# Inspection Report

**Name of Service:** Carmen House  
**Provider:** Harrison Care Homes Bangor Ltd  
**Date of Inspection:** 2 September 2025

Information on legislation and standards underpinning inspections can be found on our website <https://www.rqia.org.uk/>

## 1.0 Service information

<b>Organisation/Registered Provider:</b>	Harrison Care Homes Bangor Ltd
<b>Responsible Individual:</b>	Mrs Lisa Dawn Harrison
<b>Registered Manager:</b>	Mrs Kylie Maynard
<b>Service Profile:</b> Carmen House is a residential care home registered to provide health and social care for up to fifteen residents. The home provides general residential care, and care for residents living with dementia or a physical disability. Accommodation is provided across two floors. Residents have access to a lounge, conservatory and dining space where they can socialise.	

## 2.0 Inspection summary

An unannounced inspection took place on 2 September 2025, from 10.15am to 1.45pm. The inspection was completed by a pharmacist inspector and focused on medicines management within the home.

The inspection was undertaken to evidence how medicines are managed in relation to the regulations and standards and to determine if the home is delivering safe, effective and compassionate care and is well led in relation to medicines management. The areas for improvement identified at the last care inspection were carried forward for review at the next inspection.

Review of medicines management found that satisfactory arrangements were in place for the safe management of medicines. Medicines were stored securely. Medicine records and medicine related care plans were generally well maintained. There were effective auditing processes in place to ensure that staff were trained and competent to manage medicines and residents were administered their medicines as prescribed. No new areas for improvement were identified.

Details of the inspection findings, including areas for improvement carried forward for review at the next inspection, can be found in the main body of this report and in the quality improvement plan (QIP) (Section 4.0).

Residents were observed to be relaxed and comfortable in the home and in their interactions with staff. It was evident that staff knew the residents well.

RQIA would like to thank the staff for their assistance throughout the inspection.

## **3.0 The inspection**

### **3.1 How we inspect**

RQIA's inspections form part of our ongoing assessment of the quality of services. Our reports reflect how the home was performing against the regulations and standards, at the time of our inspection, highlighting both good practice and any areas for improvement. It is the responsibility of the service provider to ensure compliance with legislation, standards and best practice, and to address any deficits identified during our inspections.

To prepare for this inspection, information held by RQIA about this home was reviewed. This included areas for improvement identified at previous inspections, registration information, and any other written or verbal information received from residents, relatives, staff or the commissioning trust.

Throughout the inspection process, inspectors seek the views of those living, working and visiting the home; and review/examine a sample of records to evidence how the home is performing in relation to the regulations and standards.

### **3.2 What people told us about the service and their quality of life**

Staff expressed satisfaction with how the home was managed. They also said that they had the appropriate training to look after residents and meet their needs. They said that the team communicated well and the management team were readily available to discuss any issues and concerns should they arise.

Staff advised that they were familiar with how each resident liked to take their medicines. They stated medication rounds were tailored to respect each individual's preferences, needs and timing requirements.

RQIA did not receive any completed questionnaires or responses to the staff survey following the inspection.

## **3.3 Inspection findings**

### **3.3.1 What arrangements are in place to ensure that medicines are appropriately prescribed, monitored and reviewed?**

Residents in residential care homes should be registered with a general practitioner (GP) to ensure that they receive appropriate medical care when they need it. At times residents' needs may change and therefore their medicines should be regularly monitored and reviewed. This is usually done by a GP, a pharmacist or during a hospital admission.

Residents in the home were registered with a GP and medicines were dispensed by the community pharmacist.

Personal medication records were in place for each resident. These are records used to list all of the prescribed medicines, with details of how and when they should be administered. It is important that these records accurately reflect the most recent prescription to ensure that medicines are administered as prescribed and because they may be used by other healthcare professionals, for example, at medication reviews or hospital appointments.

The personal medication records reviewed were accurate and up to date. In line with best practice, a second member of staff had checked and signed the personal medication records when they were written and updated to confirm that they were accurate. One minor discrepancy was highlighted to the manager for immediate corrective action and on-going vigilance.

Copies of residents' prescriptions/hospital discharge letters were retained so that any entry on the personal medication record could be checked against the prescription.

All residents should have care plans which detail their specific care needs and how the care is to be delivered. In relation to medicines these may include care plans for the management of distressed reactions, pain, modified diets etc.

The management of pain was discussed. Staff advised that they were familiar with how each resident expressed their pain and that pain relief was administered when required. Care plans were in place and reviewed regularly. One care plan needed an update to reflect the most up to date prescription and this was highlighted to the manager for immediate corrective action. Medicine records were well maintained. The audits completed indicated that medicines were administered as prescribed.

### **3.3.2 What arrangements are in place to ensure that medicines are supplied on time, stored safely and disposed of appropriately?**

Medicine stock levels must be checked on a regular basis and new stock must be ordered on time. This ensures that the resident's medicines are available for administration as prescribed. It is important that they are stored safely and securely so that there is no unauthorised access and disposed of promptly to ensure that a discontinued medicine is not administered in error.

