

Unannounced Medicines Management Inspection Report 17 May 2017

Geannann Care Centre

Type of Service: Nursing Home
Address: 31 Ballygawley Road, Dungannon, BT70 1NH
Tel No: 028 8775 0101
Inspector: Paul Nixon

1.0 Summary

An unannounced inspection of Geanann Care Centre took place on 17 May 2017 09:45 to 14:00.

The inspection sought to assess progress with any issues raised during and since the previous inspection and to determine if the home was delivering safe, effective and compassionate care and if the service was well led.

Is care safe?

There was evidence that the management of medicines supported the delivery of safe care and positive outcomes for patients. Staff administering medicines were trained and competent. There were systems in place to ensure the management of medicines was in compliance with legislative requirements and standards. It was evident that the knowledge of the staff enables the systems in place for the management of medicines to be robust. There were no areas for improvement identified.

Is care effective?

The management of medicines supported the delivery of effective care. There were systems in place to ensure patients were receiving their medicines as prescribed. There were no areas for improvement identified.

Is care compassionate?

The management of medicines supported the delivery of compassionate care. Staff interactions were observed to be compassionate, caring and timely which promoted the delivery of positive outcomes for patients. There were no areas for improvement identified.

Is the service well led?

The service was found to be well led with respect to the management of medicines. Written policies and procedures for the management of medicines were in place which supported the delivery of care. Systems were in place to enable management to identify and cascade learning from any medicine related incidents and medicine audit activity. There were no areas for improvement identified.

This inspection was underpinned by The Nursing Homes Regulations (Northern Ireland) 2005 and the Department of Health, Social Services and Public Safety (DHSSPS) Care Standards for Nursing Homes, April 2015.

For the purposes of this report, the term 'patients' will be used to describe those living in Geanann Care Centre which provides both nursing and residential care.

1.1 Inspection outcome

	Requirements	Recommendations
Total number of requirements and recommendations made at this inspection	0	0

This inspection resulted in no requirements or recommendations being made. Findings of the inspection were discussed with Ms Michelle Devlin, Registered Manager, as part of the inspection process and can be found in the main body of the report.

Enforcement action did not result from the findings of this inspection.

1.2 Actions/enforcement taken following the most recent finance inspection

Other than those actions detailed in the QIP there were no further actions required to be taken following the most recent inspection on 12 January 2017.

2.0 Service details

Registered organisation/registered person: Runwood Homes Ltd / Mr John Rafferty	Registered manager: Ms Michelle Marie Devlin
Person in charge of the home at the time of inspection: Ms Michelle Marie Devlin	Date manager registered: 23 March 2015
Categories of care: NH-I, NH-DE, RC-DE	Number of registered places: 54

3.0 Methods/processes

Prior to inspection the following records were analysed:

- recent inspection reports and returned QIPs
- recent correspondence with the home
- the management of medicine related incidents reported to RQIA since the last medicines management inspection

We met with the registered manager, the deputy manager, two registered nurses and three care staff.

A poster indicating that the inspection was taking place was displayed in the lobby of the home and invited visitors/relatives to speak with the inspector. We spoke to one relative during the inspection.

Fifteen questionnaires were issued to patients, patients' representatives and staff with a request that they were returned within one week from the date of this inspection.

The following records were examined during the inspection:

- medicines requested and received
- personal medication records
- medicine administration records
- medicines disposed of or transferred
- controlled drug record book
- medicine audits
- care plans
- training records
- medicines storage temperatures

4.0 The inspection

4.1 Review of requirements and recommendations from the most recent inspection dated 12 January 2017

The most recent inspection of the home was an unannounced finance inspection. The completed QIP was returned and approved by the finance inspector. This QIP will be validated by the finance inspector at their next inspection.

4.2 Review of requirements and recommendations from the last medicines management inspection dated 3 May 2016

There were no requirements or recommendations made as a result of the last medicines management inspection.

4.3 Is care safe?

Medicines were managed by staff who have been trained and deemed competent to do so. An induction process was in place for registered nurses and for care staff who had been delegated medicine related tasks. The impact of training was monitored through team meetings, supervision and annual appraisal. Competency assessments were completed annually. Refresher training in medicines management was provided in the last year.

Systems were in place to manage the ordering of prescribed medicines to ensure adequate supplies were available and to prevent wastage. Staff advised of the procedures to identify and report any potential shortfalls in medicines. There were appropriate arrangements for the storage of prescriptions.

There were satisfactory arrangements in place to manage changes to prescribed medicines. Personal medication records and handwritten entries on medicine administration records were updated by two registered nurses. This safe practice was acknowledged.

There were procedures in place to ensure the safe management of medicines during a patient's admission or readmission to the home.

The management of antibiotics and newly prescribed medicines was examined. The advice of the general medical practitioner had been recorded in the patient's notes and the medicines had been obtained without delay. The medicines had been administered appropriately.

Records of the receipt, administration and disposal of controlled drugs subject to record keeping requirements were maintained in controlled drug record books. Checks were performed on controlled drugs which require safe custody, at the end of each shift. Additional checks were also performed on other controlled drugs which is good practice.

