

# Unannounced Medicines Management Inspection Report 13 September 2017

## Ardmaine Care Home

Type of Service: Nursing Home  
Address: 8 Fullerton Road, Newry, BT34 2AY  
Tel No: 028 3026 2075  
Inspector: Paul Nixon

[www.rqia.org.uk](http://www.rqia.org.uk)

Assurance, Challenge and Improvement in Health and Social Care

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

## 1.0 What we look for

## 2.0 Profile of service

This is a nursing home with 65 beds that provides care for patients with a variety of care needs, as detailed in section 3.0.

### 3.0 Service details

<b>Organisation/Registered Provider:</b> Four Seasons (Bamford) Ltd  <b>Responsible Individual:</b> Dr Maureen Claire Royston	<b>Registered manager:</b> Mrs Ann Begley
<b>Person in charge at the time of inspection:</b> Mrs Ann Begley	<b>Date manager registered:</b> 24 January 2013
<b>Categories of care:</b> Nursing Homes or Residential I – Old age not falling within any other category. DE – Dementia. MP – Mental disorder excluding learning	<b>Number of registered places:</b> 65 Maximum of 33 patients - Category NH-DE, Dementia Unit only; maximum of 8 patients' category NH-MP.

### 4.0 Inspection summary

An unannounced inspection took place on 13 September 2017 from 09.40 to 13.00.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Nursing Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015.

The inspection assessed progress with any areas for improvement identified during and since the last medicines management inspection and to determine if the home was delivering safe, effective and compassionate care and if the service was well led.

Evidence of good practice was found in relation to medicine governance, medicine administration, medicine records, medicines storage and the management of controlled drugs.

No areas requiring improvement were identified.

The patients we spoke with were very complimentary about the management of their medicines and the care provided in the home.

The findings of this report will provide the home with the necessary information to assist them to fulfil their responsibilities, enhance practice and patients' experience.

## 4.1 Inspection outcome

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

This inspection resulted in no areas for improvement being identified. Findings of the inspection were discussed with Mrs Ann Begley, Registered Manager, as part of the inspection process and can be found in the main body of the report.

Enforcement action did not result from the findings of this inspection.

## 4.2 Action/enforcement taken following the most recent care inspection

Other than those actions detailed in the QIP no further actions required to be taken following the most recent inspection on 22 August 2017.

## 5.0 How we inspect

Prior to the inspection a range of information relevant to the service was reviewed. This included the following records:

- recent inspection reports and returned QIPs
- recent correspondence with the home
- the management of medicine related incidents reported to RQIA since the last medicines management inspection

A poster informing visitors to the home that an inspection was being conducted was displayed.

During the inspection we met with two patients, the registered manager, the deputy manager, four registered nurses and two care staff.

A total of 15 questionnaires were provided for distribution to patients, their representatives, and staff for completion and return to RQIA.

A sample of the following records was examined during the inspection:

- medicines requested and received
- personal medication records
- medicine administration records
- medicines disposed of or transferred
- controlled drug record book
- medicine audits
- care plans
- training records
- medicines storage temperatures

Areas for improvements identified at the last medicines management inspection were reviewed and the assessment of compliance recorded as met, partially met, or not met.

The findings of the inspection were provided to the person in charge at the conclusion of the inspection.

**6.0 The inspection**

**6.1 Review of areas for improvement from the most recent inspection dated 22 August 2017**

The most recent inspection of the home was an unannounced care inspection. The completed QIP will be reviewed by the care inspector once it is submitted to RQIA. This QIP will be validated by the care inspector at the next care inspection.

**6.2 Review of areas for improvement from the last medicines management inspection dated 7 July 2016**

Areas for improvement from the last medicines management inspection		
Action required to ensure compliance with the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015		Validation of compliance
<b>Area for improvement 1</b> <b>Ref:</b> Standard 31 <b>Stated:</b> First time	The registered provider should closely monitor the standard of maintenance of the controlled drug record book.	<b>Met</b>
	<b>Action taken as confirmed during the inspection:</b> There was recorded evidence that the standard of maintenance of the controlled drug record books were monitored through the monthly audits performed by management. The controlled drugs records had been well maintained.	

## 6.3 Inspection findings

### 6.4 Is care safe?

#### **Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.**

Medicines were managed by staff who have been trained and deemed competent to do so. An induction process was in place for registered nurses and for care staff who had been delegated medicine related tasks. The impact of training was monitored through team meetings, supervision and annual appraisal. Competency assessments were completed annually. Refresher training in medicines management was provided in the last year.

Systems were in place to manage the ordering of prescribed medicines to ensure adequate supplies were available and to prevent wastage. Staff advised of the procedures to identify and report any potential shortfalls in medicines. Antibiotics and newly prescribed medicines had been received into the home without delay. Satisfactory arrangements were in place for the acquisition and storage of prescriptions.

There were satisfactory arrangements in place to manage changes to prescribed medicines. Personal medication records and handwritten entries on medicine administration records were updated by two registered nurses. This safe practice was acknowledged.

In relation to safeguarding, staff advised that they were aware of the regional procedures and who to report any safeguarding concerns to.

There were procedures in place to ensure the safe management of medicines during a patient's admission to the home.

Records of the receipt, administration and disposal of controlled drugs subject to record keeping requirements were maintained in a controlled drug record book. Checks were performed on controlled drugs which require safe custody, at the end of each shift. Additional checks were also performed on other controlled drugs which is good practice.

Robust arrangements were observed for the management of high risk medicines e.g. warfarin and insulin. The use of separate administration charts was acknowledged.