Records reviewed showed that medicines were available for administration when residents required them. Staff advised that they had a good relationship with the community pharmacist and that medicines were supplied in a timely manner.

The medicine storage area was observed to be securely locked to prevent any unauthorised access. It was tidy and organised so that medicines belonging to each resident could be easily located. The temperature of the clinical area was monitored and recorded, however staff were advised to move the thermometer into the cupboard where the medicine trolley was stored to ensure that the temperature is accurately monitored and that medicines were stored appropriately. Assurances were provided that this would be actioned immediately.

Medicines which require cold storage must be stored between 2°C and 8°C to maintain their stability and efficacy. In order to ensure that this temperature range is maintained it is necessary to monitor the maximum and minimum temperatures of the medicines refrigerator each day and to then reset the thermometer. Review of the temperature records identified that there were gaps in records. This had already been identified by the manager through the

home's audit system and appropriate action had already been taken and this was being closely monitored.

Satisfactory arrangements were in place for the storage of controlled drugs and the safe disposal of medicines.

### **3.3.3 What arrangements are in place to ensure that medicines are appropriately administered within the home?**

It is important to have a clear record of which medicines have been administered to residents to ensure that they are receiving the correct prescribed treatment.

A sample of the medicines administration records was reviewed. Records were found to have been accurately completed. Records were filed once completed and were readily retrievable for audit/review.

Controlled drugs are medicines which are subject to strict legal controls and legislation. They commonly include strong pain killers. The receipt, administration and disposal of controlled drugs should be recorded in the controlled drug record book. There were satisfactory arrangements in place for the management of controlled drugs.

Management and staff audited the management and administration of medicines on a regular basis within the home. There was evidence that the findings of the audits had been discussed with staff and addressed. The date of opening was recorded on medicines to facilitate audit and disposal at expiry.

### **3.3.4 What arrangements are in place to ensure that medicines are safely managed during transfer of care?**

People who use medicines may follow a pathway of care that can involve both health and social care services. It is important that medicines are not considered in isolation, but as an integral part of the pathway, and at each step. Problems with the supply of medicines and how information is transferred put people at increased risk of harm when they change from one healthcare setting to another.

A review of records indicated that satisfactory arrangements were in place to manage medicines at the time of admission or for residents returning from hospital. Written confirmation of prescribed medicines was obtained at or prior to admission and details shared with the GP and community pharmacy. Medicine records had been accurately completed and there was evidence that medicines were administered as prescribed.

### 3.3.5 What arrangements are in place to ensure that staff can identify, report and learn from adverse incidents?

Occasionally medicines incidents occur within homes. It is important that there are systems in place which quickly identify that an incident has occurred so that action can be taken to prevent a recurrence and that staff can learn from the incident. A robust audit system will help staff to identify medicine related incidents.

Management and staff were familiar with the type of incidents that should be reported. The medicine related incidents which had been reported to RQIA since the last inspection were discussed. There was evidence that the incidents had been reported to the prescriber for guidance, investigated and the learning shared with staff in order to prevent a recurrence.

The audits completed at the inspection indicated that the majority of medicines were being administered as prescribed. One minor discrepancy was highlighted to the manager for on-going monitoring.

### 3.3.6 What measures are in place to ensure that staff in the home are qualified, competent and sufficiently experienced and supported to manage medicines safely?

To ensure that residents are well looked after and receive their medicines appropriately, staff who administer medicines to residents must be appropriately trained. The registered person has a responsibility to check that the staff are competent in managing medicines and that they are supported.

There were records in place to show that staff responsible for medicines management had been trained and deemed competent.

## 4.0 Quality Improvement Plan/Areas for Improvement

	Regulations	Standards
<b>Total number of Areas for Improvement</b>	0	2*

\* the total number of areas for improvement includes two which were carried forward for review at the next inspection.

This inspection resulted in no new areas for improvement being identified. Findings of the inspection were discussed with Mrs Lisa Dawn Harrison, Responsible Individual and Mrs Kylie Maynard, Registered Manager, as part of the inspection process and can be found in the main body of the report.

<b>Quality Improvement Plan</b>	
<b>Action required to ensure compliance with the Residential Care Homes Minimum Standards (December 2022) (Version 1:2)</b>	
<b>Area for improvement 1</b> <b>Ref:</b> Standard 6.6 <b>Stated:</b> First time <b>To be completed by:</b> 15 May 2025	<p>The registered person shall ensure care plans are kept up to date and reflects residents' current needs. This is stated in relation to the management of diabetes and catheter care.</p> <hr/> <p><b>Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection.</b></p> <p>Ref: 2.0</p>
<b>Area for improvement 2</b> <b>Ref:</b> Standard E26 <b>Stated:</b> First time <b>To be completed by:</b> 1 July 2025	<p>The registered person shall ensure that each resident's bedroom has a lockable storage space, for use by the resident.</p> <hr/> <p><b>Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection.</b></p> <p>Ref: 2.0</p>
