Inspection Report

Name of Service: Springhill Residential Care Services

Provider: Healthcare Ireland (Belfast) Limited

Date of Inspection: 10 April 2025

Information on legislation and standards underpinning inspections can be found on our website <https://www.rqia.org.uk/>

1.0 Service information

Organisation/Registered Provider:	Healthcare Ireland (Belfast) Limited
Responsible Individual:	Ms Amanda Mitchell
Registered Manager:	Miss Joanne Alderdice, not registered
Service Profile: Springhill Residential Care Services is a registered residential care home which provides health and social care for up to 33 residents. The home is divided into three floors with residents' bedrooms located on the ground floor. There is also a registered nursing home under the same roof and the manager for this home manages both services.	

2.0 Inspection summary

An unannounced inspection took place on 10 April 2025, from 10.10am to 1.40pm. The inspection was completed by a pharmacist inspector and focused on medicines management within the home.

The inspection was undertaken to evidence how medicines are managed in relation to the regulations and standards and to determine if the home is delivering safe, effective and compassionate care and is well led in relation to medicines management. The areas for improvement identified at the last care inspection were carried forward for review at the next inspection.

Review of medicines management found that satisfactory arrangements were in place for the safe management of medicines. Medicines were stored securely. Medicine records and medicine related care plans were well maintained. There were effective auditing processes in place to ensure that staff were trained and competent to manage medicines and residents were administered their medicines as prescribed.

Details of the inspection findings, including areas for improvement carried forward for review at the next inspection can be found in the main body of this report and in the quality improvement plan (QIP) (Section 4.0).

RQIA would like to thank the staff for their assistance throughout the inspection.

3.0 The inspection

3.1 How we inspect

RQIA's inspections form part of our ongoing assessment of the quality of services. Our reports reflect how the home was performing against the regulations and standards, at the time of our inspection, highlighting both good practice and any areas for improvement. It is the responsibility of the service provider to ensure compliance with legislation, standards and best practice, and to address any deficits identified during our inspections.

To prepare for this inspection, information held by RQIA about this home was reviewed. This included, registration information, and any other written or verbal information received from residents, relatives, staff or the commissioning trust.

Throughout the inspection process, inspectors seek the views of those living, working and visiting the home; and review/examine a sample of records to evidence how the home is performing in relation to the regulations and standards.

3.2 What people told us about the service and their quality of life

Staff expressed satisfaction with how the home was managed. They also said that they had the appropriate training to look after residents and meet their needs. They said that the team communicated well and the management team were readily available to discuss any issues and concerns should they arise.

Staff advised that they were familiar with how each resident liked to take their medicines. They stated medication rounds were tailored to respect each individual's preferences, needs and timing requirements.

No completed questionnaires or responses to the staff survey were received following the inspection.

3.3 Inspection findings

3.3.1 What arrangements are in place to ensure that medicines are appropriately prescribed, monitored and reviewed?

Residents in residential care homes should be registered with a general practitioner (GP) to ensure that they receive appropriate medical care when they need it. At times residents' needs may change and therefore their medicines should be regularly monitored and reviewed. This is usually done by a GP, a pharmacist or during a hospital admission.

Residents in the home were registered with a GP and medicines were dispensed by the community pharmacist.

Personal medication records were in place for each resident. These are records used to list all of the prescribed medicines, with details of how and when they should be administered. It is important that these records accurately reflect the most recent prescription to ensure that medicines are administered as prescribed and because they may be used by other healthcare professionals, for example, at medication reviews or hospital appointments.

The personal medication records reviewed were accurate and up to date. In line with best practice, a second member of staff had checked and signed the personal medication records when they were written and updated to confirm that they were accurate. A small number of minor discrepancies were highlighted to staff for immediate corrective action and on-going vigilance.

Copies of residents' prescriptions/hospital discharge letters were retained so that any entry on the personal medication record could be checked against the prescription.

All residents should have care plans which detail their specific care needs and how the care is to be delivered. In relation to medicines these may include care plans for the management of distressed reactions, pain, modified diets etc.

The management of distressed reactions and insulin was reviewed. Care plans contained sufficient detail to direct the required care. Medicine records were well maintained. The audits completed indicated that medicines were administered as prescribed.

