Unannounced Medicines Management Inspection Report
23 April 2018

Sunnyside House

Type of service: Residential Care Home
Address: 25 Riverwood Vale, High Donaghadee Road, Bangor, BT20 4QE
Tel No: 028 9127 0615
Inspector: Paul Nixon

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the service from their responsibility for maintaining compliance with legislation, standards and best practice.

1.0 What we look for

2.0 Profile of service

This is a residential care home with 45 beds that provides care for residents living with a variety of care needs, as detailed in Section 3.0

3.0 Service details

PH – Physical disability other than sensory impairment.	**Number of registered places:** 45 Including a maximum of 12 persons in RC-DE category of care. The home is approved to provide care on a day basis only to 3 persons.

4.0 Inspection summary

An unannounced inspection took place on 23 April 2018 from 10.00 to 13.40.

This inspection was underpinned by The Health and Personal Social Services (Quality, Improvement and Regulation) (Northern Ireland) Order 2003, The Residential Care Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Residential Care Homes Minimum Standards (2011).

The inspection assessed progress with any areas for improvement identified during and since the last medicines management inspection and to determine if the home was delivering safe, effective and compassionate care and if the service was well led.

Evidence of good practice was found in relation to medicines administration, medicine records, medicine storage and the management of controlled drugs.

No areas requiring improvement were identified.

There was a warm and welcoming atmosphere in the home. Residents were relaxed and good relationships with staff were evident.

The findings of this report will provide the home with the necessary information to assist them to fulfil their responsibilities, enhance practice and residents' experience.

4.1 Inspection outcome

	Regulations	Standards
Total number of areas for improvement	0	0

This inspection resulted in no areas for improvement being identified. Findings of the inspection were discussed with Ms Phyllis Harvey, Senior Care Assistant as part of the inspection process and can be found in the main body of the report.

Enforcement action did not result from the findings of this inspection.

4.2 Action/enforcement taken following the most recent care inspection

The most recent inspection of the home was an unannounced care inspection undertaken on 13 February 2018. Other than those actions detailed in the QIP, no further actions were required to be taken.

Enforcement action did not result from the findings of this inspection.

5.0 How we inspect

Prior to the inspection a range of information relevant to the home was reviewed. This included the following:

- recent inspection reports and returned QIPs
- recent correspondence with the home
- the management of medicine related incidents reported to RQIA since the last medicines management inspection

During the inspection the inspector met with four residents and three members of care staff.

A total of 10 questionnaires were provided for distribution to residents and their representatives for completion and return to RQIA. Staff were invited to share their views by completing an online questionnaire.

A poster informing visitors to the home that an inspection was being conducted was displayed.

A sample of the following records was examined during the inspection:

- medicines requested and received
- personal medication records
- medicine administration records
- medicines disposed of or transferred
- controlled drug record book
- medicine audits
- care plans
- training records
- medicines storage temperatures

The findings of the inspection were provided to the person in charge at the conclusion of the inspection.

6.0 The inspection

6.1 Review of areas for improvement from the most recent inspection dated 13 February 2018

The most recent inspection of the home was an unannounced care inspection. The completed QIP was returned and approved by the care inspector. This QIP will be validated by the care inspector at the next care inspection.

6.2 Review of areas for improvement from the last medicines management inspection dated 26 May 2016

There were no areas for improvement identified as a result of the last medicines management inspection.

6.3 Inspection findings

6.4 Is care safe?

Avoiding and preventing harm to patients and clients from the care, treatment and support that is intended to help them.

Medicines were managed by staff who have been trained and deemed competent to do so. An induction process was in place for care staff who had been delegated medicine related tasks. The impact of training was monitored through team meetings, supervision and annual appraisal. Competency assessments were completed annually. Refresher training in medicines management was provided in the last year.

Systems were in place to manage the ordering of prescribed medicines to ensure adequate supplies were available and to prevent wastage. Staff advised of the procedures to identify and report any potential shortfalls in medicines. Antibiotics and newly prescribed medicines had been received into the home without delay. Satisfactory arrangements were in place for the acquisition and storage of prescriptions.

There were satisfactory arrangements in place to manage changes to prescribed medicines. Personal medication records and handwritten entries on medicine administration records were usually updated by two members of staff; this safe practice was acknowledged.

In relation to safeguarding, staff advised that they were aware of the regional procedures and who to report any safeguarding concerns to.

There were procedures in place to ensure the safe management of medicines during a resident's admission to the home and discharge from the home.

Records of the receipt, administration and disposal of controlled drugs subject to record keeping requirements were maintained in a controlled drug record book. Checks were performed on controlled drugs which require safe custody, at the end of each shift.

Robust arrangements were observed for the management of high risk medicines e.g. warfarin.

