

Inspection Report

Name of Service: Strawberry Fields

Provider: Strawberry Fields

Date of Inspection: 13 May 2025

Information on legislation and standards underpinning inspections can be found on our website <https://www.rqia.org.uk/>

1.0 Service information

Registered Provider:	Strawberry Fields
Responsible Person:	Mrs Roisin McCann
Registered Manager:	Mr Justin McCann
Service Profile: Strawberry Fields is a residential care home registered to provide health and social care for up to six residents. The home occupies the ground floor of a house. Residents have individual bedrooms and access to a large spacious communal lounge, a dining room and communal bathrooms. Residents have access to a garden area.	

2.0 Inspection summary

An unannounced inspection took place on 13 May 2025, from 12.50pm to 3.10pm. The inspection was completed by a pharmacist inspector and focused on medicines management within the home.

The inspection was undertaken to evidence how medicines are managed in relation to the regulations and standards and to determine if the home is delivering safe, effective and compassionate care and is well led in relation to medicines management. The areas for improvement identified at the last care inspection were carried forward for review at the next inspection.

Review of medicines management found that satisfactory arrangements were in place for the safe management of medicines. Medicines were stored securely. Medicine records and medicine related care plans were well maintained. There were effective auditing processes in place to ensure that staff were trained and competent to manage medicines and residents were administered their medicines as prescribed.

Residents were observed to be relaxed and comfortable in the home and in their interactions with staff. It was evident that staff knew the residents well.

Details of the inspection findings, including areas for improvement carried forward for review at the next inspection, can be found in the main body of this report and in the quality improvement plan (QIP) (Section 4.0).

RQIA would like to thank the staff for their assistance throughout the inspection.

3.0 The inspection

3.1 How we inspect

RQIA's inspections form part of our ongoing assessment of the quality of services. Our reports reflect how the home was performing against the regulations and standards, at the time of our inspection, highlighting both good practice and any areas for improvement. It is the responsibility of the service provider to ensure compliance with legislation, standards and best practice, and to address any deficits identified during our inspections.

To prepare for this inspection, information held by RQIA about this home was reviewed. This included areas for improvement identified at previous inspections, registration information, and any other written or verbal information received from residents, relatives, staff or the commissioning trust.

Throughout the inspection process, inspectors seek the views of those living, working and visiting the home; and review/examine a sample of records to evidence how the home is performing in relation to the regulations and standards.

3.2 What people told us about the service and their quality of life

Staff expressed satisfaction with how the home was managed. They also said that they had the appropriate training to look after residents and meet their needs. They said that the team communicated well and the management team were readily available to discuss any issues and concerns should they arise.

Staff advised that they were familiar with how each resident liked to take their medicines. They stated medication rounds were tailored to respect each individual's preferences, needs and timing requirements.

RQIA did not receive any completed questionnaires or responses to the staff survey following the inspection.

3.3 Inspection findings

3.3.1 What arrangements are in place to ensure that medicines are appropriately prescribed, monitored and reviewed?

Residents in residential care homes should be registered with a general practitioner (GP) to ensure that they receive appropriate medical care when they need it. At times residents' needs may change and therefore their medicines should be regularly monitored and reviewed. This is usually done by a GP, a pharmacist or during a hospital admission.

Residents in the home were registered with a GP and medicines were dispensed by the community pharmacist.

Personal medication records were in place for each resident. These are records used to list all of the prescribed medicines, with details of how and when they should be administered. It is important that these records accurately reflect the most recent prescription to ensure that medicines are administered as prescribed and because they may be used by other healthcare professionals, for example, at medication reviews or hospital appointments.

The personal medication records reviewed were accurate and up to date. In line with best practice, a second member of staff had checked and signed the personal medication records when they were written and updated to confirm that they were accurate.

Copies of residents' prescriptions/hospital discharge letters were retained so that any entry on the personal medication record could be checked against the prescription.

All residents should have care plans which detail their specific care needs and how the care is to be delivered. In relation to medicines these may include care plans for the management of distressed reactions, pain, modified diets etc.

The management of antibiotics was reviewed. Medicine records were well maintained. The audits completed indicated that medicines were administered as prescribed.

Residents will sometimes get distressed and will occasionally require medicines to help them manage their distress. It is important that care plans are in place to direct staff when it is appropriate to administer these medicines and that records are kept of when the medicine was given, the reason it was given and what the outcome was. If staff record the reason and outcome of giving the medicine, then they can identify common triggers which may cause the resident's distress and if the prescribed medicine is effective for the resident.

The management of medicines, prescribed on a 'when required' basis for distressed reactions, was reviewed. Directions for use were clearly recorded on the personal medication record and care plans were in place, advice was provided on ensuring care plans are person-centred and include parameters for the administration of these medicines. This was addressed immediately. Staff knew how to recognise a change in a resident's behaviour and were aware that this change may be associated with pain and other factors. Records of administration included the reason for and outcome of each administration.