The management of pain was discussed. Staff advised that they were familiar with how each resident expressed their pain and that pain relief was administered when required. Care plans were in place and reviewed regularly. One care plan needed updated with the details of the most recent prescription. The manager provided assurances that this would be actioned immediately.

Some residents may need their diet modified to ensure that they receive adequate nutrition. This may include thickening fluids to aid swallowing and food supplements in addition to meals. Care plans detailing how the resident should be supported with their food and fluid intake should be in place to direct staff. All staff should have the necessary training to ensure that they can meet the needs of the resident.

The management of thickening agents was reviewed. Speech and language assessment reports and care plans were in place. Records of prescribing and administration which included the recommended consistency level were maintained. One administration record needed the consistency level added and one personal medication record needed the consistency level updated to the most recent recommendation. Records evidenced the correct consistency level was administered. This was highlighted to the manager who provided assurances that it would be actioned immediately.

3.3.2 What arrangements are in place to ensure that medicines are supplied on time, stored safely and disposed of appropriately?

Medicine stock levels must be checked on a regular basis and new stock must be ordered on time. This ensures that the resident's medicines are available for administration as prescribed. It is important that they are stored safely and securely so that there is no unauthorised access and disposed of promptly to ensure that a discontinued medicine is not administered in error.

Records reviewed showed that medicines were available for administration when residents required them. Staff advised that they had a good relationship with the community pharmacist and that medicines were supplied in a timely manner.

The medicine storage area was observed to be securely locked to prevent any unauthorised access. It was tidy and organised so that medicines belonging to each resident could be easily located. The temperature of the medicine storage area was monitored and recorded to ensure that medicines were stored appropriately. Satisfactory arrangements were in place for medicines requiring cold storage and the storage of controlled drugs.

Satisfactory arrangements were in place for the safe disposal of medicines.

3.3.3 What arrangements are in place to ensure that medicines are appropriately administered within the home?

It is important to have a clear record of which medicines have been administered to residents to ensure that they are receiving the correct prescribed treatment.

A sample of the medicines administration records was reviewed. Most of the records were found to have been accurately completed. One missed signature was brought to the attention of the manager for ongoing monitoring. A small number of handwritten medicine administration records did not include the month or year. This was brought to the attention of staff and the manager for immediate action and on-going review. Records were filed once completed and were readily retrievable for audit/review.

Controlled drugs are medicines which are subject to strict legal controls and legislation. They commonly include strong pain killers. The receipt, administration and disposal of controlled drugs should be recorded in the controlled drug record book. There were satisfactory arrangements in place for the management of controlled drugs. A small number of stock balances in the controlled drug record were not brought to zero after disposal. This was discussed with the manager for immediate corrective action and on-going monitoring.

Management and staff audited the management and administration of medicines on a regular basis within the home. There was evidence that the findings of the audits had been discussed with staff and addressed. The date of opening was recorded on medicines to facilitate audit and disposal at expiry.

3.3.4 What arrangements are in place to ensure that medicines are safely managed during transfer of care?

People who use medicines may follow a pathway of care that can involve both health and social care services. It is important that medicines are not considered in isolation, but as an integral part of the pathway, and at each step. Problems with the supply of medicines and how information is transferred put people at increased risk of harm when they change from one healthcare setting to another.

A review of records indicated that satisfactory arrangements were in place to manage medicines at the time of admission or for residents returning from hospital.

Written confirmation of prescribed medicines was obtained at or prior to admission and details shared with the GP and community pharmacy. Medicine records had been accurately completed and there was evidence that medicines were administered as prescribed.

3.3.5 What arrangements are in place to ensure that staff can identify, report and learn from adverse incidents?

Occasionally medicines incidents occur within homes. It is important that there are systems in place which quickly identify that an incident has occurred so that action can be taken to prevent a recurrence and that staff can learn from the incident. A robust audit system will help staff to identify medicine related incidents.

Management and staff were familiar with the type of incidents that should be reported. The medicine related incidents which had been reported to RQIA since the last inspection were discussed. There was evidence that the incidents had been reported to the prescriber for guidance, investigated and the learning shared with staff in order to prevent a recurrence.