Appropriate arrangements were in place for administering medicines in disguised form.

Discontinued or expired medicines were disposed of appropriately. Discontinued controlled drugs were denatured and rendered irretrievable prior to disposal.

Medicines were stored safely and securely and in accordance with the manufacturer's instructions. Medicine storage areas were clean, tidy and well organised. There were systems in place to alert staff of the expiry dates of medicines with a limited shelf life, once opened. Medicine refrigerators and oxygen equipment were checked at regular intervals.

Areas for improvement

No areas for improvement were identified during the inspection.

Number of requirements	0	Number of recommendations	0
-------------------------------	---	----------------------------------	---

4.4 Is care effective?

The sample of medicines examined had been administered in accordance with the prescriber's instructions.

There was evidence that time critical medicines had been administered at the correct time. There were arrangements in place to alert staff of when doses of weekly medicines were due.

When a patient was prescribed a medicine for administration on a "when required" basis for the management of distressed reactions, the dosage instructions were recorded on the personal medication record. Staff knew how to recognise signs, symptoms and triggers which may cause a change in a patient's behaviour and were aware that this change may be associated with pain. The reason for and the outcome of administration were mostly recorded. A care plan was maintained.

The sample of records examined indicated that medicines which were prescribed to manage pain had been administered as prescribed. Staff were aware that ongoing monitoring was necessary to ensure that the pain was well controlled and the patient was comfortable. Staff advised that most of the patients could verbalise any pain, and a pain assessment tool was used as needed. A care plan was maintained. Staff also advised that a pain assessment is completed as part of the admission process.

The management of swallowing difficulty was examined. For those patients prescribed a thickening agent, this was recorded on their personal medication record and included details of the fluid consistency. Administrations were recorded and care plans and speech and language assessment reports were in place.

Staff confirmed that compliance with prescribed medicine regimes was monitored and any omissions or refusals likely to have an adverse effect on the patient's health were reported to the prescriber.

Medicine records were well maintained and facilitated the audit process. Areas of good practice were acknowledged. They included additional records for transdermal opioid patches.

Practices for the management of medicines were audited throughout the month by the staff and management. This included running stock balances for solid dosage medicines not dispensed in the monitored dosage system and the routine recording of the dates of opening of medicine containers. In addition, a periodic audit was completed by the community pharmacist.

Following discussion with the registered manager and staff it was evident that, when applicable, other healthcare professionals are contacted in response to the healthcare needs of patients.

Areas for improvement

No areas for improvement were identified during the inspection.

Number of requirements	0	Number of recommendations	0
-------------------------------	---	----------------------------------	---

4.5 Is care compassionate?

The morning medication round had been completed prior to the commencement of the inspection. No medicines were observed to be administered to patients during the duration of the inspection.

Patients who could not verbalise their feelings in respect of their care were observed to be relaxed and comfortable in their surroundings and in their interactions with staff.

We spoke to one relative who expressed dissatisfaction regarding one aspect of the environment. They also stated that they were “very impressed with the staff and the care provided.” The concern was shared with the registered manager for further review and consideration. The allocated care inspector was also informed of the concern.

As part of the inspection process, we issued questionnaires to patients, patients’ representatives and staff. Three patient’s representatives completed and returned questionnaires within the specified timeframe. Comments received were very positive; the responses were recorded as ‘satisfied’ or ‘very satisfied’ with the management of medicines in the home.

Three members of staff also completed a questionnaire. The responses were very positive and raised no concerns about the management of medicines in the home.

Areas for improvement

No areas for improvement were identified during the inspection.

Number of requirements	0	Number of recommendations	0
-------------------------------	---	----------------------------------	---

4.6 Is the service well led?

Written policies and procedures for the management of medicines were in place. Following discussion with staff it was evident that they were familiar with the policies and procedures and that any updates were highlighted to them.

There were robust arrangements in place for the management of medicine related incidents. Staff confirmed that they knew how to identify and report incidents. Medicine related incidents reported since the last medicines management inspection were discussed. There was evidence of the action taken and learning implemented following incidents.

Staff knew the identity of their adult safeguarding lead. They knew that medicine incidents should be considered under safeguarding procedures and how to report these.

A review of the audit records indicated that largely satisfactory outcomes had been achieved. The registered manager and staff stated that any action plan resulting from the audit activity was shared with staff and also discussed at staff meetings.

Following discussion with the registered manager, registered nurses and care staff, it was evident that staff were familiar with their roles and responsibilities in relation to medicines management.

Staff confirmed that any concerns in relation to medicines management were raised with management.

Areas for improvement

No areas for improvement were identified during the inspection.

Number of requirements	0	Number of recommendations	0
-------------------------------	---	----------------------------------	---

5.0 Quality improvement plan

There were no issues identified during this inspection, and a QIP is neither required, nor included, as part of this inspection report.

It should be noted that this inspection report should not be regarded as a comprehensive review of all strengths and areas for improvement that exist in the service. The findings reported on are those which came to the attention of RQIA during the course of this inspection. The findings contained within this report do not exempt the registered provider from their responsibility for maintaining compliance with the regulations and standards.