Discontinued or expired medicines were disposed of appropriately. Discontinued controlled drugs were denatured and rendered irretrievable prior to disposal.

Medicines were stored safely and securely and in accordance with the manufacturer's instructions. Medicine storage areas were clean, tidy and well organised. There were systems in place to alert staff of the expiry dates of medicines with a limited shelf life, once opened. Medicine refrigerators and oxygen equipment were checked at regular intervals.

**Areas of good practice**

There were examples of good practice in relation to staff training, competency assessments, the management of medicines on admission, controlled drugs and the storage of medicines.

**Areas for improvement**

No areas for improvement were identified during the inspection.

	<b>Regulations</b>	<b>Standards</b>
<b>Total number of areas for improvement</b>	0	0

**6.5 Is care effective?**

**The right care, at the right time in the right place with the best outcome.**

The sample of medicines examined had been administered in accordance with the prescriber’s instructions.

There was evidence that time critical medicines had been administered at the correct time. There were arrangements in place to alert staff of when doses of weekly, fortnightly, monthly or three monthly medicines were due.

When a patient was prescribed a medicine for administration on a “when required” basis for the management of distressed reactions, the dosage instructions were recorded on the personal medication record. Staff knew how to recognise signs, symptoms and triggers which may cause a change in a patient’s behaviour and were aware that this change may be associated with pain. The reason for and the outcome of administration were recorded. A care plan was maintained.

The sample of records examined indicated that medicines which were prescribed to manage pain had been administered as prescribed. Staff were aware that ongoing monitoring was necessary to ensure that the pain was well controlled and the patient was comfortable. A pain assessment tool was used as needed. A care plan was maintained. Staff also advised that a pain assessment was completed as part of the admission process.

The management of swallowing difficulty was examined. For those patients prescribed a thickening agent, this was recorded on their personal medication record and included details of the fluid consistency. Administrations were recorded and care plans and speech and language assessment reports were in place.

Staff confirmed that compliance with prescribed medicine regimes was monitored and any omissions or refusals likely to have an adverse effect on the patient’s health were reported to the prescriber.

Medicine records were well maintained and facilitated the audit process.

Practices for the management of medicines were audited throughout the month by the staff and management. This included running stock balances for several solid dosage medicines and inhaled medicines. In addition, a quarterly audit was completed by the community pharmacist.

Following discussion with the registered manager and staff, it was evident that, when applicable, other healthcare professionals were contacted in response to medication related issues. Staff advised that they had good working relationships with the GP practices and the Health and Social Care Trust.

**Areas of good practice**

There were examples of good practice in relation to the standard of record keeping, care planning and the administration of medicines.

**Areas for improvement**

No areas for improvement were identified during the inspection.

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

**6.6 Is care compassionate?**

**Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.**

The administration of medicines to patients was completed in a caring manner, the patient was given time to take their medicines and medicines were administered as discreetly as possible.

Throughout the inspection, it was found that there were good relationships between the staff and the patients. Staff were noted to be friendly and courteous; they treated the patients with dignity.

The patients we spoke with generally advised that they were content with the management of their medicines and the care provided in the home. They were very complimentary regarding staff and management. Comments included:

“The care here is brilliant; the staff are great”  
 “I receive great care; I have no complaints”

Patients who could not verbalise their feelings in respect of their care were observed to be relaxed and comfortable in their surroundings and in their interactions with staff.

As part of the inspection process, we issued questionnaires to patients, patients’ representatives and staff. Five patients and two patient’s representatives completed and returned questionnaires within the specified timeframe. Comments received were positive; with responses recorded as ‘very satisfied’ or ‘satisfied’ with the management of medicines in the home.

## Areas of good practice

Staff listened to patients and took account of their views.

## Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

### 6.7 Is the service well led?

**Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.**

Written policies and procedures for the management of medicines were in place. Following discussion with staff it was evident that they were familiar with the policies and procedures and that any updates were highlighted to them.

There were robust arrangements in place for the management of medicine related incidents. Staff confirmed that they knew how to identify and report incidents. Medicine related incidents reported since the last medicines management inspection were discussed. There was evidence of the action taken and learning implemented following incidents. In relation to the regional safeguarding procedures, staff confirmed that they were aware that medicine incidents may need to be reported to the safeguarding lead and safeguarding team.

A review of the audit records indicated that largely satisfactory outcomes had been achieved. Where a discrepancy had been identified, there was evidence of the action taken and learning which had resulted in a change of practice.

Following discussion with the registered manager, registered nurses and care staff, it was evident that staff were familiar with their roles and responsibilities in relation to medicines management.

Five members of staff completed a questionnaire. The responses were positive and raised no concerns about the management of medicines in the home.

Staff confirmed that any concerns in relation to medicines management were raised with management. They advised that management were open and approachable and willing to listen.

## Areas of good practice

There were examples of good practice in relation to governance arrangements, the management of medicine incidents and quality improvement. There were clearly defined roles and responsibilities for staff.

## Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
<b>Total number of areas for improvement</b>	0	0

### 7.0 Quality improvement plan

There were no areas for improvement identified during this inspection, and a QIP is not required or included, as part of this inspection report.

RQIA will phase out the issue of draft reports via paperlite in the near future. Registered providers should ensure that their services are opted in for the receipt of reports via Web Portal. If you require further information, please visit [www.rqia.org.uk/webportal](http://www.rqia.org.uk/webportal) or contact the web portal team in RQIA on 028 9051 7500.