The audits completed at the inspection indicated that the majority of medicines were being administered as prescribed. However, audit discrepancies were observed in the administration of a small number of medicines. The audits were discussed in detail with the staff on duty and the manager for on-going monitoring.

3.3.6 What measures are in place to ensure that staff in the home are qualified, competent and sufficiently experienced and supported to manage medicines safely?

To ensure that residents are well looked after and receive their medicines appropriately, staff who administer medicines to residents must be appropriately trained. The registered person has a responsibility to check that they staff are competent in managing medicines and that they are supported. Policies and procedures should be up to date and readily available for staff reference.

There were records in place to show that staff responsible for medicines management had been trained and deemed competent. Medicines management policies and procedures were in place.

It was agreed that the findings of this inspection would be discussed with staff to facilitate the necessary improvements.

4.0 Quality Improvement Plan/Areas for Improvement

	Regulations	Standards
Total number of Areas for Improvement	4*	3*

* the total number of areas for improvement includes seven which were carried forward for review at the next inspection.

This inspection resulted in no new areas for improvement being identified. Findings of the inspection were discussed with Miss Joanne Alderdice, Manager, as part of the inspection process and can be found in the main body of the report.

Quality Improvement Plan	
Action required to ensure compliance with The Residential Home Regulations (Northern Ireland) 2005	
Area for improvement 1 Ref: Regulation 13 (7) Stated: Third time To be completed by: 25 July 2024	The registered person shall ensure the infection prevention and control issues identified on inspection are managed to minimise the risk and spread of infection. This area of improvement relates to the following: <ul style="list-style-type: none"> • Donning and doffing of personal protective equipment • Appropriate use of personal protective equipment • Staff knowledge and practice regarding hand hygiene
	Action required to ensure compliance with this regulation was not reviewed as part of this inspection and this is carried forward to the next inspection. Ref: 2.0
Area for improvement 2 Ref: Regulation 16 (2) (b) Stated: Second time To be completed by: 25 July 2024	The registered person shall ensure that the residents plan is kept under review in keeping with best practice guidance and is reflective of their assessed needs.
	Action required to ensure compliance with this regulation was not reviewed as part of this inspection and this is carried forward to the next inspection. Ref: 2.0
Area for improvement 3 Ref: Regulation 18 (2) (c) (e) Stated: First time To be completed by: 25 July 2024	The registered person shall ensure clean bedding is used at all times suitable to the needs of the residents. Arrangements must be in place for the regular laundering of bed linen.
	Action required to ensure compliance with this regulation was not reviewed as part of this inspection and this is carried forward to the next inspection. Ref: 2.0

<p>Area for improvement 4</p> <p>Ref: Regulation 14 (2) (a) (c)</p> <p>Stated: First time</p> <p>To be completed by: 25 July 2024</p>	<p>The registered person shall ensure that all areas of the home to which residents have access are free from hazards to their safety.</p> <p>Action required to ensure compliance with this regulation was not reviewed as part of this inspection and this is carried forward to the next inspection.</p> <p>Ref: 2.0</p>
<p>Action required to ensure compliance with the Care Standards for Residential Homes, December 2022</p>	
<p>Area for improvement 1</p> <p>Ref: Standard 8.5</p> <p>Stated: Second time</p> <p>To be completed by: 25 July 2025</p>	<p>The registered person shall ensure that all supplementary care records are accurate and completed contemporaneously.</p> <p>Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection.</p> <p>Ref: 2.0</p>
<p>Area for improvement 2</p> <p>Ref: Standard 5.5</p> <p>Stated: First time</p> <p>To be completed by: 25 July 2024</p>	<p>The registered person shall ensure that residents assessments are kept under continual review and are amended as changes occur.</p> <p>This area of improvement is made with specific reference to management of skin integrity.</p> <p>Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection.</p> <p>Ref: 2.0</p>
<p>Area for improvement 3</p> <p>Ref: Standard 27.1</p> <p>Stated: First time</p> <p>To be completed by: 25 July 2024</p>	<p>The registered person shall ensure that the environment in the home is kept clean and hygienic at all times.</p> <p>Action required to ensure compliance with this standard was not reviewed as part of this inspection and this is carried forward to the next inspection.</p> <p>Ref: 2.0</p>
