medicines Management Inspection Report 27 November 2018

Tudordale

Type of Service: Nursing Home
Address: 294 Holywood Road, Belfast, BT4 1SG
Tel No: 028 9065 1336
Inspector: Paul Nixon

www.rqia.org.uk

Assurance, Challenge and Improvement in Health and Social Care

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

1.0 What we look for

2.0 Profile of service

This is a nursing home that provides care for up to 45 patients living with dementia.

3.0 Service details

Organisation/Registered Provider: Four Seasons Health Care Responsible Individual: Dr. Maureen Claire Royston	Registered Manager: Ms. Rosalind Morrison
Person in charge at the time of inspection: Ms Jewel Isip (Deputy Manager)	Date manager registered: 3 January 2018
Categories of care: Nursing Homes (NH) DE – Dementia.	Number of registered places: 45

4.0 Inspection summary

An unannounced inspection took place on 27 November 2018 from 10.00 to 13.30.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Nursing Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015.

The inspection assessed progress with any areas for improvement identified since the last medicines management inspection and determined if the home was delivering safe, effective and compassionate care and if the service was well led.

Evidence of good practice was found in relation to medicine governance, medicine administration, medicines storage and the management of controlled drugs.

No areas for improvement were identified.

The patients were observed to be relaxed and comfortable in their surroundings and in their interactions with staff.

The findings of this report will provide the home with the necessary information to assist them to fulfil their responsibilities, enhance practice and patients' experience.

4.1 Inspection outcome

	Regulations	Standards
Total number of areas for improvement	0	0

This inspection resulted in no areas for improvement being identified. Findings of the inspection were discussed with Ms Jewel Isip, Deputy Manager, as part of the inspection process and can be found in the main body of the report.

Enforcement action did not result from the findings of this inspection.

4.2 Action/enforcement taken following the most recent care inspection

Other than those actions detailed in the QIP no further actions were required to be taken following the most recent inspection on 29 August 2018. Enforcement action did not result from the findings of this inspection.

5.0 How we inspect

Prior to the inspection a range of information relevant to the service was reviewed. This included the following:

- recent inspection reports and returned QIPs
- recent correspondence with the home

Prior to the inspection, it was ascertained that no incidents involving medicines had been reported to RQIA since the last medicines management inspection.

A poster informing visitors to the home that an inspection was being conducted was displayed.

We provided 10 questionnaires to distribute to patients and their representatives, for completion and return to RQIA. We left 'Have we missed you' cards in the foyer of the home to inform patients and their representatives, who we did not meet with or were not present in the home, how to contact RQIA to tell us their experience of the quality of service provision. Flyers which gave information on raising a concern were also left in the home.

We asked the deputy manager to display a poster which invited staff to share their views and opinions by completing an online questionnaire.

A sample of the following records was examined during the inspection:

- medicines requested and received
- personal medication records
- medicine administration records
- medicines disposed of or transferred
- controlled drug record book
- medicine audits
- care plans
- training records
- medicines storage temperatures

The findings of the inspection were provided to the person in charge at the conclusion of the inspection.

6.0 The inspection

6.1 Review of areas for improvement from the most recent inspection dated 29 August 2018

The most recent inspection of the home was an unannounced care inspection. The completed QIP was returned and approved by the care inspector.

This QIP will be validated by the care inspector at the next care inspection.

6.2 Review of areas for improvement from the last medicines management inspection dated 10 January 2017

There were no areas for improvement identified as a result of the last medicines management inspection.

6.3 Inspection findings

6.4 Is care safe?

Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.

Medicines were managed by staff who had been trained and deemed competent to do so. An induction process was in place for registered nurses and for care staff who had been delegated medicine related tasks. The impact of training was monitored through team meetings, supervision and annual appraisal. Competency assessments were completed annually. Refresher training in medicines management was provided in the last year.

Systems were in place to manage the ordering of prescribed medicines to ensure adequate supplies were available and to prevent wastage. Staff advised of the procedures to identify and report any potential shortfalls in medicines. Antibiotics and newly prescribed medicines had been received into the home without delay.

There were satisfactory arrangements in place to manage changes to prescribed medicines. Personal medication records and handwritten entries on medicine administration records were normally updated by two registered nurses. This safe practice was acknowledged.

In relation to safeguarding, staff advised that they were aware of the regional procedures and who to report any safeguarding concerns to.

There were procedures in place to ensure the safe management of medicines during a patient's admission to the home.

Records of the receipt, administration and disposal of controlled drugs subject to record keeping requirements were maintained in controlled drug record books. Checks were performed on controlled drugs which require safe custody, at the end of each shift. Additional checks were also performed on other controlled drugs which is good practice.

Robust arrangements were observed for the management of high risk medicines e.g. insulin.

Discontinued or expired medicines were disposed of appropriately. Discontinued controlled drugs were denatured and rendered irretrievable prior to disposal.

Medicines were stored safely and securely and in accordance with the manufacturer's instructions. Medicine storage areas were clean, tidy and well organised.