The management of pain was discussed. Staff advised that they were familiar with how each resident expressed their pain and that pain relief was administered when required. Care plans were in place and reviewed regularly.

3.3.2 What arrangements are in place to ensure that medicines are supplied on time, stored safely and disposed of appropriately?

Medicine stock levels must be checked on a regular basis and new stock must be ordered on time. This ensures that the resident's medicines are available for administration as prescribed. It is important that they are stored safely and securely so that there is no unauthorised access and disposed of promptly to ensure that a discontinued medicine is not administered in error.

Records reviewed showed that medicines were available for administration when residents required them. Staff advised that they had a good relationship with the community pharmacist and that medicines were supplied in a timely manner.

The medicine storage area was observed to be securely locked to prevent any unauthorised access. It was tidy and organised so that medicines belonging to each resident could be easily located. Temperatures of medicine storage areas were monitored and recorded to ensure that medicines were stored appropriately. Satisfactory arrangements were in place for medicines requiring cold storage and the storage of controlled drugs, should they be needed.

Satisfactory arrangements were in place for the safe disposal of medicines.

3.3.3 What arrangements are in place to ensure that medicines are appropriately administered within the home?

It is important to have a clear record of which medicines have been administered to residents to ensure that they are receiving the correct prescribed treatment.

A sample of the medicines administration records was reviewed. Records were found to have been accurately completed. Records were filed once completed and were readily retrievable for audit/review.

Management and staff audited the management and administration of medicines on a regular basis within the home. There was evidence that the findings of the audits had been discussed with staff and addressed. The date of opening was recorded on medicines to facilitate audit and disposal at expiry.

3.3.4 What arrangements are in place to ensure that medicines are safely managed during transfer of care?

People who use medicines may follow a pathway of care that can involve both health and social care services. It is important that medicines are not considered in isolation, but as an integral part of the pathway, and at each step. Problems with the supply of medicines and how information is transferred put people at increased risk of harm when they change from one healthcare setting to another.

A review of records indicated that satisfactory arrangements were in place to manage medicines at the time of admission or for residents returning from hospital. Written confirmation of prescribed medicines was obtained at or prior to admission and details shared with the GP and community pharmacy. Medicine records had been accurately completed and there was evidence that medicines were administered as prescribed.

3.3.5 What arrangements are in place to ensure that staff can identify, report and learn from adverse incidents?

Occasionally medicines incidents occur within homes. It is important that there are systems in place which quickly identify that an incident has occurred so that action can be taken to prevent a recurrence and that staff can learn from the incident. A robust audit system will help staff to identify medicine related incidents.

There had been no medicine related incidents reported to RQIA since the last medicines management inspection. Management and staff were familiar with the type of incidents that should be reported. The inspector signposted staff to the RQIA provider guidance in relation to the statutory notification of medication related incidents available on the RQIA website.

The audits completed at the inspection indicated that medicines were being administered as prescribed.

3.3.6 What measures are in place to ensure that staff in the home are qualified, competent and sufficiently experienced and supported to manage medicines safely?

To ensure that residents are well looked after and receive their medicines appropriately, staff who administer medicines to residents must be appropriately trained. The registered person has a responsibility to check that they staff are competent in managing medicines and that they are supported. Policies and procedures should be up to date and readily available for staff reference.

There were records in place to show that staff responsible for medicines management had been trained and deemed competent. Medicines management policies and procedures were in place.

4.0 Quality Improvement Plan/Areas for Improvement

	Regulations	Standards
Total number of Areas for Improvement	0	4*

* the total number of areas for improvement includes four which were carried forward for review at the next inspection.

This inspection resulted in no new areas for improvement being identified. Findings of the inspection were discussed with Mr Justin McCann, Registered Manager, as part of the inspection process and can be found in the main body of the report.

Quality Improvement Plan	
Action required to ensure compliance with the Care Standards for Residential Homes, December 2022	
Area for improvement 1 Ref: Standard 8.5 Stated: Second time To be completed by: From date of inspection 19 June 2024	The registered person shall ensure that all records are legible, accurate, up-to-date, signed and dated by the person making the entry.
	Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection. Ref: 2.0
Area for improvement 2 Ref: Standard 23.3 Stated: First time To be completed by: 31 July 2024	The registered person shall ensure that staff receive Mental Capacity Act training in line with their roles and responsibilities.
	Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection. Ref: 2.0
Area for improvement 3 Ref: Standard 6 Stated: First time To be completed by: 31 July 2024	The registered person shall ensure that, all care plans are up to date and where appropriate there is evidence of resident involvement in the care planning process.
	Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection. Ref: 2.0
Area for improvement 4 Ref: Standard 20.10 Stated: First time To be completed by: 31 July 2024	The registered person shall review the home's current audit processes to ensure they are effective.
	Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection. Ref: 2.0