Discontinued or expired medicines were disposed of appropriately.

Medicines were stored safely and securely and in accordance with the manufacturer's instructions. Medicine storage areas were clean, tidy and well organised. There were systems in place to alert staff of the expiry dates of medicines with a limited shelf life, once opened. The medicine refrigerator was checked at regular intervals.

Areas of good practice

There were examples of good practice in relation to staff training, competency assessment, the management of medicines on admission, controlled drugs and the storage of medicines.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.5 Is care effective?

The right care, at the right time in the right place with the best outcome.

The sample of medicines examined had been administered in accordance with the prescriber's instructions. There was evidence that time critical medicines had been administered at the correct time. There were arrangements in place to alert staff of when doses of weekly or three monthly medicines were due.

When a resident was prescribed a medicine for administration on a "when required" basis for the management of distressed reactions, the dosage instructions were recorded on the personal medication record. Staff knew how to recognise signs, symptoms and triggers which may cause a change in a resident's behaviour and were aware that this change may be associated with pain. A care plan was maintained. This type of medicine had not been required by any of the residents for a significant period of time.

The sample of records examined indicated that medicines which were prescribed to manage pain had been administered as prescribed. Staff were aware that ongoing monitoring was necessary to ensure that the pain was well controlled and the resident was comfortable. Staff advised that most of the residents could verbalise any pain.

Staff confirmed that compliance with prescribed medicine regimes was monitored and any omissions or refusals likely to have an adverse effect on the resident's health were reported to the prescriber.

Medicine records were well maintained and facilitated the audit process.

Practices for the management of medicines were audited throughout the month by the staff and management. This included running stock balances for all tablets/capsules, which had been introduced following an increase in medication incidents. In addition, a quarterly audit was completed by the community pharmacist.

Following discussion with the staff, it was evident that other healthcare professionals are contacted when required to meet the needs of residents. Staff advised that they had good working relationships with healthcare professionals involved in the residents' care.

Areas of good practice

There were examples of good practice in relation to the standard of record keeping and the administration of medicines.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.6 Is care compassionate?

Patients and clients are treated with dignity and respect and should be fully involved in decisions affecting their treatment, care and support.

Several residents self-administer some or all of their prescribed medicines. Staff performed regular stock balance audits on these medicines. For two of the four residents whose records were examined, a self-administration of medicines care plan was not written. The staff gave an assurance that this matter would be rectified without delay. Given this assurance, an area for improvement has not been specified.

The administration of medicines to residents was completed in a caring manner, residents were given time to take their medicines and medicines were administered as discreetly as possible.

Residents were observed to be relaxed and comfortable in their surroundings and in their interactions with staff. Staff were noted to be friendly, courteous and happy in their work; they treated the residents with dignity.

The residents we spoke with advised that they were very satisfied with the management of their medicines and the care provided in the home. They were very complimentary regarding staff and management. Comments made included:

"I receive good care; the staff are good."
"I receive good care; I have no issues."
"I couldn't be happier; staff are very good; the food is great."
"I am happy with my care."

None of the questionnaires that were issued to residents and relatives were returned.

Areas of good practice

Staff listened to residents and took account of their views.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

6.7 Is the service well led?

Effective leadership, management and governance which creates a culture focused on the needs and experience of service users in order to deliver safe, effective and compassionate care.

The inspector discussed arrangements in place in relation to the equality of opportunity for residents and the importance of staff being aware of equality legislation and recognising and responding to the diverse needs of residents.

Written policies and procedures for the management of medicines were in place. These were not examined in detail. Following discussion with staff, it was evident that they were knowledgeable regarding the policies and procedures and that any updates were highlighted to them.

There were robust arrangements in place for the management of medicine related incidents. Staff confirmed that they knew how to identify and report incidents. Medicine related incidents reported since the last medicines management inspection were discussed. Any anomalies in the medicine administration procedures identified by the robust internal auditing system were reported to RQIA as incidents. There was evidence of the action taken and learning implemented following incidents.

In relation to the regional safeguarding procedures, staff confirmed that they were aware that medicine incidents may need to be reported to the safeguarding team.

Following discussion with the care staff, it was evident that they knew their roles and responsibilities in relation to medicines management.

Staff confirmed that any concerns in relation to medicines management were raised with management. They advised that management were open and approachable and willing to listen.

No members of staff shared their views by completing an online questionnaire.

Areas of good practice

There were examples of good practice in relation to governance arrangements, the management of medicine incidents and quality improvement. There were clearly defined roles and responsibilities for staff.

Areas for improvement

No areas for improvement were identified during the inspection.

	Regulations	Standards
Total number of areas for improvement	0	0

7.0 Quality improvement plan

There were no areas for improvement identified during this inspection, and a QIP is not required or included, as part of this inspection report.