There were systems in place to alert staff of the expiry dates of medicines with a limited shelf life, once opened. The medicine refrigerator and oxygen equipment were checked at regular intervals.

Areas of good practice

There were examples of good practice in relation to staff training, competency assessment, the management of medicines on admission, the management of controlled drugs and the storage of medicines.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.5 Is care effective?

The right care, at the right time in the right place with the best outcome.

The sample of medicines examined had been administered in accordance with the prescriber's instructions. There was evidence that time critical medicines had been administered at the correct time. There were arrangements in place to alert staff of when doses of medicines prescribed to be administered at atypical intervals were due.

When a patient was prescribed a medicine for administration on a "when required" basis for the management of distressed reactions, the dosage instructions were recorded on the personal medication record. Staff knew how to recognise signs, symptoms and triggers which may cause a change in a patient's behaviour and were aware that this change may be associated with pain. A care plan was maintained. However, the reason for and the outcome of administration were not always recorded. The deputy manager gave an assurance that this matter would be addressed without delay and that recording practice would be closely monitored by management; given this assurance an area for improvement was not stated.

The sample of records examined indicated that medicines which were prescribed to manage pain had been administered as prescribed. Staff were aware that ongoing monitoring was necessary to ensure that the pain was well controlled and the patient was comfortable. A pain assessment tool was used and a care plan was maintained. Staff also advised that a pain assessment was completed as part of the admission process.

The management of swallowing difficulty was examined. For those patients prescribed a thickening agent, this was recorded on their personal medication record and included details of the fluid consistency. Administrations were recorded and care plans and speech and language assessment reports were in place.

Staff confirmed that compliance with prescribed medicine regimes was monitored and any omissions or refusals likely to have an adverse effect on the patient's health were reported to the prescriber.

Medicine records were well maintained and facilitated the audit process. Areas of good practice were acknowledged. They included additional records for transdermal patches and insulin and the routine recording of the dates of opening of medicine containers to facilitate audit activity.

Following discussion with the deputy manager and staff, it was evident that other healthcare professionals were contacted, when required, to meet the needs of patients. Staff advised that they had good working relationships with healthcare professionals involved in patient care.

Areas of good practice

There were examples of good practice in relation to the standard of record keeping, care planning and the administration of medicines.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.6 Is care compassionate?

Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.

The administration of medicines to patients was completed in a caring manner, patients were given time to take their medicines and medicines were administered as discreetly as possible.

Patients were observed to be relaxed and comfortable in their surroundings and in their interactions with staff. Staff were knowledgeable regarding their patient's needs, wishes and preferences. Staff and patient interaction and communication demonstrated that patients were treated courteously, with dignity and respect. Good relationships were evident between staff and patients.

Of the questionnaires that were issued, six were returned from patients' representatives within the designated timeframe of two weeks. The responses indicated that they were satisfied/very satisfied with all aspects of the care. Comments made were as follows:

- "I find that the staff treat my mother with great consideration and love. I am very pleased with all aspects of her care and find great loving, caring support for me. I highly recommend this home. It's a great place."
- "Happy with care my uncle receives. He is very content."
- "Clothes go missing even when labels are on them."

The comments were shared with the registered manager for her information and consideration.

Areas of good practice

Staff listened to patients and took account of their views.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.7 Is the service well led?

Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.

We discussed the arrangements in place in relation to the equality of opportunity for patients and the importance of staff being aware of equality legislation and recognising and responding to the diverse needs of patients. Arrangements were in place to implement the collection of equality data within Tudordale.

Written policies and procedures for the management of medicines were in place. These were not reviewed on this occasion. Following discussion with staff, it was evident that they were knowledgeable with the policies and procedures and that any updates were highlighted to them.

The governance arrangements for medicines management were reviewed. The deputy manager and nursing staff advised of the audits which take place and how areas for improvement were identified and followed up. This was usually through the development of action plans and staff supervision. A sample of the audit outcomes was provided. Also, as part of the pharmacist support to the home, a quarterly audit was undertaken and a list of the findings was left in the home for management to address.

There were satisfactory arrangements in place for the management of medicine related incidents. Staff confirmed that they knew how to identify and report incidents. They provided details of the procedures in place to ensure that all staff were made aware of incidents and to prevent recurrence. These usually included reflective practice and supervision. In relation to the regional safeguarding procedures, staff confirmed that they were aware that medicine incidents may need to be reported to the safeguarding team.

Following discussion with the staff, it was evident that they were familiar with their roles and responsibilities in relation to medicines management. They confirmed that any concerns in relation to medicines management were raised with the management of the home; and any resultant action was discussed at team meetings and/or supervision. They spoke positively about their work and advised that there were good working relationships in the home with staff, management and with other healthcare professionals. They stated they felt well supported in their work.

No members of staff shared their views by completing an online questionnaire.

Areas of good practice

There were examples of good practice in relation to governance arrangements, the management of medicine incidents and quality improvement. There were clearly defined roles and responsibilities for staff.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

7.0 Quality improvement plan

There were no areas for improvement identified during this inspection, and a QIP is not required or included, as part of this inspection report.
